## INTRODUCTION

This volume contains the material submitted on secondary education and higher education, and all school statistics for the period covered by the report.

Volume 2 of the report, which is already in printed form, contains the material relating to elementary education. President Finley prepared an introduction to such volume.

The departure of President Finley for Palestine on a war mission, before the completion of the printing of volume 1 of this report, has made it impossible for him to prepare an introduction to this volume.

Thos. S. Finley

*Acting Commissioner of Education*

[v]

## SECONDARY EDUCATION

## SECONDARY EDUCATION

PREPARED BY

CHARLES F. WHEELOCK

*Assistant Commissioner for Secondary Education*

During the school year 1914-15, there were in active operation in The University of the State of New York 740 public secondary schools and 192 academies, a total of 932 institutions of secondary education. In these schools 7545 teachers gave instruction to 177,797 pupils. As compared with the preceding year there has been an increase of 6 institutions, 458 teachers and 10,404 pupils.

In this report an effort is made to set forth in a detailed manner the activities of each secondary school in the University. In Exhibits D, E and F there is presented in tabular form for each of these secondary schools not only the statistical matter that has been regularly published in former reports, but also a detailed statement of the registration for each school in each subject in which instruction was given. The totals of this table give the total registration in each subject of instruction for the State and thus furnish a basis for the study of the relative amount of attention given to each subject in the secondary curriculum.

A separate table of totals is given in which is shown for the public high schools and the academies separately and for the two combined the whole number of schools offering each subject, the total registration in each subject with the per cent of the registration in each subject as compared with the total class registration for the State.

Separate graphic representations of these totals are presented for the public high schools and the academies separately and also for two separate groups of public high schools, namely, one for New York City, which includes the largest high schools in the State, and another for the junior academic departments, which is made up of the smallest secondary schools of the State.

From the data given it will be easy for anyone interested to make similar studies of other special groups, such, for example, as those in towns from 2000 to 3000 population, of second class cities, of third class cities, etc. Likewise persons interested in any particular school may readily compare conditions of such school with conditions in any other school or with average conditions in the State.

It is interesting to note that in each of the four groups shown graphically, the number of pupils registered in second year English, third year English and fourth year English respectively is greater

than the total registration of pupils for the corresponding years of the course, a fact that is probably to be accounted for on the theory of retardation in other subjects of pupils who are regularly classified as of a year or more in advance of the progress they have made in English. The fact that although English is a required subject for all pupils, the number registered in first year English is more than 5000 less than the whole number of first year pupils reported is worthy of attention. Does the omission of the examination in first year English tend to more rapid advancement in this subject and thus result in advancing many in English, who when the entire record is considered, are still rated as first year pupils? This seems the most plausible explanation.

It will be noted that the total registration in all Latin subjects combined is about one-third of that in all English subjects combined and that the registration in Greek is very small in comparison. Still 980 pupils were registered in first year Greek and 495 in third year Greek, indicating a much smaller mortality in Greek than in other subjects. The registration in all foreign languages combined is about nine-tenths of that in all English subjects combined, showing that more school energy is devoted to instruction in English than to instruction of all the six foreign languages offered taken together.

In the order of number of pupils registered for each group, the various groups rank as follows: English, 20.30 per cent; foreign languages, 18.35 per cent; commercial subjects, 12.31 per cent; mathematics, 12.24 per cent; science, 11.38 per cent; history, 7.93 per cent; music, 6.62 per cent; drawing, 5.29 per cent. These percentages are based on total registration in all subjects. They are only an approximately correct indication of the relative amount of energy expended since the number of recitations a week is not the same in all subjects.

A comparison of the registration of the academies with that of the high schools shows some striking differences. The mortality in the high schools is much greater than in the academies. In the former the fourth year class is only 24 per cent of the first year class; in the latter, 45 per cent. Apparently the academy pupils are actuated by a more definite purpose, probably preparation for college, and to a greater extent than the public high school pupils. As might be expected, subjects not regularly required for college entrance show a smaller relative registration in the academies than in the public high schools. Advanced arithmetic, commercial subjects,

other industrial subjects are included in this class. On the other hand, Latin and Greek are relatively larger in the academies than in the public high schools.

While only 9 per cent of all secondary pupils are registered in the academies, the academies have 11 per cent of all the pupils studying Latin and  $39\frac{1}{5}$  per cent of all studying Greek.

As will be seen from the diagram, the proportion of attention given to the various subjects in New York City does not differ in the main from that in the rest of the State as a whole so far as regards the so-called conventional or traditional high school subjects. The exceptions are in modern history 1, of which New York City has 11,569 of the 12,484 pupils in the State, and modern history 2, of which New York City has 7575 of the 7744 in the State. New York City also has an undue proportion of those taking all the commercial subjects as well as of those taking rudiments of music and physical training. Naturally agriculture does not appear in the New York City list.

The separate exhibit of the junior academic departments contains several points of special interest. There are 53 of these departments in the State. Under the rules each of these departments must offer one year of high school work and may offer two years of such work. It will be observed that although the teaching of subjects beyond the second year is not authorized in these schools, 39 third years pupils and 5 fourth year pupils are reported by the 53 schools included in the exhibit. A few pupils are reported as registered in English third year, English fourth year, Latin third year, Latin fourth year, and in American history with civics, all of which are subjects beyond the second high school year.

The fact that in these 53 schools there were 44 pupils beyond the grade authorized is not an indication of a serious defect in the organization. It is probably true that in most cases these 44 pupils reside in the vicinity of the junior academic departments which they are attending, have finished the first and second years' work authorized in these schools and would not attend any high school were they not permitted to attend the high school at home. The extent to which pupils are instructed beyond the authorized grade of the school does not seem to be so great as to cause serious misapprehension.

The above are only a few of the evident deductions that may be made from a study of these tables. The extensive data given will enable students of education who wish to pursue the investigation further to do so.

## REORGANIZATION OF THE HIGH SCHOOL COURSE

In February 1913 the Regents adopted a section of rule 337 as follows:

Credit toward an academic diploma may be given on proper certification by the principal of a recognized high school for the completion of courses approved after inspection by the Department, in subjects other than those named in this section. A detailed outline of such courses must be submitted to the Department when application for the inspection of the course is made.

They also provided for a special diploma in vocational subjects, in which, under the operation of the rule mentioned, 41 of the 72 counts required (almost seven-twelfths) may be granted on the certificate of the school after inspection. These rules, which virtually went into full effect with the beginning of the school year 1914-15, mark the beginning of a distinctly new period in the development of the New York State high school system. It has sometimes been charged that our system prevents growth, retards development and restricts exercise of initiative on the part of progressive teachers. The new rules referred to, while conservatively holding to the fundamentals of an education, are broad enough and elastic enough to permit of almost unlimited pedagogical experiments. Under these rules there have been approved courses in elementary science, oral English, domestic science, industrial geography, industrial history, as well as a large variety of courses in agriculture and other industrial subjects. It seems perfectly fair to say that the going into effect of these rules is the most important single event in secondary education in the State during the year covered by this report.

It was not to be expected that a large number of schools would be in a position to take advantage of the provision offered by the rule referred to, but it is hoped and believed that as time goes on, a continually increasing number will avail themselves of the privilege offered.

During the year 1914-15 the following courses have been approved for credit on certificate:

SCHOOL	COURSE
Buffalo (Technical High School).....	Industrial history
Elmira Free Academy.....	Special course in chemistry
Franklin Academy, Malone.....	Oral English
Gouverneur High School.....	Oral English
Houghton Wesleyan Seminary.....	Music practice
Hudson High School.....	Oral English
Immaculate Heart Academy, Watertown.....	Music practice
Irvington High School.....	Oral English
Lansingburg High School.....	Oral English
Little Falls High School.....	Oral English
New Rochelle High School.....	Elementary science
New York City (Morris High School).....	Civic biology
Saratoga Springs High School.....	Oral English

In the 1914 report of the United States Commissioner of Education, volume I, in the chapter on secondary education, occurs the following:

*The Junior High School*

Although among the variations in the organization of American schools there have doubtless many times been approximations to the junior high school, or intermediate school, the present movement toward an equal division of the 12 years of general education between the elementary and the secondary schools seems to have been initiated by E. W. Lyttle, who at the National Education Association in 1905 argued that "secondary education should begin as soon as the elementary pupil has acquired the tools with which he may gain a higher education." Subsequent to this address the Department of Secondary Education appointed on the subject a standing committee of five, which, under Mr Lyttle and G. P. Morrison as chairman, reported to the association in 1907, 1908 and 1909. The first two reports presented arguments, both educational and economic, for the establishment of the six-year high school; the last one, after quoting from letters by prominent schoolmen who after more or less experience favored the organization, declared that "the change to a six-six division is inevitable; it is now taking place in various ways to meet local conditions."

The 1910 New York State Syllabus for Elementary Schools makes definite provision for an elementary course of six years and an intermediate course, including the seventh and eighth years.

It therefore appears that that particular movement for the reorganization of the high school course, which is variously known as the "junior school" or the "intermediate school" and which has been adopted to a greater or less extent in about forty states of the Union, had its first effective statement and its greatest impulse in the Education Department of New York State.

Although the New York State elementary syllabus for 1910 made a distinct provision for a differentiation of the elementary course beginning with the seventh grade, no report as to the extent to which such differentiation had been actually put into effect has

been called for until the present year. In the fall of 1915 each school in the University maintaining an academic department and each city and village superintendent was asked to report the number of pupils of the seventh and eighth grades, respectively, enrolled in classes in algebra, Latin, French, German and commercial geography during the school year 1914-15. A report was also requested as to the extent to which the school in each case is definitely organized to provide a differentiation of courses beginning with the seventh year. A report was received from each of the schools and superintendents from which it was requested, but as the request did not go to the ungraded rural schools, the results given below do not indicate completely the extent of the movement in the State.

The results are given in tabular form below:

SUBJECT		SEVENTH GRADE		EIGHTH GRADE	
		No. schools	No. pupils enrolled	No. schools	No. pupils enrolled
Algebra.....	Public schools.....	8	82	408	9 918
	Academies.....	2	11	25	374
	Total.....	10	93	433	10 292
Latin.....	Public schools.....	13	353	164	2 328
	Academies.....	1	6	18	201
	Total.....	14	359	182	2 529
German.....	Public schools.....	14	2 073	43	18 193
	Academies.....	15	119	19	162
	Total.....	29	2 192	62	18 355
French.....	Public schools.....	1	14	11	1 109
	Academies.....	15	192	24	220
	Total.....	16	206	35	1 329
Commercial geography.....	Public schools.....	50	2 824	119	2 815
	Academies.....	1	32	2	64
	Total.....	51	2 836	121	2 879
Commercial arithmetic.....	Public schools.....	1	4	10	142
	Academies.....	.....	.....	.....	.....
	Total.....	1	4	10	142
Biology.....	Public schools.....	.....	.....	26	282
	Academies.....	.....	.....	1	20
	Total.....	.....	.....	27	302

In the above table in the column "number of schools" each city of the State is counted as one, report being received from the superintendent rather than from the principal of the high school.

Four hundred and thirty-one different schools or cities reported some differentiation.

Most of the enrolment reported in French and in German was from the cities of New York and Buffalo. In the other subjects, the movement seems to have been distributed throughout the entire State.

The following named schools reported a definite organization of junior high schools; and a considerable number of schools reported that the organization of a junior high school is under consideration and will go into effect in the year 1916-17:

Brocton	Rochester
Cuba	Saranac Lake
Dansville	Saugerties
Dunkirk	Scarsdale
Ellenville	Solvay
Nunda	Wellsville

From what is stated above, it is clear that while little has been said about junior high schools or the organization of the high school course in New York State, such an organization is proceeding at as rapid a rate as can be expected or desired. This whole movement is still in the experimental stage and will be extended as rapidly as experiments prove it to be desirable.

### UNIVERSITY SCHOLARSHIPS

That the University scholarships have produced a marked effect is evidenced by the upward tendency of the average standing required to obtain a scholarship, as well as by the decreasing opportunity to secure an appointment from the state list. This state list is made up, in the order of standing, of those who have failed to obtain scholarships in the counties of their residence.

There are 22 names on the state list with standings of about 85 per cent. The highest standing of any pupil not appointed in the county of residence is 87.57, attained by Wales H. Brown of Washington county, who was a pupil at the Hoosick Falls High School. Four pupils in the State attained a rank of over 95 per cent; they are John H. Randall, Morris High School, New York City, 96.53; Marion J. Benedict, North Tarrytown, 96.37; Adele Townsend Dods, Mount Vernon, 95.90; Esther Kolpien, Dunkirk, 95.11. In order to be in any way sure of a scholarship it is apparent that a pupil must hereafter obtain an average standing in his course of 80 per cent or better.

In sending out the certificates of scholarship this year there was inclosed with each a letter from President Finley addressed to the

recipient of the scholarship, and an answer was requested. If there is anyone who doubts the value of these scholarships those doubts would be dispelled by reading the letters received from the students. The number of cases in which the scholarship has meant the difference between a college education and no college education is considerable and throughout the letters there breathes a spirit of gratitude to the State, coupled with an evident desire to do something to repay the State, that is certainly very significant. By means of these scholarships the State will each year be placing under recognized obligations 750 of its most eager and intelligent young people. It can not fail to be true that in after years the State will be amply repaid through the gratitude, the increased loyalty and the enlarged powers for efficiency that will result from this movement.

The following is a list of those who attained an average standing of 90 per cent or more in the competition for University scholarships. It may well be called an "honor list."

Randall, John H., Morris High School, New York.....	96.53
Benedict, Marion J., North Tarrytown High School.....	96.37
Dods, Adele T., Mount Vernon High School.....	95.90
Kolpien, Esther A., Dunkirk High School.....	95.11
Aarons, Morton J., Utica Free Academy.....	94.67
Shufro, Rachel, Erasmus Hall High School, Brooklyn.....	94.64
Orton, Malcolm F., Newtown High School, Elmhurst.....	94.56
Genn, Sadie B., Hunter College (high school department), New York	94.30
Cohen, Nathaniel B., DeWitt Clinton High School, New York.....	94.29
Verwiebe, Frank L., Masten Park High School, Buffalo.....	94.29
Deuel, Verena G., Corning Free Academy.....	94.27
Schachtel, Victor R., Morris High School, New York.....	94.24
Fraser, Cuthbert B., Technical High School, Buffalo.....	94.11
Wilson, Thomas A., Middletown High School.....	94.11
Brewer, Harold G., Spring Valley High School.....	94.09
Belden, Louise F., Fredonia Normal School.....	94.01
Flanzer, Rose, Erasmus Hall High School, Brooklyn.....	93.90
Friess, Horace L., Morris High School, New York.....	93.71
Wintringham, Andrew C., Millbrook Memorial High School.....	93.59
Goldstein, Max, Eastern District High School, New York.....	93.57
McDonnell, Frank, Erasmus Hall High School, Brooklyn.....	93.31
Todd, Robert I., New Rochelle High School.....	93.19
Keilan, Loretta, Dunkirk High School.....	93.17
Vint, Thelma, Bryant High School, New York.....	93.11
Hayner, Lucy J., Troy High School.....	93.06
Carpenter, Florence L., Wellsville High School.....	93.04
Booth, Lucy H., North High School, Syracuse.....	93.01
Weiant, Clarence W., Haverstraw High School.....	93.01
Denovsky, Samuel, Utica Free Academy.....	92.83
Philipson, Robert, Ossining High School.....	92.81

Skinner, George D., Gouverneur High School.....	92.81
Barber, Ruth J., Auburn High School.....	92.77
Bronner, Bernice S., Richfield Springs High School.....	92.77
Berls, Magdalena, Morris High School, New York.....	92.74
Magid, Morris, Erasmus Hall High School, Brooklyn.....	92.74
Morrison, Ruth A., Yonkers High School.....	92.70
Popper, Emma, Hunter College (high school department), New York	92.53
Wells, John A., Morris High School, New York.....	92.49
Mahnken, Etta Viss, Hunter College (high school department), New York .....	92.47
Bedell, Luella E., Richmond Hill High School.....	92.44
Cavart, Alphonse, Manual Training High School, Brooklyn.....	92.43
Gillett, Allen L., Shortsville High School.....	92.42
White, Marian C., Milne High School, Albany.....	92.37
Klein, Arthur, DeWitt Clinton High School, New York.....	92.29
Lambert, Constance, Mount Vernon High School.....	92.29
Blodgett, Eleanor D., Cortland Normal School.....	92.24
Rynalski, Henry K., Fredonia Normal School.....	92.23
Heertje, Jeanette, Morris High School, New York.....	92.19
Handelsman, Benjamin, Newtown High School, Elmhurst.....	92.11
Lundquist, Leo N., Lafayette High School, Buffalo.....	92.03
Shapiro, Benjamin, Utica Free Academy.....	91.97
Clapp, Lois W., Richmond Hill High School.....	91.94
White, Anna L., Walton High School.....	91.94
Buerger, Otto M., Masten Park High School, Buffalo.....	91.93
Morgan, Edwin J., Newtown High School, Elmhurst.....	91.89
Woodardm, Ruth, Glens Falls High School.....	91.84
Sayford, Margaret, Erasmus Hall High School, Brooklyn.....	91.80
Shorr, Rose, Girls High School, Brooklyn.....	91.79
Dehls, Frederick, Erasmus Hall High School, Brooklyn.....	91.77
Hickling, Susan J., Edmeston High School.....	91.74
Krakow, Louise, Hunter College (high school department), New York	91.73
Sarachan, Goodman A., East High School, Rochester.....	91.66
Jewett, Harold A., Olean High School.....	91.64
Begiebling, William C., Stuyvesant High School, New York.....	91.61
Greenberg, Samuel, Boys High School, Brooklyn.....	91.54
McClure, John H., Richmond Hill High School, Brooklyn.....	91.49
Shapiro, William E., Glens Falls High School.....	91.44
Sherwood, Penelope, Cornwall High School.....	91.46
Goldsmidt, Esther, Hunter College (high school department), New York .....	91.41
Many, Katherine I., Rensselaer High School.....	91.40
Graves, Eugene, Boys High School, Brooklyn.....	91.37
Byrne, William, Mechanicville High School.....	91.17
Štern, Israel, Bay Ridge High School.....	91.13
Rauber, Harold, Dansville High School.....	91.09
DeGraff, Myra H., Hamburg High School.....	90.97
Rosenberg, Marguerite, Hunter College (high school department), New York .....	90.94

Schmidt, Christine, Hunter College (high school department), New York.....	90.93
Funnell, Esther H., Huntington High School.....	90.91
Hockstein, Joshua, Boys High School, Brooklyn.....	90.91
Kadison, Elliot, Boys High School, Brooklyn.....	90.89
Smith, Ainsworth, Erasmus Hall High School, Brooklyn.....	90.89
Kittle, Beulah E., Ulster Academy, Kingston.....	90.87
Moscrip, Virginia, Clyde High School.....	90.84
Stellwagen, Herbert, Boys High School, Brooklyn.....	90.81
Edie, Margaret, Yonkers High School.....	90.80
McDaniel, Laura F., Patchogue High School.....	90.76
Acerboni, Alexandrine, Wadleigh High School, New York.....	90.70
Smith, Marie L., Corning Free Academy.....	90.69
Hettich, Ernest L., Boys High School, Brooklyn.....	90.67
Gilkey, Gladys F., Ithaca High School.....	90.64
Pepper, Elizabeth G., Far Rockaway High School.....	90.57
Swinnerton, Allyn C., Oneida High School.....	90.49
Cohen, Edith C., Hunter College (high school department), New York	90.47
Drake, Frederick D., Hutchison-Central High School, Buffalo.....	90.47
Carswell, Mildred, Greenwich High school.....	90.44
Work, Lincoln T., Yonkers High School.....	90.43
June, Lawrence B., Addison High School.....	90.41
Lebrecht, Ruth M., Glens Falls High School.....	90.29
Shackelton, Horace E., Hutchison-Central High School, Buffalo....	90.29
Bernknopf, Gussie, Washington Irving High School, New York....	90.27
Schwartje, Viola, Newtown High School, Elmhurst.....	90.26
Lee, Rachel, Schenectady High School.....	90.23
Sill, Elizabeth, Watertown High School.....	90.21
Ginsberg, Benjamin, Boys High School, Brooklyn.....	90.20
Blackstone, Helen, Syracuse Central High School.....	90.14
Moore, Pauline V., Hornell High School.....	90.13
Papke, William A., Boys High School, Brooklyn.....	90.16
Stickel, Jesse, Boys High School, Brooklyn.....	90.11
Schrader, Helen M., Plattsburg High School.....	90.10
Stine, George, Niagara Falls High School.....	90.09
Bengston, Otelia J., Ossining High School.....	90.07
Morganthau, Dorothy R., Far Rockaway High School.....	90.07
Hock, Anna, Hunter College (high school department), New York..	90.04
Olesker, Max, Eastern District High School, Brooklyn.....	90.01
Zeitchek, Augusta, Wadleigh High School, New York.....	90.01
Towle, Florence W., Curtis High School, New York.....	90.

In accordance with the provisions of the statute, the list of high school pupils who became entitled to college entrance diplomas during the school year 1914-15, who were therefore eligible to University scholarship appointments, was completed and published during the last week of August 1915. In all but three of the counties of the State, there was a sufficient number of eligible candidates to fill the quotas for these counties. Five appointments were made from the state list to fill vacancies in counties where

there were not enough resident candidates to fill the appointments. Two such appointments were made for Essex county, one for Lewis county, and two for Putnam county.

The total number of persons eligible for these appointments in each county, classified by the standings attained, together with a statement of the highest and lowest standings of those appointed from each county, is shown in the following table:

COUNTY	95+	90-95	85-90	80-85	75-80	70-75	70	Total	Highest and lowest stand-ings of those appointed
Albany.....	....	I	8	10	13	10	2	44	92.37-82.19
Allegany.....	....	I	....	2	2	2	....	7	93.04-75.54
Broome.....	....	....	I	6	8	4	2	21	87.71-82.34

The following is a complete list of appointments by counties, giving the name and address of the appointee, the name of the school in which he was prepared, the standing attained and the college selected.

### University Scholarship List, 1915

#### Albany county — 15 scholarships

NO.	NAME	PER CENT	HIGH SCHOOL	ADDRESS	COLLEGE
1	White, Marion C.....	92.37	N. Y. S. C. T...	Albany.....	N. Y. S. C. T.
2	Hendrickson, Judson G....	88.36	Egberts.....	Cohoes.....	Rochester
3	Miscall, Leonard.....	88.26	Albany.....	Albany.....	Cornell
4	Deitz, Fordyce C.....	86.69	Albany.....	Berne.....	Cornell
5	Hannan, Emily T.....	86.56	St Pat. Ac.....	Watervliet....	New Rochelle
6	Gallup, Theodore L.....	86.39	Albany.....	Albany.....	Columbia
7	Shirtz, Margaret A.....	85.93	N. Y. S. C. T...	Albany.....	N. Y. S. C. T.
8	Gardner, Marion.....	85.41	Altamont.....	Altamont.....	N. Y. S. C. T.
9	Roberts, Dorothy.....	85.19	Albany.....	Albany.....	N. Y. S. C. T.
10	Dennin, Agnes D.....	84.30	Albany.....	Albany.....	N. Y. S. C. T.
11	Hinkelman, Dorothy M...	84.09	Albany.....	Albany.....	N. Y. S. C. T.
12	Connors, James L.....	82.36	Albany.....	Albany.....	N. Y. S. C. T.
13	Cook, Elizabeth R.....	82.34	Albany.....	Albany.....	Cornell
14	Lipes, Caroline E.....	82.23	N. Y. S. C. T...	Albany.....	N. Y. S. C. T.
15	Whitney, H. Erwin.....	82.19	N. Y. S. C. T...	Albany.....	N. Y. S. C. T.

#### Allegany county — 5 scholarships

1	Carpenter, Florence L.....	93.04	Wellsville.....	Wellsville.....	Vassar
2	Buch, Cornelia C.....	82.11	Wellsville.....	Wellsville.....	N. Y. S. C. T.
3	Haines, Louis B.....	81.80	Cuba.....	Cuba.....	Syracuse
4	Ford, Mary E.....	76.31	Belfast.....	Belfast.....	Cornell
6	Black, Myra E.....	73.07	Portville.....	Belmont.....	William Smith

#### Broome county — 5 scholarships

1	Benson, Carl S.....	87.71	Binghamton....	Binghamton..	Colgate
2	Smith, Iva E.....	84.66	Binghamton....	Binghamton..	Vassar
3	Keeler, Charles A.....	82.76	Binghamton....	Binghamton..	Hamilton
4	Sullivan, William L.....	82.60	Binghamton....	Binghamton..	Cornell
5	MacLean, Crandall D.....	82.34	Binghamton....	Binghamton..	Cornell

#### Cattaraugus county — 5 scholarships

1	Jewett, Harold A.....	91.64	Olean.....	Olean.....	Cornell
2	Bliss, Grace H.....	88.24	Salamanca.....	Salamanca....	St Lawrence
4	McCluer, John W. H.....	84.67	Ten Broeck.....	Franklinville..	Cornell
5	Corsett, Ellen A.....	84.19	Olean.....	Olean.....	Syracuse
7	Corsett, Annabelle.....	83.44	Olean.....	Olean.....	Syracuse

#### Cayuga county — 5 scholarships

1	Barber, Ruth J.....	92.77	Auburn.....	Auburn.....	Wells
2	Moore, Harold H.....	89.26	Auburn.....	Auburn.....	Cornell
4	Lewis, Florence.....	84.46	Auburn.....	Auburn.....	Elmira
8	Jennings, Carlton W.....	82.90	Moravia.....	Moravia.....	Cornell
13	Blumberg, Gabriel M.....	79.86	Auburn.....	Auburn.....	Syracuse

#### Chautauqua county — 10 scholarships

1	Kolpien, Esther A.....	95.11	Dunkirk.....	Dunkirk.....	Syracuse
2	Belden, Louise F.....	94.01	Fredonia N. S...	Fredonia.....	Cornell
3	Keilen, Loretta.....	93.17	Dunkirk.....	Dunkirk.....	Syracuse
4	Rynalski, Henryk.....	92.23	Fredonia N. S...	Fredonia.....	Cornell
5	Creal, Harold L.....	89.80	Jamestown.....	Jamestown...	Cornell
6	Bennett, Clifford S.....	88.34	Dunkirk.....	Dunkirk.....	Syracuse
7	Lindbeck, C. Otto E.....	88.24	Jamestown.....	Jamestown...	Syracuse
11	Wallace, Fred M.....	84.37	Westfield.....	Westfield.....	Rochester
12	Aldrich, Nathan E.....	84.90	Fredonia N. S...	Fredonia.....	Syracuse
14	Drake, Russel R.....	83.64	Dunkirk.....	Dunkirk.....	Cornell

University Scholarship List, 1915 (*continued*)

## Chemung county — 5 scholarships

NO.	NAME	PER CENT	HIGH SCHOOL	ADDRESS	COLLEGE
1	Bowman, Florence A.....	86.69	Elmira.....	Elmira.....	Elmira
2	Decker, Ford P.....	86.17	Elmira.....	Elmira.....	Cornell
3	Mason, Marjorie.....	85.26	Elmira.....	Elmira.....	Elmira
4	Zimmerman, Helen F.....	85.23	Elmira.....	Elmira.....	Elmira
5	Fanning, Winifred A.....	84.37	Elmira.....	Elmira.....	Elmira

## Chenango county — 5 scholarships

1	Whitman, Samuel C.....	84.58	Afton.....	Afton.....	Cornell
2	Smith, Turner L.....	81.98	Oxford.....	Oxford.....	R. P. I.
4	Christensen, Eiler.....	78.40	Norwich.....	Norwich.....	Cornell
5	Pierce, Fay Neary.....	77.90	DeRuyter.....	Lincklaen Center.....	Syracuse
6	Reynolds, Gerald F.....	77.50	South Otselic...	South Otselic..	Cornell

## Clinton county — 5 scholarships

1	Schrader, Helen M.....	90.10	Plattsburg.....	Plattsburg....	Cornell
3	Keet, Julia M.....	86.57	Plattsburg.....	Schuyler Falls.	Cornell
6	Gimbard, Ruth L.....	84.13	Plattsburg.....	Plattsburg....	Vassar
7	Bateman, Margaret L.....	80.33	Champlain.....	Champlain....	Cornell
9	Sartwell, Myrtle M.....	79.84	Mooers.....	Mooers.....	N. Y. S. C. T.

## Columbia county — 5 scholarships

2	Winslow, Lora V.....	81.80	Chatham.....	Chatham.....	Hunter
3	Rorabeck, Mildred R.....	80.69	Valatie.....	Kinderhook...	Cornell
4	Tubbs, Marion T.....	76.99	Chatham.....	Chatham.....	N. Y. S. C. T.
7	Kline, Arnold M.....	75.24	Hudson.....	Hudson.....	Cornell
8	Studley, Mary A.....	74.63	Hudson.....	Claverack....	N. Y. S. C. T.

## Cortland county — 5 scholarships

2	Adams, Bertha M.....	87.49	Cortland.....	Cortland.....	Syracuse
3	Walrad, Alfred A.....	85.43	Cortland.....	Cortland.....	Colgate
4	Pettet, Hazel L.....	85.10	Cortland.....	Cortland.....	Syracuse
7	Schouten, Beatrice A.....	79.73	Cortland.....	Cortland.....	Syracuse
9	Reider, Joseph R.....	75.56	Cortland.....	Cortland.....	Cornell

## Delaware county — 5 scholarships

1	White, Anna L.....	91.94	Walton.....	Walton.....	Cornell
3	Davis, Alfred H.....	86.67	Walton.....	Walton.....	Cornell
4	Bell, Elizabeth W.....	85.81	Deposit.....	Deposit.....	Vassar
5	DeMott, G. Lynn.....	84.01	Deposit.....	Deposit.....	Syracuse
6	Wood, Henry L.....	82.27	Walton.....	Woodford....	N. Y. S. C. T.

## Dutchess county — 10 scholarships

1	Wintringham, Andrews C..	93.59	Millbrook.....	Millbrook....	Cornell
2	Stein, Joseph.....	89.94	Poughkeepsie...	Poughkeepsie..	C. C. N. Y.
3	Neal, Margery A.....	89.53	Millbrook.....	Millbrook....	N. Y. S. C. T.
4	Peterson, Anna H. B.....	86.33	Poughkeepsie...	Poughkeepsie..	Vassar
5	Palmer, Helen C.....	84.81	Poughkeepsie...	Poughkeepsie..	Vassar
6	Burns, Cornelia.....	84.36	Poughkeepsie...	Stanfordville..	Vassar
7	Acker, Leonard.....	83.70	Poughkeepsie...	Poughkeepsie..	Cornell
8	Haight, Dorothy M.....	83.49	Millbrook.....	Millbrook....	Vassar
9	Rockmore, Alexander.....	82.60	Rhinebeck.....	Rhinebeck....	Cornell
10	Shirley, Daniel L.....	81.86	Poughkeepsie...	Arlington.....	Hamilton

## Erie county — 45 scholarships

1	Verwiebe, Frank L.....	94.29	Masten Park....	Buffalo.....	Cornell
2	Fraser, Cuthbert B.....	94.11	Technical.....	Buffalo.....	Cornell
3	Lundquist, Leo N.....	92.03	Lafayette.....	Buffalo.....	William Smith
6	Drake, Frederick Dalton..	90.47	Hutch.-Cen.....	Buffalo.....	Cornell
7	Shackelton, Horace E.....	90.29	Hutch.-Cen.....	Buffalo.....	Cornell
8	Darby, Ruth.....	89.47	Lafayette.....	Buffalo.....	Vassar
9	Huestis, Thomas B.....	89.40	Lafayette.....	Buffalo.....	Cornell
11	Siebert, Clara A.....	89.23	East Aurora....	East Aurora..	N. Y. S. C. T.
12	Turk, Richard J., jr.....	88.94	Lafayette.....	Buffalo.....	Columbia
13	Adrianos, James.....	88.89	Lafayette.....	Buffalo.....	Syracuse
14	Nill, Frederick.....	88.84	Hutch.-Cen.....	Buffalo.....	Cornell
18	Kies, Helen B.....	86.89	Griffith Inst....	Springville....	Cornell

## EXAMINATIONS AND INSPECTION

Although the law and the Regents rules have always provided that institutions of the University were under the inspection of the Regents, the first appointment of salaried officials to do this inspecting was not made until 1890, when two inspectors were appointed. As a result of complications with the Civil Service Commission, the position was abolished in 1901.

In June 1892, one inspector was appointed in accordance with civil service rules and subsequently others were added to the list. In 1893 the work of inspection was first regularly organized as a separate division in the Regents office. In the Regents report for 1893 will be found a statement of the aims and purposes of the inspection, with a description of the organization then perfected. In this report it is stated:

While the strong opinion as to the practical value of inspection has been steadily confirmed by experience and consultation, it has yet been looked on merely as something very desirable to be done as fast as competent men could do it. . . . Recent action seems to have solved this difficulty by making it an independent division of the executive department, responsible for a written report based on personal inspection of every institution in the University at least once each year. The burden is chiefly in the academic field, which comprises about 80 per cent of the University membership, but it is just here that service is most needed. This is now the inspectors' chief duty, and they assist in examination and other work only as there is opportunity on Saturdays and in school vacations. . . . Friday night before the last Saturday of each month all inspectors are to meet with the office staff for comparison of notes and consultation on University interests, thus keeping each group of workers closely in touch with the other.

Besides his general work each inspector will have a specialty on which he will do extra work and make himself an authority. . . . Each specialist of course makes a general inspection and reports on all features of the school, emphasizing most the topics which are his particular care, but making it a point to call his associates' attention to any marked need in their special fields.

As an important aid in judging fairly, each inspector gives some time in the office to studying the written work sent in by the schools he has been visiting [that is, examination papers] and also serves on the question board so that new questions may be made with the benefit of his experience and the criticisms received from teachers and students.

Attention was also called to the fact that the inspectors had served extensively in conducting teachers institutes and in taking part in educational meetings generally.

In the reorganization of the Education Department in 1904, the work of inspection was less closely affiliated with the examination work and less emphasis was placed on the feature of special inspec-

tion. This continued until 1915 when the Inspections Division was consolidated with the Examinations Division.

The present plans and purposes in the new division, which, as will be seen, is in large measure a return to the original plan of organization, is set forth in the following statement prepared by the Chief of the Examinations Division:

During the school year covered by this report, effort was made by the Department more closely to correlate the examinations system with the inspection of schools by the transfer of the field staff from the Inspections Division to the Examinations Division. The Division having charge of these newly coordinated activities of the Department is given the title of "Examinations and Inspections"; the head of the Division is given the title of "Director," and an "Assistant for Field Work" is provided to supervise the work of visitation and inspection. This report, therefore, will attempt simply to present some of the considerations which led to this reorganization and some of the plans contemplated. This end may be briefly accomplished by consideration of these three questions.

1 How is the work of our field staff logically and inseparably associated with the administration of our examination system?

2 What is the place of our examination system in our educational scheme in this State and how does the visitation and inspection of schools naturally spring out of the results of examinations?

3 What is our problem of field work and what are the present plans for its prosecution?

### **Association of the Field Staff with the Administration of the Examinations**

In order to see clearly how inseparably the work of the field staff is associated with the administration of the examination system, we must turn for the moment to the conspicuous action of the Regents of June 28, 1906 in the establishment of the New York State Examinations Board. In the words of Commissioner Draper, it was then deemed desirable "that something should be done to bind our system of preliminary and academic examinations and our system of schools more closely together and to make the examinations more expressive of the feeling and more promotive of the progress of the schools." The Examinations Board, instituted with such high purpose in 1906, representing in its personnel the elementary schools, the secondary schools and the colleges, has happily

come to be in actual practice the concentrated voice of the teachers of the State in initiating changes in our courses of study and in determining the form, scope, content and underlying principles of our examinations.

It was at once apparent in the central office, when the Examinations Board took up its duties, that some one person in the Department staff should be charged with immediate responsibility in relating the examinations in each group of subjects to the whole scheme of administration and in being equipped and ready to offer expert advice within his group to the Examinations Board, to the Department and to the schools. It was therefore provided that one qualified representative of the field staff should be designated as an inspector in each group of subjects, and that he should serve on the committee named by the Examinations Board to prepare the question papers in his subjects for the Regents examinations. It was later determined that the inspector should also sit with the revision committee during the final consideration of the question papers originally prepared by his committee. This service of an expert, in intimate touch with the daily work of teachers and pupils, on an original question committee and in consultation with the final revision committee, was calculated to make sure, in the first place, that the questions should be prepared within the scope of the syllabus and in accordance with Department regulations, and, in the second place, to make sure that changes should not be introduced into the question papers under revision which should conflict with approved methods of teaching throughout the State or set up standards impossible of attainment by boys and girls of high school age.

It has gradually and logically come about, therefore, that each specialist in the field staff bears intimate relations to the administration of our examinations system in certain definite respects, as follows:

- 1 By serving upon the original question committee which prepares the question papers in his field.
- 2 By representing his original committee before the committee on final revision.
- 3 By assuming immediate direction of the Department rating of the answer papers in his group.
- 4 By determining what papers in his group shall be accepted at school ratings.
- 5 By personal and final consideration of all appealed papers in his group.

6 By the preparation from time to time of suggestions to teachers upon the rating of papers, to the end that the unavoidably vexing differences of judgment between the schools and the central office may be reduced to the lowest possible minimum.

7 By continuous study of the tendencies in teaching springing from the character of the examinations, to the end that the examinations may constantly promote, and in no way hinder, individual initiative on the part of teachers and pedagogically sound teaching in all the schools.

In centering the functions of examining and inspecting in one office, the Regents and the President of the University have thus not taken radical action but have simply accommodated the departmental organization to the gradually developing needs of the service. The change in the title of "inspector" to that of specialist" was made advisedly for two reasons: (1) to avoid the possible suggestions that the service of an "inspector" is merely that of a sort of police officer engaged in the enforcement of mandatory education statutes, since the Department has always conceived the investigations of its field staff into the organization of schools and into methods of teaching of first importance; (2) to emphasize in the employment of the term "specialist" the Department's determination to maintain a corps of experts who shall be able in every group of subjects in the curriculum to vitalize its work in the schools and to be of genuine service to teachers in all classes of schools. The term "specialist" is of course subject to possible misinterpretation also. It must be understood that the Department does not expect a specialist to be a narrowly trained man of one idea. It does not expect a specialist necessarily to be a different order of being from an inspector. It does expect that he will be a liberally educated man with successful experience in teaching and in supervising teaching and with a predilection for intensive study in some group of subjects which will naturally make him a leader in his chosen field. These considerations have entered into the present designation of specialists in the field staff, and they will unquestionably govern the enrichment and enlargement of the staff in the future.

### Examinations the Starting Point of Inspections

The second inquiry is this: What is the significance of our examinations in our educational scheme in this State, with which this body of field experts has so intimate a relation, and how does the visitation and inspection of the schools naturally spring out of

the results of our examinations? Our examinations exist for two fundamental purposes: (1) to provide a basis for the issuance of credentials to students; (2) to set up minimum standards in the schools and to give the State a definite means of gauging the character and quality of school work.

The first and incidental purpose of the examinations in setting up a kind of educational exchange in the certification of students may be said to be crystallized in our procedure. The extent to which the records of our Regents examinations are negotiable in our State, in other states, and in foreign countries is evidence enough of the fact that the methods by which this first purpose is realized have fitted harmoniously into the work of the schools and may be expected to prevail indefinitely along the lines now so firmly established.

It is in the fuller accomplishment of the second and larger purpose of the examinations that the Regents and the President of the University now seek more closely to correlate the functions of examining and inspecting. This larger underlying purpose has never been fully realized. We have not yet appreciated the possibilities of the usefulness of our examinations as means of affording help to teachers and schools. Is it not true that our unique examination system is the backbone of our educational scheme in this State? Do not our examinations, both preliminary and academic, for better or for worse, determine to a very large extent what we shall teach and how we shall teach? Do they not have an appreciable controlling influence upon the organization of our schools, upon the promotion of our pupils, and even upon the selection and promotion of our teachers? Do they not serve as the chief characterizing basis of New York's educational system in the eyes of educators? Is not our educational place among our sister states fixed by our use, and our misuse, of our examination system? One must unhesitatingly answer these questions in the affirmative, no matter whether he believes that centrally administered examinations should be accepted or rejected, be eliminated or extended, be regarded as the fundamental or the incidental purpose of teaching.

All these obvious considerations are presented simply to emphasize the fact that all our plans looking to better teaching, wiser school administration, and more purposeful visitation of schools are naturally predicated upon the place our examinations occupy in our educational system. The work of the Department is not by any means half done in any one year when the papers are rated

and the credentials issued. "It is a profitless task," to use President Finley's words, "to record results of poor teaching and unwise administration, year after year, unless decisive steps are taken to help the schools to provide better teaching and to institute sounder administrative methods." It is our express purpose to study the results of examinations and through visitations to trace those results, be they good or bad, to their sources in the schools.

### Field Work Problems and Plans

My final inquiry has to do with the character of the problems confronting the Department in its efforts to supplement examinations by personal visitation of schools and with plans which are being undertaken to that end for the ensuing year.

The extent of the task before the field staff may be understood by noting that there are subject to the visitation of the Department 950 approved secondary schools with their accompanying and outlying elementary schools. Of this number, 744 are public secondary schools and 206 are private academies. The public schools are divided as follows: 91 city high schools in 56 cities; 41 village high schools in 40 villages; 408 high schools in union free school districts; 110 senior schools, 35 middle schools and 59 junior schools in union free school districts. In addition to these schools there are 113 training classes subject to regular visitation. No reference in detail need be made in this connection to the multitude of duties that fall to the field staff in other institutions registered by or seeking admission to the University.

The field work in the schools to which our attention is addressed is naturally divided into what we choose in the Department to call general and special inspection, general inspection having to do with all the problems of organization, equipment and teaching in a whole school system of whatever size, and special inspection having to do primarily with the teaching in a particular subject or group of subjects. General inspection is of course desirable upon any ordinary visit to the smaller schools and is possible in larger school systems at rare intervals only. The opportunity for special inspection lies more often in the larger schools where the departmental organization prevails and where specially trained teachers are employed.

The problem of the constructive work which it is possible and desirable to undertake in the senior, middle and junior schools, and in the smaller union high schools is, of course, quite different

from that in the larger union schools and in the high schools in villages and cities. For the first half of the year the field staff will mainly undertake to discover ways of being of service in the union free schools outside of the villages and cities. By the first of March it is hoped that every one of these schools will have been visited and that plans will have been made for a second visit to many of them later in the year. There were 175 changes in principalships in our public secondary schools last year, and these changes were mainly in the smaller schools that are now being visited. Many of these smaller schools are in a special sense the wards of the State, because with their frequent changes in management, and in entire teaching force as well, no continuing local policy is possible. If their work is to be carried on coherently from year to year, and if plans which have in them the elements of educational growth are to be carried out, it must be through the immediate helpfulness of the field staff of the Department.

An inquiry by the Department into the work of one of these smaller schools, or into the work of any single school for that matter, needs to be from the ground up. We can not be of much service to a principal simply by passing the time of day with him. The State has no business to send a representative into the schools, who is not ready and willing to be of service and who is not capable of rendering service. The representative who goes into them need not be a specialist in this subject or that, but, like the country physician who treats a multitude of ills, he must be an accomplished general practitioner. He must know the courses of study, elementary and academic; he must know the ideals and aspirations of the leading teachers of the State; he must know how to organize a school, how to lay out a program, how to conduct a recitation, and how to watch a recitation politely, kindly and sympathetically. He must know how to correct without reproof, how to advise without complaining, and how to praise without flattering. He must know the requirements of the mandatory statutes; he must know good housing from bad; he must know how and where to provide for library and laboratory. He must know human nature well enough and be trained keenly enough in a sensible diplomacy to be able to convince principals and teachers that he means at all times to help; and he must have enough iron in his constitution, when occasion demands, to deal straightforwardly with a recalcitrant school board. In short, he must use his common sense quite as much as his erudition.

After the specialist, in his capacity of general practitioner, has studied the small school from every angle, has noted its equipment, its organization, the quality of its teaching, the educational needs and the financial resources of its community, and the particular problems peculiar to its community, and after he has done all in his power in the way of kindly advice and suggestion, it is often necessary for the central office to take up with the board of education the vital questions underlying the making of a better school. What some of the questions are which become the subject of Department action may be understood from these extracts from the field notes of specialists:

—————School. Notwithstanding the fact that this is a junior school, supposed to maintain very little if any more than one year of academic work, a full two-year course is being conducted and one third-year subject in addition, with nine academic pupils. The principal is attempting to teach fourteen different subjects as follows: eighth grade arithmetic, eighth grade physiology, elementary United States history, elementary algebra, biology, ancient history, English history, Latin 1 and 2, German 1 and 2 and drawing.

—————School. Teaching force not adequate; grades 1-3, one teacher, 41 pupils; grades 4-6, one teacher, 34 pupils; grades 7-8 and four years of academic work, three teachers, 70 pupils. Net force for academic work is two teachers, each having nine classes daily. Relief not likely to come soon. The school, village and town, county and state taxes are already regarded as burdensome and all that the people will stand. Assessed valuation of property in district about \$285,000.

We can not take the "decisive steps" which President Finley so frankly tells us are necessary if we complacently spread such reports upon the records of the Department and quietly await the coming of a happier day. We must in many such cases carry the State's authority along with its advice. The Department is now in correspondence with upwards of a hundred boards of education touching matters of vital concern springing out of the reports of the field staff. Here are two specimen letters indicating what we are trying to do:

To

Mr —————

*President, Board of Education*

DEAR SIR:

In the report of his recent visit to the ————— Union School Mr —————, a Department representative, speaks of the progressive spirit of your community as shown in your school building, which is exceptionally modern in its appointments for a village of the size of —————, and states that, in his opinion, the instruction given in your school is generally better than was given last year.

He calls attention, however, to the fact that your two upper grade and academic teachers are doing more work than they can reasonably be expected to do thoroughly well. This fact, he says, is further shown by the records of recent Regents examinations. No teacher can be expected to give instruction to more than a limited number of classes and do her work successfully. The Regents records indicate that last year was an unfortunate one in your school. If it can be in any way avoided, you can hardly afford to have another such year.

It is apparent that you should either curtail the amount of academic work offered or secure an additional teacher. Mr. \_\_\_\_\_ recommends that an additional teacher be secured for next year. The writer ventures to hope that you will not wait until that time. The children in your district deserve more adequate instruction than it is possible for your teachers to give as long as they teach as many classes as they now do. The Department hopes that you will see your way clear to make an adjustment of this matter in the near future. Let me hear from you soon.

To

Mr. \_\_\_\_\_

*Principal, High School*

MY DEAR MR. \_\_\_\_\_

In the report of his recent visit to the \_\_\_\_\_ High School, Mr. \_\_\_\_\_, a Department representative, calls attention to the fact that four academic and two eighth grade classes in your school have registrations so large as to make effective work almost impossible. He states that he would recommend the hiring of an additional teacher were it not for the fact that there would be no room available for her use.

Before calling to the attention of your school board your apparent need of enlarged quarters, I wish to secure from you some information regarding certain points raised by a study of your academic program. The number of classes instructed by each teacher in your academic department is not large. It appears that you teach three classes, Miss \_\_\_\_\_ four, Miss \_\_\_\_\_ and Miss \_\_\_\_\_ five each. If, as is apparently the case, the phrase "In charge" indicates that the various teachers have charge of your study hall at the periods mentioned, there are six periods given to this work. In place of having as you do at present several academic classes with a registration of over fifty pupils each, would it not be better to divide these large classes, giving each of the four teachers named an additional class and arrange to have the new divisions thus formed recite, if necessary, in the study hall. I recognize the fact that this will increase the amount of work for each teacher and that it is not always pleasant to teach in a study hall with other pupils present. The fact remains, however, that in many village schools of the size of yours, if not, indeed, in the average school, each teacher is asked to instruct as many as six classes and that the practice of conducting classes in study halls is a very common one. Many of the large new high school buildings are constructed so as to require the teaching of a large proportion of classes in study halls. For the sake of the pupils now probably receiving inadequate instruction in the large divisions mentioned, I feel sure that you will be willing to make the readjustment suggested unless there is some obstacle with which I am at present unacquainted. May I hear from you soon?

Here are two answers indicating to some degree the response which may be expected from boards of education:

I know that you will be pleased to know that we have engaged the additional teacher for the \_\_\_\_\_ High School, according to your suggestion, and that she has been teaching for several days now. I should have written you before but have been away for several days. We will be pleased to have you visit our school as often as convenient for you, and hope you will find everything O. K.

Yours very truly

\_\_\_\_\_  
*President, Board of Education*

To

Mr \_\_\_\_\_  
*Albany, N. Y.*

MY DEAR MR \_\_\_\_\_

I thank you for sending me Mr \_\_\_\_\_'s letter in reply to my letter of November 24th. Our views are essentially not very divergent. My feelings about Mr \_\_\_\_\_'s report was that it was negative and seemed to take no note of what had been accomplished. But perhaps that makes it of greater value to us. We appreciate Mr \_\_\_\_\_'s constructive suggestions and are making use of them. That, after all, is the important thing.

However much my views may differ from those of the Department at times, be assured that I should consider it absurd to look on their criticisms and suggestions as anything but friendly and for the good of the school. I wish we could have more visits from men competent to pass judgment on our work and methods and offer constructive criticism.

Such, in brief, is the never ending problem before the Department in its field work in the smaller schools.

We find a field for what I have called special inspection in the more stably organized schools. In the larger union schools and in the high schools in the villages and cities, where questions of school administration are in the main matters of settled policy, the Department specialists find wider opportunity to aid teachers in their several groups of subjects. It is here that the capacity of the field staff is put to its test, and it is here where its service, if it is to be worth while, must be of the most significance. A body of trained men, each of whom is doing intensive work in a limited field, observing in the course of a year or two the best and the worst teaching in the State, must become in time a clearing house from which teachers who seek help may get inspiration and may find out what other successful teachers are doing. There are many schools thoroughly well organized, with trained and experienced teachers, where we can not be of special service but where we can get help and carry suggestions to others. All that is best it is the business of the State to distribute as widely and as generously as it may.

The specialists in modern languages and in commercial subjects are giving their entire time to the observation of the work of special teachers and to conferences with such teachers. The specialists in English, history, ancient languages, mathematics, physical and biologic science will devote the greater part of the second half of the ensuing year to such work. We can hardly meet in any one year all the requests that come in for general inspection. With the hope of reaching a large number of teachers through such procedure, conferences will be held in the second half of the year, beginning about the first of March, at places to be announced. Teachers from the surrounding neighborhood will be invited to meet the Department specialists, to discuss with them not only the multitude of incidental questions touching the administration of the examinations but also the larger questions dealing with the content of courses and with methods of instruction. There will be no papers presented or addresses delivered. The conferences will be wholly informal and in the nature of round table discussions. It is very much desired that principals will encourage their teachers to attend and will help the conferences by their own presence whenever possible. So far as is practicable, between the dates of the conferences, the specialists will visit in their own schools the teachers who attend them. If the plan meets with favor and seems to be productive of good, it will probably be extended next year so as to give every high school teacher in the State one opportunity at least within the year to join a conference of fellow teachers in the informal discussion of subjects of mutual interest under the guidance of a Department specialist. It is not to be supposed, because the field problem differs between the smaller and larger schools, that all poor teaching is in the smaller schools or that all good teaching is in the larger schools. Such an assumption would be far from the truth. It is of course true that the larger schools are in the main more fortunate in securing trained teachers and in being possessed of all the material things which go so far in the maintenance of a good school; but instances are not lacking of poor school organization and weak teaching in our larger centers, and of most excellent results in many of our smaller centers where the spirit makes up for the weakness of the exchequer.

It will not be inferred, moreover, I hope, from anything I have said about the identity of the field staff with the making of our examinations, or about the employment of the examinations as the initial basis of field work, that there is any disposition in the

Department to glorify or to extend our examinations. There is the firm conviction that our examination system in one form or another will remain the structural framework of our state educational system, and that, conscious of the attendant evils of any statewide examination system, we must be on guard to control and to supplement it with an intelligently planned and forcefully executed system of school visitation. Moreover, there is a strong feeling in the Department that our examinations should be so guarded as not to prevent individual initiative on the part of teachers or schools and that some way must be found to give due recognition to the special courses which do not lend themselves to the state examinations but which do fit into the needs of a community. In other words, our examination system must keep up with the progress of the schools and must give way at any point where it halts progress. It is true that the full burden of proof is upon the teacher, or upon the school, that would set up his own course as better than that chosen by the common thinking of the best teachers of the State, but it is not to be conceived that such a teacher or such a school may not arise. The State must not undertake to set up a monopoly of method.

The broad state policy and the spirit back of all these considerations was voiced by President Finley in a letter to the superintendents and principals, already alluded to, and I bring this necessarily brief account of the Department's efforts to correlate its examining and its field work to a conclusion by a quotation from President Finley's letter in which he epitomizes the work that is being undertaken:

The far-reaching possibilities of this change in administrative procedure are quite apparent. Our great examination system, exercising the large influence it inevitably does upon the teaching in the schools, can hardly accomplish its fundamental purposes until it carries back to the schools after each examination, helpful advice and suggestions as to how weaknesses in teaching and in administration, revealed by the examinations, may be remedied. Effort is now deliberately to be made to correlate the work of examinations and inspections so as to have examinations bring to light the help which individual schools need and to have the specialists carry that help back to the schools. It is a profitless task to record results of poor teaching and unwise administration, year after year, unless decisive steps are taken to help the schools to provide better teaching and to institute sounder administrative methods.

It is of the utmost importance, therefore, that the University maintain a force of trained specialists in each group of subjects so as to be able to carry to individual schools the cumulative experience of trained teachers the country over and the collective wisdom which a large central office,

instituted upon a professional basis, must possess if it is to justify its existence. There must be a group of experts, each with immediate responsibility in a limited field and prepared not only to present to teachers sound methods of teaching but also by the depth of their scholarship, the force of their character and the breadth of their human sympathy, to inspire teachers and pupils alike with new zeal in their work. Such a faculty will take large note of the existence and the administration of our examination system and of its desirable and necessary continuance; but will at the same time hold clearly before the teachers of the entire State the patent fact, which many of them at times strangely overlook, that the primary business of the schools is *teaching* and not *examining*.

## VISUAL INSTRUCTION THROUGH LANTERN SLIDES

The following figures for the school year 1914-15 represent the first attempt to show the distribution of loans of slides to different classes of institutions using the collection of the Visual Instruction Division. In some cases because of incompleteness or uncertainty of records the figures are only approximately correct.

*Normal schools.* Of the eleven state institutions devoted to the training of teachers, 10 borrowed 5603 slides, an average of 560. All have lantern equipment.

*Cities.* Of the 58 public school systems in cities, 41, having 252 lanterns, borrowed 36,766 slides, an average of 897. Fourteen, having 20 lanterns, did not borrow any. For 3 additional systems borrowing no slides, no record of lanterns is available.

*Villages with a superintendent.* There were 42 systems of schools in villages of 5000 or more inhabitants employing a superintendent. Of these, 23, having 42 lanterns, borrowed 8787 slides, an average of 382. Eleven villages, having 15 lanterns, borrowed no slides. For the other 8, no definite information is at hand as to equipment.

*Villages without a superintendent.* There were 610 such village schools maintaining a high school department. Of these, 199 borrowed 90,618 slides, an average of 455. The total number of lanterns reported for this class was 259. Ninety-six had lanterns but borrowed no slides and presumably did not make use of the projection apparatus owned. One hundred thirteen had a day current of electricity available but, so far as the record goes, had no lantern. A few of them used acetylene quite regularly but probably most of them were not taking advantage of their opportunities to provide lantern equipment. For 202 villages, mostly of small population and rural in character, there was no report of electricity available or of lanterns. Obviously these schools could not undertake instruction through the use of the lantern except by means of some weak and relatively unsatisfactory illuminant.

*Private academies.* Of the 206 registered academies, 21 reported lanterns and borrowed 9824, an average of 468. Fifteen reported a day current of electricity available but had no lantern. Doubtless a number of others had electricity available, but no report was obtained. Twenty-eight reported lantern equipment, but borrowed no slides. The proportion of academies borrowing was the smallest of any class.

*Common school districts.* An increasingly large number of strictly rural communities are making the school a center of community activity and are using the lantern with either electricity or acetylene as an illuminant. Where the schoolhouse is not used as the meeting place, slides are borrowed for use in the local grange or church. Several district superintendents have used the lantern successfully as a means of interesting the people of a school and the general welfare of the community. A few rural schools were able to use the lantern for classroom work. Loans of 11,224 slides were made for such rural community use.

*Higher and special institutions.* The number of available slides adapted for use in colleges and universities is comparatively small, but loans were made to such institutions to the extent of 1541 slides.

*Libraries.* The calls for slides for use by study clubs, churches and various other local organizations are constantly increasing. It is impracticable for administrative reasons to make loans directly to such organizations. It would involve the distribution of more catalogs than can be supplied and a very large amount of correspondence that can be avoided. It seems much better to have some registered institution in each community, the public library if there is one, otherwise the public school, act as a distributing center for the accommodation of individuals and local organizations.

Although this plan has been in force only a short time, 47 registered libraries borrowed during the year 18,573 slides, an average of 395.

*Other institutions.* Certain institutions and organizations not chartered or registered by the Regents were specially registered by the Visual Instruction Division. There were 97 of these borrowing 25,324 slides, an average of 261. It is purposed to direct such bodies more and more to the local public libraries as the most suitable channel through which to obtain the state slides.

*Summary*

10 normal schools borrowed .....	5 603
41 city schools borrowed .....	36 766
23 villages with superintendents borrowed .....	8 787
199 villages without superintendents borrowed .....	90 618
21 private academies borrowed .....	9 824
51 common district schools and district superintendents borrowed	11 224
9 chartered higher and special institutions borrowed.....	1 541
47 libraries borrowed .....	18 573
97 specially registered institutions and organizations borrowed..	25 324

498

208 260

It is a very conservative estimate to say that the slides sent out are seen and, to some extent at least, studied on the average by 100 persons. The use of the state collection is therefore represented by the equivalent of 20,000,000 slides observed by one person.

In judging the extent of the use of the slides provided by the State, consideration must be taken of the fact that only three years have passed during which a new collection could be made to take the place of the one lost by fire in 1911. The range of subjects covered by the new collection is as yet very small. It is also but recently that an attempt has been made to collect and organize slides and prints with special reference to the school course. In view of these facts and the further fact that educational institutions must provide special apparatus for this work and become familiar with the details of borrowing slides and with the method of teaching through the use of the lantern, the figures given above indicate a very general interest in visual instruction. During the year 163 teaching institutions were registered for the privilege of borrowing on the four-week plan described in Handbook 31.

## AGRICULTURE IN THE SECONDARY SCHOOLS

For many years the State Education Department has recognized agriculture as a proper subject for school study and ten years have passed since the first outline of a course in agriculture was included in the courses of study for secondary schools. Not until 1910, however, was there any provision made for instruction of a vocational nature. At this time the Legislature enacted a law authorizing the Commissioner of Education to apportion public money for the partial support of schools of agriculture, mechanic arts and homemaking. In 1913 this law was amended to its present form.

The law of 1910 provided that such schools may be established in union free school districts when authorized by a district meeting. An amendment in 1913 provided that such schools might also be established in common school districts. Practically all village schools are in union free school districts while nearly all the small country schools are in common school districts. This change permits any public school in the State to undertake the work even though it does not maintain a high school department. It should be noted, however, that the school may be authorized only by a vote of the district. This is to insure the incorporation of the vocational work as an integral part of the established school system.

The most important factor in successful school work is the teacher. The apportionment of a fractional part of the teachers' salaries instead of a lump sum tends both to secure better salaried teachers and to warrant a yearly increase sufficient to retain competent teachers. The provision for summer employment makes possible an effective teaching plan.

The amendments of 1913 do not change the fundamental principles of the original law but give to them increased effectiveness.

Two general types of agricultural schools are recognized by the Department, namely:

1 *Intermediate schools of agriculture, mechanic arts and home-making.* These are small schools of distinctly rural type offering four years of vocational work based upon six years of elementary school work. This type of school is not maintained in connection with any other secondary school course or department. These schools are planned for districts which do not at present maintain an academic department. Districts now maintaining an academic department of junior or middle grade may reorganize and establish an intermediate school. The course is so organized that pupils who are graduated from the intermediate school may complete an approved high school course by two years of additional work.

In addition to the elementary teaching staff there are three vocational teachers: (1) a principal qualified to teach agriculture; (2) a woman qualified to teach homemaking subjects; (3) a teacher qualified to teach English, history etc. Each of these teachers holds a special vocational certificate for the particular work in which he or she is engaged.

Curriculum for an Intermediate School of Agriculture

First year	Hours a week	Second year	Hours a week
(Seventh school year)			
English .....	5	English .....	5
Arithmetic .....	5	Mathematics .....	5
Geography .....	5	History .....	5
Agriculture or homemaking ...	10	Agriculture or homemaking ...	10
Third year		Fourth year	
English .....	3	English .....	3
Mathematics .....	5	History .....	3
Biology .....	5	Mathematics .....	5
Agriculture or homemaking ...	10	Agriculture or homemaking ...	10

2 High schools of agriculture, mechanic arts and homemaking. These are vocational departments of high schools located in villages and rural communities. Pupils in these departments recite English, history etc. in common with pupils in other departments of the school. It is therefore assumed that the principal of the school is also principal of the school of agriculture, mechanic arts and home-making. Official communication comes from and is directed to him.

Curriculum for a High School of Agriculture

First year	Hours a week	Second year	Hours a week
English .....	4	English .....	3
Algebra .....	5	Plane geometry .....	5
Biology .....	5	History .....	3
First year agriculture } or } .....	10	Second year agriculture } or } .....	10
First year homemaking }		Second year homemaking }

English .....	3	English .....	3
Physics or chemistry.....	5	American history with civics...	5
Third year agriculture } or } .....	10	Fourth year agriculture } or } .....	10
Third year homemaking }		Fourth year homemaking }	

The classroom and laboratory instruction in these schools and departments is based upon the practical experience gained on the farm, at home or elsewhere. It is therefore impossible to prescribe uniform courses of study or to prepare adequate outlines for particular subjects. This does not mean that the courses of study or curriculum of a school are changed to suit the whims of pupils who do not know exactly what they want or need. Definite courses of study are formulated at the beginning and followed until there

is urgent need for a change. A well-balanced general knowledge of the entire field of agricultural science and practice is represented in each curriculum.

### NEW HIGH SCHOOL BUILDINGS

Plans for high school or high school and grade buildings have been approved during the year 1914-15 for the following places: Avoca, Bloomingdale, Clayville, Delhi, Elizabethtown, Elmira Heights, Fort Plain, Manchester, Manhasset, Mohawk, Newfane, Orchard Park, Port Chester, Scarsdale, South Dayton, Vernon and Youngsville.

### EDUCATION LEGISLATION

*From January 1 to December 31, 1915*

So far as new statutes are available at the date this report was prepared, the following brief synopsis shows the progress in enacting laws for the promotion of secondary education since the report of 1914.

*Alabama* (ch. 14, 1915) authorized women to serve on boards of education in incorporated cities and towns and on country boards; (ch. 37) created the Alabama Illiteracy Commission, composed of five persons, both men and women, appointed by the governor, and including the state superintendent of education; (ch. 64) authorized the State Board of Examiners to grant a first grade certificate, without examination, to graduates of "Class A" normal schools or of other institutions maintaining approved teachers training courses, or to any person from another state whose credentials equal those of the same grade in this state.

*Alaska* (ch. 41, 1915) ratified and reenacted the compulsory education law of 1913; (ch. 74) provided for a uniform system of schools, including high, grammar, primary and kindergarten and such other schools as may hereafter be created; provided for a state board of education consisting of the governor, who shall be the superintendent of public instruction, the state treasurer and an assistant superintendent, appointed by the governor; prescribed the qualifications of the assistant superintendent and general rules and regulations for the conduct of the schools of the territory.

*California* (ch. 37, 1915) provided for the employment of "home teachers" to work in the homes of the pupils, instructing children and adults in preparation for school attendance, in sanitation, in the English language, in household duties and in American citizenship;

(ch. 97) established a postgraduate elementary school course of two years which may consist of commercial arithmetic and geography, bookkeeping, United States history and civics, elementary agriculture, manual art, stenography and typewriting; (ch. 410) amended the act of 1911 providing for the organization of high school cadet companies, *in re* officers, instruction, organization into regiments, etc. and directing school boards to cooperate with the adjutant general; (ch. 453, 455, 456, 470) amended the laws *in re* high schools, normal schools and teachers certificates.

*Colorado* (ch. 145, 1915) provided for the interchange of public school teachers between Colorado and other states.

*Connecticut* (ch. 168, 1915) provided for the use of school buildings, outside of school hours, for public or educational purposes or for political discussion; (ch. 263) authorized the state board of education to continue to maintain and to establish continuation, part-time and evening trade and vocational schools for persons over 14 years of age; (ch. 275) made compulsory the employment of school physicians in all cities of 10,000 or more inhabitants; (ch. 272) directed the duties of citizenship to be taught in all public schools above the fourth grade.

*Delaware* (ch. 256, 1915) created a state commission on vocational education, representing manufacturing, commercial, labor, agricultural and educational interests.

*Florida* (ch. 6830, 1915) provided for a teacher-training department in one high school of each county of the state and appropriated \$500 to each school; (ch. 6835) established three summer schools for the training of teachers in connection with the University of Florida, the Florida State College for Women and with the Agricultural and Mechanical College for Negroes; all collegiate, normal or professional credit may be applied toward a degree; (ch. 6837) empowered the board of county commissioners of each county to create one scholarship at the agricultural department of the University of Florida; (ch. 6838) authorized the granting of a third grade certificate, valid for two years, on the completion of an elementary professional course in the normal school or the state institutions of higher learning or an equivalent course in an approved private university, or a second-grade certificate, valid for four years, on completion of the freshman year, or a first grade, valid for five years, on completion of the sophomore year.

*Hawaii* (ch. 51, 1915) prohibited the appointment of any minister of religion or any person in holy orders as a commissioner of education; provided for the appointment of women and limited the

number to three to hold commission at any one time; (p. 358, 1915) resolved that the department of public instruction shall add to its staff a special teacher in Hawaiian history, customs, pronunciation etc. in order that teachers may gain a more correct knowledge of the Hawaiian race.

*Idaho* (ch. 54, 1915) provided for the payment of tuition of non-resident high school pupils; (ch. 122) provided for the consolidation of rural high school districts; (ch. 153) amended the state board of education acts of 1911 and 1913 *in re* certification of teachers.

*Illinois* (p. 647, 1915) amended the 1913 act for certification of teachers *in re* requirements for special certificates in special subjects; (p. 171) established a system of examination and certification of teachers of all grades in the state.

*Kansas* (ch. 299, 1915) provided for the certification of teachers by the normal schools of the state; (ch. 298) repealed previous acts and enacted a new law *in re* certification of teachers in the public schools; (ch. 296) organized a "State Department of Education"; (ch. 314) authorized the payment of tuition of nonresident high school pupils.

*Louisiana* (ch. 248, 1914) authorized the state board of education to employ three high and rural school inspectors; (ch. 279, 1914) added the H. Sophie Newcomb College of Tulane University to the institutions whose diplomas are recognized as first grade certificates.

*Maine* (ch. 66, 1915) increased the endowment of academies that may receive state aid for high school tuition from \$10,000, to \$25,000; (ch. 91) authorized the trustees of the State normal schools to arrange courses and give credit for successful teaching.

*Massachusetts* (ch. 294, 1915) established a department of university extension under direction of the state board of education; the department is authorized to grant suitable certificates to students completing extension or correspondence courses.

*Michigan* (ch. 26, 1915) repealed the act to "prescribe a course of studies to be taught in the district schools of the state . . . known as the agricultural college course"; (ch. 167) appropriated the sum of \$700,000, to the state normal college.

*Minnesota* (ch. 296) provided state aid for public schools, specifying that a high school in session nine months in the year should receive annually \$1800; if a high school maintains an agricultural

course, it may receive \$1000 annually, if a commercial, home or manual training class \$600 each annually, if a training course for rural teachers, \$1200 annually.

*Nebraska* (ch. 120, 1915) made the establishment of a county high school compulsory in every county in which there is no accredited twelfth grade high school; (ch. 232) established in the state normal schools a two-year course of study for rural teachers in common school subjects, rural sociology, organization, manual training, sanitary science, household economy, agriculture and vocal music; (ch. 234) directed the state board of education to aid in the establishment of vocational schools and vocational departments in rural high schools.

*Nevada* (ch. 154, 1915) provided for the establishment of branch county high schools; (ch. 246) provided for a state educational survey commission to be appointed by the governor; (ch. 274) forbade the employment as teacher or as school officer in any school of the state of any person not a citizen of the United States.

*New Hampshire* (ch. 156, 1915) established a teachers' employment bureau in the office of the superintendent of public instruction.

*New Mexico* (ch. 81, 1915) amended the law of 1907 *in re* certification of teachers; (ch. 88) directed the state board of education to prepare an outline for a course of study in Spanish and provided that the textbooks used and the instruction given shall be in English; (ch. 89) provided for the training of 50 teachers, for the rural schools, in the state normal schools, prescribed their qualifications, and appropriated \$15,000 to pay their expenses; (ch. 91) provided for the organization, control and equipment of school cadet companies and the promotion of rifle practice and physical training therein.

*New York* (ch. 214, 1915) provided for the payment by the parent of any nonresident tuition in excess of that paid by the State; (ch. 194) provided that where the cost of transportation of elementary pupils in a contracting district exceeds \$250 the State may pay the tuition of the academic pupils; (ch. 482) repealed section 1188 of the Education Law placing the Long Island State School of Agriculture under an advisory board and placed the trustees under the advisory cooperation of the State Commissioner of Education.

*North Carolina* (ch. 276, 1915) placed all business colleges and commercial schools now existing or hereafter established under the supervision of the state board of examiners and of the superin-

tendent of public instruction, prescribed their licensing requirements and forbade the opening or conducting of any such school without a license.

*North Dakota* (ch. 130, 1915) amended section 1369 R. S. by adding school management and methods of instruction and three senior review subjects to the course of high school graduates entitled to second grade certificates; (ch. 142) provided that the district shall pay the tuition of any of its pupils attending the model schools of any educational institution of higher learning in the state.

*Oklahoma* (ch. 10, 1915) provided that temperance as a part of physiology and hygiene shall be taught in all educational institutions receiving state aid; (ch. 14) repealed chapter 131, Laws of 1911, empowering the state superintendent to employ a state inspector of schools; (ch. 71) provided for the election of superintendents and teachers for a period of not more than three years; (ch. 114) provided for the issuance of teachers certificates, valid for two years, to graduates of accredited high schools and of district agricultural schools; (ch. 281) provided that business colleges locating in the state shall give bond of \$2000 to remain in business until those who have purchased scholarships complete their course.

*Oregon* (ch. 235, 1915) provided for a county high school fund in all counties having more than 100,000 inhabitants, to be available only by schools approved by the state board of education, and repealed sections 4180-4191, R. S.

*Pennsylvania* (ch. 87, 1915) authorized the trustees of any academy or seminary to enter into contract with the directors of a district to conduct jointly the educational work of the district; (ch. 162) created a bureau of vocational education under the direction of the superintendent of public instruction; (ch. 344) authorized the state board of education to inquire into the advisability of erecting a suitable state educational building and appropriating \$5000 to secure preliminary plans and designs.

*Porto Rico* (ch. 3, 1915) provided that any teacher with five consecutive years' successful experience subsequent to 1905 may receive a life certificate; (ch. 28, 1914) appropriated \$1,318,485 for the department of education, including \$16,000 for the education of young men and women in the United States.

*Tennessee* (ch. 116, 1915) reorganized the state board of education, provided for the appointment of new members and empowered the board to elect a state superintendent of public instruction.

*Texas* (ch. 10, 1915) appropriated \$1,000,000 for the years 1916 and 1917, for improving and developing the country schools of the

state, and provided a detailed system of standards, requirements and distribution of funds.

*Utah* (ch. 20, 1915) created an educational code commission to investigate the educational needs of the state with a view to the reconstruction and codification of the school law; (ch. 109) increased the appointive members of the state board of education from two to six and lengthened their term of office from four to six years.

*Vermont* (ch. 64, 1915) codified and amended the school law of the state, reestablished the state board of education and defined its duties, provided for the appointment of a commissioner of education for an indefinite term and repealed all previous laws inconsistent with this act; (ch. 64, § 68) forbade the formation of any secret society, fraternity or club in any school receiving state aid, except such as are sanctioned by the commissioner of education and the superintendent, under penalty of suspension or dismissal of its members; (ch. 69) divided the high schools into junior (having a four-year) and senior (having a six-year course), defined the courses and provided for vocational education in each class.

*Washington* (ch. 143, 1915) created the commission of educational survey of Washington; (ch. 161) required the state board of education to prepare an accredited list of higher institutions of learning of this and other states whose graduates may be awarded teachers certificates without examination, except in the state manual.

*West Virginia* (ch. 56, 1915) amended and reenacted the education law *in re* teachers certificates; (ch. 63) provided for the payment of tuition fees of high school pupils by boards of districts which do not maintain high schools; (ch. 62) provided for the establishment of normal training departments in high schools.

*Wisconsin* (ch. 552, 1915) allowed special state aid for high schools having commercial courses.

*Wyoming* (ch. 161, 1915) provided for an annual state teachers institute and a fund for conducting it, by requiring an annual registration fee of one dollar from every certified teacher.

## BULLETINS OF THE BUREAU OF EDUCATION

The United States Commissioner of Education publishes a list of the documents issued annually from 1906 to date. These publications are numbered consecutively for each calendar year. The bulletins of interest in secondary education issued by the bureau

during the year 1915 are given by number, title and author, with a brief statement of contents:

4 *The Health of School Children*. Heck. Deals with children in secondary as well as in elementary schools.

6 *A Study of the Colleges and High Schools in the North Central Association*. Judd & Counts. Contains a statistical study, based upon 1000 annual reports of the high schools of this association for the first semester of the school year 1913-14.

7 *Accredited Secondary Schools in the United States*. Capen. Contains definitions of unit and accredited secondary school, methods and requirements of accrediting agencies, private, state and association lists.

11 *A Statistical Study of the Public Schools of the Southern Appalachian Mountains*. Frost. Contains facts concerning both elementary and secondary schools.

12 *History of Public School Education in Alabama*. Contains an account of the county high schools.

13 *The School House as the Polling Place*. Ward. Discusses the employment of the school as polling place and of the principal as voting clerk.

19 *Statistics of Certain Manual Training, Agricultural and Industrial Schools, 1913-14*. Contains statistics of high schools.

20 *The Rural School System of Minnesota*. Foght. Contains information regarding the high schools of the rural districts, teachers training courses in high schools, state department rules for consolidation of schools and regulations of the state high school board.

21 *School House Sanitation*. Cook. Covers the subject as related to high schools.

23 *The Teaching of Community Civics*. Barnard, Carrier, Dunn & Kingsley. Discusses aims and methods and elements of welfare and makes biographical suggestions.

25 *Public, Society, and School Libraries*. Contains tables summarizing statistics of school libraries.

26 *Secondary Schools in the States of Central America, South America and the West Indies: Scholastic Scope and Standards*. Smith. Discusses organization, administration and programs of secondary education.

28 *Extension of Public Education. A Study in the Wider Use of School Buildings*. Perry. Discusses character and extent of the movement, local undertakings, letting regulations, types of adminis-

tration, control and support through neighborhood organization, adaptation of buildings.

30 *Bibliography of Education for 1911-12*. Contains lists of works on history and description of secondary education, principles and practice of secondary teaching.

31 *A Comparative Study of the Salaries of Teachers and School Officers*. Contains information regarding salaries of high school teachers.

32 *The School System of Ontario*. Foght. Contains a brief statement regarding the high schools and collegiate institutes.

35 *Mathematics in the Lower and Middle Commercial and Industrial Schools of Various Countries Represented in the International Commission on the Teaching of Mathematics*. Taylor. Covers the subject as related to the middle and higher schools of the various countries represented.

36 *Free Textbooks and State Uniformity*. Monahan. Covers the subject as related to secondary education.

37 *Some Foreign Educational Surveys*. Mahoney. Includes survey of secondary education.

41 *Significant School Extension Records—How to Secure Them*. Perry. Discusses uniformity in record keeping, basic considerations, recordable and desirable facts, evening schools, afternoon activities, forms and their use.

43 *Educational Directory, 1915-16*. Contains names and addresses of state, county, town, city and district officers.

44 *School Administration in the Smaller Cities*. Deffenbaugh. Discusses the school board and its officers, finance, the superintendent, special supervisors, teachers, health inspector and school nurse, other officers and employees. Contains New Jersey school building code and statistical tables.

45 *The Danish People's High School. Including a General Account of the Educational System of Denmark*. Hegland. Contains a chapter on secondary education.

## NATIONAL ASSOCIATIONS

**Association of Colleges and Preparatory Schools of the Middle States and Maryland.** The twenty-eighth annual convention of the Association of Colleges and Preparatory Schools of the Middle States and Maryland was held under the auspices of the College of the City of New York, November 27-28, 1914. The topics of discussion of interest to the workers in secondary

schools were the report of the committee on comprehensive examinations, which had been discussed at the twenty-sixth annual convention, the report of the committee on a uniform certificating blank, and the preliminary report of the committee to investigate the comparative excellence of the records made in college by students entering upon certificate and upon examination, respectively. There was a round table conference in ancient languages discussing the reorganization of secondary school Latin, and subsidiary papers.

**North Central Association of Colleges and Secondary Schools.** The twentieth annual meeting of the North Central Association of Colleges and Secondary Schools was held at Chicago, Ill., March 19-20, 1915. The list of secondary schools accredited by this association is published in the proceedings. The standards of accrediting secondary schools are given in detail, which are most interesting.

**New England College Entrance Certificate Board.** The thirteenth annual meeting of the New England College Entrance Certificate Board was held in Boston, May 14, 1915. The report is similar to others, containing statistics, the rules of the board, and the list of approved schools. One resolution offered by the executive committee and approved by the board is both interesting and suggestive. It empowered the executive committee to arrange for a visit at the next annual meeting from two or three members representing the same number of states, their expenses to be met by the board; the object being to give the schoolmen an opportunity to study the workings of the board and to make criticisms and suggestions.

**Association of Colleges and Secondary Schools of the Southern States.** The twentieth annual meeting of the Association of Colleges and Secondary Schools of the Southern States was held at the University of Virginia, Charlottesville, October 22-23, 1914. The proceedings appeared from press in February 1915. The papers of the proceedings were well received and several of them appeared in the daily or educational press. The full report of the commission on accredited schools with the list of accredited schools was reprinted and distributed by the secretary.

**College Entrance Examination Board.** The fifteenth annual report of the secretary of the College Entrance Examination Board is dated September 1915. In addition to the publications mentioned in previous annual reports, the following printed documents have been issued during the year ending August 31, 1915; *Fourteenth*

*Annual Report of the Secretary*, September 1, 1914; *Document No. 65*, a circular of general information, November 10, 1914; *Document No. 66*, the list of examiners, November 10, 1914; *Document No. 67*, instruction to supervisors in charge of examinations, November 20, 1914; *Document No. 68*, constitution and plan of organization, December 1, 1914; *Document No. 69*, places for holding examinations, March 1, 1915; *Examination Questions of 1915*, published for the board by Ginn & Company, August 31, 1915. The event of the academic year emphasized by the secretary in his annual report is the inception of comprehensive examinations. The establishment of a system of comprehensive examinations is to be offered by the College Entrance Examination Board in June 1916 and thereafter. Separate committees of examinations were to be appointed by the board for the preparation of the two systems of examinations offered, and separate bodies of readers for the reading of the answer books of the two systems. Perhaps the most helpful description of the character of the new comprehensive examinations is contained in the following memorandum:

The new comprehensive papers must be adapted:

1 To such variety of school instruction as exists in the several subjects; that is, they must not prescribe methods, but must recognize the general principle that the schools determine how they shall teach a subject and that the college tests results or power.

2 To different stages of training in the subjects in which they are set; that is, they must give boys opportunities to show their power, whether they have had the minimum or the maximum amount of training given in school. For example, the papers in French should be so drawn up as to enable a boy who has had only two years of French to show that he has as much command over the language as can be expected from that amount of training; and they must be similarly useful for the boy who has had three or four years of French.

**The National Conference Committee on Standards of Colleges and Secondary Schools.** The eighth conference of the National Conference Committee on Standards of Colleges and Secondary Schools met at New York, March 26, 1915. The question of honorable dismissal again received careful attention and led to a formal resolution of interest to the colleges. The other subject receiving the most attention had to do with the credit to be given the subjects of English, algebra and history. This resolution prevailed: That the evaluation of the College Entrance Examination Board requirement in elementary algebra be increased to two units, mathematics A-1 and mathematics A-2, each to be counted as one unit. That colleges admitting on certificate, how-

ever, give credit for one, one and one-half, or two units, according to the time actually devoted to the subject, no more than two units credit to be given in any case.

The College Entrance Examination Board was requested to establish two examinations in each of the historical fields, to be known as elementary and advanced, or by some other distinguishing term. The conference recommended that colleges require that at least nine of the units presented for admission be confined to three subjects; and it urged that all colleges now maintaining separate admission examinations in June give up these examinations and substitute therefor those of the College Entrance Examination Board.

**The Carnegie Foundation for the Advancement of Teaching.** The Carnegie Foundation for the Advancement of Teaching, in its tenth annual report of the president and of the treasurer, presents, under the caption "Education in Vermont," the legislative results of the report by the commission and the foundation, referred to in the tenth annual report, title 2. The failures of the Legislature to incorporate into law the recommendations of the foundation are set forth in the same detail as the recommendations that became law: "The Carnegie Foundation considers it a privilege to have cooperated in a movement that has already resulted so well, and feels amply repaid for the time and thought and money that were expended upon its study of education in Vermont."

These references to the activities of the national associations which are a noteworthy characteristic of American education, representing as they do the freedom of initiative in educational matters inherent in private and benevolent enterprises, afford evidence of breadth of view and suggested lines of improvement worthy of careful consideration by those interested in secondary education.

## HIGHER EDUCATION

# HIGHER EDUCATION

PREPARED BY

AUGUSTUS S. DOWNING

*Assistant Commissioner for Higher Education*

A retiring trustee of one of New York State's universities recently said: "The value of a teaching institution depends largely upon the number of men who are disagreed with each other. . . . The large kind of disagreement which belongs to strong men constitutes parallelograms of force which secure important resultants."

To this "large kind of disagreement," concerning important educational problems, attention is centered in this report. It is the function of this report to make note annually of the prominent educational activities of the leaders in and the resultant progress of higher education. For years we have reported such friendly disagreements and differences impartially with the hope of contributing something to the parallelograms of forces making for the soundest educational progress.

The University of the State of New York — a university of universities — is interested not only in the conflicts between administration and institutions, but is also privileged to hear at first hand, from many other sides, the educational problems of a state and of a nation; of a hemisphere and of a world. These larger problems not only involve professional practice and technical training, but also the acts of incorporation and the requirements for registration of institutions. Agreements are entered into between states, and unions formed with countries; universal educational information is to be imparted, and worldwide conclusions are to be based thereon.

The year under revision afforded such opportunities as the San Francisco Exposition, the Oakland International Congress, and the Washington Scientific Congress of the Pan-American Union. These were most noteworthy events even though they were overshadowed by the calamitous conditions existing in the old world, that not only disrupted commercial, financial and political relations, but also diverted educational, literary and religious currents of love and inspiration into channels of hatred and destruction. Restless critics of higher education, whether in the pulpit, in the press, or in the forum, should weigh well their criticisms and suggestions regarding educational relations and problems, lest they inaugurate some movement that they can not but would gladly stop.

"Thoroughness in Education" was discussed by ex-President William H. Taft before the New York State Teachers Association, in Rochester, November 24, 1915. "The new function I propose for the Federal Bureau of Education is suggested by the office which the Regents of the New York State University perform with their system of examinations and supervision. The same bureau ought to be given authority to establish federal examinations for conferring teachers certificates in the various parts of the country at regular periods." The question is raised, "What good would spring from such federal teachers certificates? Could the moral sanction of such certificates compel the scholarship, experience and teaching ability now exacted by the legal requirements in force in the several states of the Union?"

In my experience as permanent secretary of the committee on selection of the Rhodes scholar from New York State, I have seen no criticisms of the American scholars in Oxford that should give any American uneasiness of mind regarding the American system of education. The record of the first decade of the award of Rhodes scholarships in the State of New York, terminating last year, abounds in illustrations of successful student life, activity, scholarship and honors attained by Americans in the heart of the conservative, little-known and less-appreciated mother of the English universities.

"The president of the Carnegie Foundation for the Advancement of Teaching has called attention to an unsatisfactory want of uniformity in the annual reports of the state superintendents of schools, and points out their lack of succinct statement as to existing conditions, of the advances which have been made, and of the room for further progress." The critic hardly appreciates the problems of the annual report, I fear. The Regents must report annually to the New York State Legislature. This report must cover all educational activities, the bare enumeration of which can not be condensed within the compass of a few pages.

One of the purposes of this report is to make reference to noteworthy events in higher education of New York State and of the United States, so that comparisons may be instituted between higher education in America and in other countries. An earnest effort is made to secure the annual publications of all the institutions of higher education, and this Department is a clearing house for such publications, which are uniformly filed in the State Library. Any administrative officer of higher education in any state or country,

who is not receiving this report regularly, is invited to send his name and address to the Assistant Commissioner for Higher Education, who will see that the name is added to a permanent list for receiving the report.

## NATIONAL ASSOCIATIONS OF HIGHER INSTITUTIONS

The volume of the material precludes reference to any save the most important proceedings, and to these in the briefest terms. The sources of information are diligently reviewed for helpful items of interest in higher education only, while carefully prepared studies are instituted for the sake of comparison.

**Bulletins of the Bureau of Education.** Reference was made last year to the publications of the United States Commissioner of Education, and his published list of documents issued annually from 1906 to date. The bulletins of interest in higher education issued by that bureau during the year 1915 are:

Number 4. *The Health of School Children.* Heck. Contains an article on "The cardiac effects of immoderate college athletics," by Leopold Shumacker M.D., and William S. Middleton M.D.

Number 6. *A Study of the Colleges and High Schools in the North Central Association.* Judd & Counts. Contains the approved list of colleges and universities for 1914, with the association's standards of accrediting.

Number 8. *Present Status of the Honor System in Colleges and Universities.* Baldwin, Messner and Greene. Contains a history of the system and the results of an investigation of present conditions in 116 institutions.

Number 18. *Legal Education in Great Britain.* Richards. Discusses the law society, its school and courses, legal education for solicitors and for barristers, the inns of court, preliminary education, professional examinations, law faculties and university degrees, calls to the bar and methods of instruction.

Number 27. *Opportunities for Foreign Students at Colleges and Universities in the United States.* Capen. Discusses the organization of education, including state systems and standards, and the evolution of the college and the university proper, the typical university; independent, technical and professional schools; independent and denominational colleges, higher education of women and makes a comparison of American and foreign institutions. It has also chapters on living conditions, college life, higher educational centers, number and distribution of foreign students, entrance requirements, typical curriculums. It contains a list of departments or schools, a table of degrees, the organization and offerings of 62 institutions frequented by foreign students, statistical tables.

Number 30. *Bibliography of Education for 1911-12.* Contains lists of works on the history and description of higher or university education in United States, Great Britain, Germany; on principles and practice of teach-

ing; on religious education in universities and colleges; on types of education, technical and professional; on education of women, university extension; on universities and colleges in the United States, Canada, South America, Great Britain, Germany, Norway, Spain, Turkey, China and Japan.

Number 32. *The School System of Ontario*. Foght. Contains a brief sketch of the facilities for higher education.

Number 38. *The University and the Municipality*. Discusses the aims and purposes of the urban university and gives a brief description of typical urban universities.

Number 43. *Educational Directory*. Contains lists of officers of universities, colleges and professional schools.

**The Association of American Universities.** The sixteenth annual conference of this association was held at Princeton University, November 6 and 7, 1914. A representative of the University of Illinois presided, and a representative of the University of Pennsylvania was secretary. Delegates were present from the 22 universities of the association, the Carnegie Foundation, and the Bureau of Education.

In addition to reporting the minutes of the three sessions, the proceedings of this conference reports the conference of the deans and the minutes of the meetings of the executive committee.

The recommendations adopted were found worthy of association with the constitution.

Attention is called to the recommendations adopted by the association at the sixteenth annual conference, as follows:

1 Relative to the resolutions in regard to appointments to fellowships and scholarships (see page 19).

2 Relative to the proposed classification of colleges (see page 18).

3 Relative to cooperating with the Bureau of Education upon a method of classifying and rating colleges (see page 18).

**National Association of State Universities.** This association met in its nineteenth annual meeting, at Washington, D. C., November 9 and 10, 1914. Its transactions and proceedings appear in volume XII, edited by Guy Potter Benton, secretary of the association. There were representatives present from 33 universities, 5 special members, and several guests.

The standing committee on "national university" had no report, but in a statement of the situation a member of the committee said: "Whether the idea of a university given entirely to research graduate work for the purpose of supplementing existing agencies, and in some degree unifying them and expressing in a way the completion of our educational activities, shall become a long-wished-for realization, is not yet clear."

The standing committee of conference with other associations reported as the most important meeting of the year, the meeting of the National Conference Committee on Standards of Colleges and Secondary Schools which was held in New York City, February 28, 1914.

Under the caption "Classification of Colleges and Universities," the association made public some interesting educational history relating to the scheme of classification of colleges and universities which was undertaken by the Bureau of Education nearly four years ago. This will doubtless prove interesting when read in connection with President Taft's address to the teachers of New York State.

Probably all members of this association recall that the tentative classification which the bureau accidentally allowed to be issued, without full preparation, was stopped at the request of the President of the United States. President Taft was the President who issued the order, and it has not been reversed in the present administration.

The fact that this first classification was tentative, and that a revision was at once seen to be desirable, and undertaken, of course shows that a certain number of mistakes were made. That was inevitable. But the tenacity with which the public has clung to the rating of that first tentative classification has caused the bureau constant embarrassment, and has, moreover, done considerable injustice here and there to institutions which have since improved, or which possibly were mistakenly placed. These are the two principal reasons why it seems to the officers of the bureau desirable that something more should be done, and done rather soon. I have already made the proposition which is contained in this resolution to four or five associations representing higher education.

**Carnegie Foundation for the Advancement of Teaching.** The ninth annual report of the president and of the treasurer of this Foundation was issued in October 1914.

This report clearly reveals the magnitude of the work the foundation has assumed and the work others have accomplished. One portion of the report says:

It would, I believe, have been wiser to go a little more slowly in the south, to get honestly on a high school basis first, and to live there a few years until the two years of college could be fairly required. Some adjustment of this situation ought still, in my judgment, to be made in the interest both of education and of medical training. No program will be real which does not rest on sincere and reasonable requirements. The progress made in raising standards, though attractive on paper, will be likely to prove in part illusory.

By omitting the phrase, "in the south," no better statement can be made of New York's attitude toward this whole question of advancing medical standards throughout the United States. When

the medical council through certain leaders contemplated advancing the general educational requirement preliminary to the study of medicine by its fiat, New York's representatives honestly and clearly foretold the result—"attractive on paper" but already proven "illusory,"—and refused to enter on the project. After nearly two decades' experience (1898-1916) New York is entering seriously on the task of advancing the requirements in general education preliminary to the study of medicine beyond the secondary school requirement. In due time when one year of college work can be delimited, New York will undoubtedly be in a position to lead up to a year of genuine college work for admission at some future date.

Relative to the question as to whether medical schools, any more than colleges, can be classified into sharply divided classes, the report says:

In reply I would say that in my judgment no one is so well prepared to carry out such a work as a body which represents the medical profession. Reform in medical teaching, like all reform that is genuine, will come from within, not from without. No other group of men, in my judgment, could hope to do what the Council on Medical Education has accomplished. I believe, as I have already said, that the council has suffered in its work by a lack of touch with the educational conditions with which it has been dealing, and by the relations of members of the council and of the house of delegates to the schools. It can, I am sure, improve its future legislation by availing itself of a closer knowledge of schools and colleges; but I question whether any group of men, however qualified, can make a hard-and-fast classification of medical schools which would not be open to serious criticism. In other words, the problem of classifying schools into four or five groups upon such criteria as the council has assumed seems to me practically insoluble. It has served its day, and some looser form of grouping seems now desirable.

New York State solved these problems many years ago. The first classification of the Regents into registered and nonregistered only needed in due time to be expanded into a threefold classification to serve the full purpose of protection for the people, for the schools, for the students and for the profession. Without attempting to determine the maximum requirements an institution may attain, it is sufficient to determine the minimum it must maintain to meet the legal requirements. Such recognition is given by the term "registered." At the other extreme it is not sufficient to ignore the existence of an institution, which might be caused by ignorance, but it suffices to indicate its title and location. Between these extremes lies a group of institutions unable to meet the

minimum requirements but clearly affording instruction worthy of recognition for admission to the registered institutions. Such recognition is given by the term "accredited."

We have found the writer's discussion of this classification of medical schools helpful in the greater task that we have now in progress, in our revision of our lists of colleges of liberal arts and science which we group in the same threefold classification. But from our experience we incline to the opinion that the judgment of the writer is at fault when he says, "No one is so well prepared to carry out such a work as a body which represents the medical profession." In the above quotation is evidence that this judgment is at fault.

Is it not safe to affirm that no class can legislate for the mass? The principle that has given New York State its recognized leadership not only in professional education but in all educational development, has been the representative form of its administrative procedure. Not only, for example, in medicine, is the public recognized through legislative action, but the profession through the state board, and the schools, both professional and general preliminary, through the Regents councils. It may not be out of place to record again the criteria adopted by the Regents, on which they base the registration of higher institutions: incorporation, for permanency; financial, for equipment; faculty, for power; graduates, for product; student body, for material; course, for development; years, for maturity; session, for endurance; admission, for quality. Though the above order was not purposely arranged as a climax, it is commended to the thoughtful as a logical order of advance from the least to the greatest of criteria for the recognition to be accorded higher educational institutions.

**Kahn Foundation for the Foreign Travel of American Teachers.** This foundation was established on January 6, 1911, by a formal deed of gift and trust executed between Albert Kahn, of Paris, the founder, and five trustees, subsequently increased to six. The full text of the deed, setting forth the donor's purpose and hopes for the foundation, is found in the first report issued by the trustees.

The reports of the six fellows for 1911-14 have been referred to in earlier reports. During the current year the report to the trustees, by Benjamin Sledd Litt.D., professor of English, Wake Forest College, Wake Forest, N. C., appeared in volume 4, number 1. His itinerary, in which he "undertook to look into the teaching

of English in the colleges and universities in the countries visited," included Ireland, Scotland, England, Wales, France, Switzerland, Italy, Corfu and Greece. The war put an end to all thought of carrying out his original itinerary.

**The General Education Board.** In the last report of this Department appeared an account of the activities of this board from 1902 to 1914. The report of the secretary for this year is published in book form and issued under date of July 1, 1915. The report contains (1) College and University Appropriations, (2) Medical Education, (3) Education in the Southern States, (4) Farm Demonstrations, (5) Educational Research, (6) Public Education in Maryland, (7) Treasurer's Report.

## EDUCATIONAL LEGISLATION RELATING TO HIGHER EDUCATION

FROM JANUARY 1915 TO FEBRUARY 1916

The following is a synopsis of the new statutes enacted for the promotion of higher education in the United States so far as available since the Report of 1915.

*Alabama* (ch. 82, 1915) created a state veterinary medical examining board, prescribed the qualifications of veterinarians and regulated the practice of veterinary medicine; (ch. 89) dissolved the corporation known as the Medical College of Alabama and constituted it the medical department of the University of Alabama to remain at Mobile so long as it maintains a "Class A" school of medicine.

*Alaska* (ch. 75, 1915) prescribed the qualifications for admission to the bar and provided for the creation of an examination board of the district courts; (ch. 76) provided for revenue by exacting a license of \$10, annually, from every attorney, doctor or dentist.

*Arizona* (ch. 17, 1915) established a bureau of mines under the direction of the board of regents of the University of Arizona; (ch. 62) established a state library with a law and legislative reference bureau and provided for the appointment of a board of curators.

*California* (ch. 22, 1915) amended the nurse training act in respect to examinations; (ch. 105) licensed the practice of chiropody and placed it under the regulations of the state board of medical examiners; (ch. 386) amended the nurse training act by appointing a training school inspector; (ch. 407) provided that graduates of

the law schools or the departments of law of the University of Southern California, the Y. M. C. A. of San Francisco, Leland Stanford University, the Universities of California, Santa Clara or St Ignatius may be admitted to practice without examination; (ch. 629) exempted from taxation any collegiate educational institution not conducted for profit; (ch. 763) created the California Historical Survey Commission and appropriated \$10,000 to its use.

*Colorado* (ch. 148, 1915) amended the medical law of 1908, R. S. and licensed the practice of chiropody and chiropractic under the medical board; (ch. 149) repealed the nurse training act of 1905 and enacted a new law with increased requirements; (ch. 51) declared the State Historical and Natural History Society to be one of the educational institutions of the state.

*Delaware* (ch. 16, 1915) forbade a clerk of the peace to issue a license to any veterinarian unless the certificate is presented to him; (ch. 61) amended the medical act by accepting an equivalent for matriculation in the Latin scientific course of Delaware College; (ch. 62) amended the pharmacy act by increasing the membership fees of the N. A. B. Ph. from \$10 to \$15; (ch. 186) established a college for the education of women to be affiliated with Delaware College and maintained by its trustees who may also, in cooperation with the state board of education, organize a department of education in the college and conjointly adjust the high school course of study in so far as it is related to Delaware College.

*Florida* (ch. 6890, 1915) reenacted the pharmacy law without changing any educational qualification; (ch. 6893) repealed the law relative to granting temporary dental certificates; (ch. 6903) changed the time for holding bar examinations by the supreme court; (ch. 6951) created a state board of architecture, prescribed its duties, provided for the examination and registration of architects, and regulated the profession of architecture in the state.

*Hawaii* (ch. 140, 1915) provided that all public libraries be made depositories of territorial reports; (ch. 175, 1913) appropriated \$121,000 to the College of Hawaii; (ch. 188) ceded to the "Daughters of Hawaii" the "Queen Emma House Reservation" for the purpose of establishing an Hawaiian museum.

*Idaho* (ch. 29, 1915) changed the name of the Academy of Idaho to Idaho Technical Institute.

*Illinois* (p. 497, 1915) amended the dental act of 1909 concerning examinations and qualifications of dentists; (p. 695, 1915) created a state board of optometry, defined its duties, prescribed the qualifi-

cations of optometrists and regulated the practice of optometry in the state.

*Indiana* (ch. 131) created a state board of accountancy, prescribed the qualifications of certified public accountants and regulated the practice of accountancy in the state.

*Iowa* (R. S. § 2620 a-k) created a state board of accountancy, prescribed the qualifications for certified public accountants and regulated the practice of accountancy in the state; (§ 2584-2589) divided the state into three districts and appointed a commissioner of pharmacy for each district to see that the pharmacy laws are enforced.

*Kansas* (ch. 1, 1915) created a state board of administration of accountancy, authorized it to make rules and regulations for the qualifications and examinations of accountants and regulated the practice of accountancy in the state; (ch. 158) authorized the organization of corporations to encourage the learned professions; (ch. 240) forbade the division of fees, ("split fee") by physicians and surgeons; (ch. 320) authorized the employment of readers for blind persons receiving higher education.

*Louisiana* (ch. 56, 1914) reenacted and amended the medical law without affecting the educational qualifications; (ch. 147, 1914) authorized the Academy of the Sacred Heart to grant such diplomas, degrees and literary honors as are conferred by any colleges or universities of the United States or Europe; (ch. 207, 1914) authorized the sale of the property of the Southern University without limitation as to price; (ch. 165, 1914) amended the pharmacy act by requiring annual registration, raising the examination fee from \$5 to \$15 and limiting the number of working hours.

*Maine* (ch. 139) created a state board of examination and registration of nurses, prescribed the qualifications of its members, provided for examinations and regulated the practice of nursing in the state.

*Massachusetts* (ch. 106, 1915) authorized the free public library commissioners to determine the qualifications of library workers and establish a register of competent librarians; (ch. 201) established an annual license fee of \$2 for every registered optometrist; (ch. 249) provided that applicants for admission to the bar who have had two years' day or evening high school work may be exempt from the general education examination; (ch. 293) amended the medical law by requiring the degree of M.D. from a legally chartered medical school for admission to the examination; (ch. 301)

reenacted the dental law, established a board of dental examiners, defined the terms "reputable dental college" and "practice of dentistry" and provided for the examination and registration of "dental hygienists"; (ch. 142, S. L.) changed the name of "the Trustees of the Peabody Academy of Science" to Peabody Museum of Salem; (ch. 145, S. L.) changed the name of "Simmons Female College" to Simmons College.

*Michigan* (ch. 45, 1915) amended the veterinary act by requiring all applicants for a veterinary degree to be examined; (ch. 115) defined the term chiropodist, placed the licensing of chiropodists under the board of registration in medicine, prescribed their qualifications, and regulated the practice of chiropody in the state; (ch. 120) created a board of examination and registration in architecture, prescribed the qualifications of registered architects and regulated the profession of architecture in the state; (ch. 121) provided for the incorporation of ecclesiastical seminaries by special articles; (ch. 222) created the Michigan Historical Commission.

*Minnesota* (ch. 127, 1915) repealed all former optometry laws, enacted a new law, defined the practice of optometry, prescribed the qualifications of optometrists and regulated the practice of optometry in the state; (ch. 307) appropriated \$300 expenses to any blind student in the colleges and universities of the state, provided not more than five may receive aid in one year.

*Missouri* (p. 99, 1915) defined the terms "practice of law" and "law business," and forbade the "division of fees" by any licensed attorney; (p. 391, 1915) authorized the College of Agriculture and the School of Mines and Metallurgy to confer degrees suitable to designs and courses of study.

*Montana* (ch. 18, 1915) amended R. S. 1907, admission to practise law, by providing that a diploma from the law department of the University of Montana may be recognized as a license to practise; (ch. 134) reenacted the pharmacy law.

*Nebraska* (ch. 50, 1915) amended R. S. 1913, dentists and dentistry, by placing the nomination of the dental secretaries in the hands of the State Dental Society, prescribing the preliminary education as 14 Carnegie units and directing the secretaries to give final examinations at the end of two years in a dental school or accept the final examinations of the school; (ch. 51) amended R. S. 1913, veterinary medicine, by requiring a license to be filed in the office of the clerk of the county of residence and providing that any person who has practised 10 years, one year of which shall be in the

county of residence, may continue such practice but must not assume any veterinary degree; (ch. 127) added a college of pharmacy to the university colleges; (ch. 197) authorized the practice of chiropractic, provided for a "state board of chiropractic," for examining and licensing chiropractors and regulated its practice in the state; (ch. 198) repealed chapter 27, article 12, R. S. 1913, created a state board of registration of nurses and removed the regulation of nurse training from the state board of health to that board.

*Nevada* (ch. 98, 1915) established a "public service division of the University of Nevada" consisting of the state analytical library, the hygienic laboratory, food and drug control, weights and measures, agricultural extension, veterinary control service, agricultural experiment station and engineering experimentation; (ch. 121) transferred the state museum from the office of the superintendent of public instruction to the custody of the Nevada Historical Society.

*New Hampshire* (ch. 7, 1915) forbade any person practising veterinary medicine or surgery or directly or indirectly receiving any fee or compensation unless he is registered in accordance with law; (ch. 167) reenacted the medical law, regulated the practice of osteopathy and provided that the superintendent of public instruction hereafter possess all the powers relating to the registration of nurses, now imposed upon the regent of the medical board; (ch. 224) appropriated \$10,000 annually for two years to Dartmouth College in recognition of its eminent service to higher education; this appropriation includes ten scholarships each year, to be awarded to worthy students of the state.

*New Jersey* (ch. 83) attached a penalty of not less than \$50 nor more than \$500 for the illegal practice of architecture; (ch. 146) reenacted the dental law, repealed all former laws and increased the dental board from five to eight; (ch. 155) authorized the State College for the Benefit of Agriculture and the Mechanic Arts of Rutgers College to receive the money due agricultural colleges according to the congressional act of 1914; (ch. 169) amended the chiropody law of 1908 by accepting the degree of master of chiropody as well as of doctor surgeon chiropodist, as fulfilling the examination requirement; (ch. 260) provided that the provisions of the dental act becoming effective January 1, 1914, shall not apply to any person who had entered a dental college prior to that date; (ch. 271) amended the medical law concerning academic education, providing that subsequent to July 1, 1919 an applicant for examina-

tion must show the completion of one year in an approved college which must include the study of French or German and of chemistry, physics and biology and that subsequent to July 1, 1920, two years of college, including the study of the same subjects, will be required; (ch. 287) provided that conditional matriculation in a medical school prior to March 25, 1912 may be allowed for admission to the examination; (ch. 290) amended the nurse training act of 1912 by limiting to three the number of examinations to be held in a year and requiring a certificate of registration to be recorded in the office of the clerk of the county where application was made; (ch. 317) amended the osteopathic act of 1913 by providing that the entire board of medical examiners and not any individual of said board shall decide on all applications to practise osteopathy.

*New York* (ch. 41, 1915) incorporated, under control of the Regents, Herring College at Watertown for education in the higher branches of knowledge and more particularly in the mechanic arts; (ch. 119) authorized The American Institute of Architects, incorporated in 1857, to transact business in any part of the United States; (ch. 454) created a state board of examiners in architecture, prescribed the qualifications of applicants for registration and placed the profession of architecture under the direction of the Regents of The University of the State of New York; (ch. 381) amended the veterinary law by causing the term of one member to expire each year, requiring an annual registration fee and fixing the penalties of illegal practice; (ch. 502) amended the pharmacy law by omitting the examination of apprentices and storekeepers, materially changing the poisons schedule, etc.; (ch. 352) amended the medical law by making valid the imperfect registration of any physician who was engaged in medical practice prior to September 1, 1891.

*North Carolina* (ch. 28, 1915) provided for a partial medical examination of students at the completion of the course in anatomy, histology, physiology and chemistry; (ch. 163) incorporated a nurse training school at the State Sanatorium for the Treatment of Tuberculosis; (ch. 165) amended the pharmacy law by requiring four years' experience in pharmacy with not less than nine months' attendance in a reputable school of medicine or pharmacy; (ch. 178) reenacted the dental law; (ch. 202) authorized the North Carolina Historical Commission to appoint a legislative reference librarian, specified his duties and appropriated \$5000 to be expended under direction of the commission; (ch. 270) created a state board of architectural examination and registration and regulated the profession of architecture in the state.

*North Dakota* (ch. 119, 1915) postponed the dental requirement of one year's work in the college of liberal arts of the university from 1914 to 1919; (ch. 228) created a board of chiropractic examiners, defined chiropractic, established the requirements for licensing chiropractors and regulated chiropractic in the state; (ch. 237) created a state board of regents for the management and control of all the state educational institutions of higher learning, provided for the appointment by the regents of a state commissioner of education from without the state and repealed all former laws of these institutions that are inconsistent with this act; (ch. 236) created a state board of nurse examiners, prescribed the requirements for registration of training schools, the qualifications of nurses for the title of R. N. and regulated the practice of nursing in the state; (ch. 238) abolished the state library commission and provided that the state board of regents shall take over the duties of the commission.

*Ohio* (p. 164, 1915, § 1177, 16-20) placed the appointment of the board of veterinary examiners and the execution of the veterinary law under the state board of agriculture; required a diploma from an approved veterinary school and examination before licensing; (p. 191, 1915) created a nurses' examining committee under the state medical board, prescribed the qualifications of nurses and regulated the practice of nursing in the state; (p. 202) placed the examination and registration of applicants to practise any limited branch of medicine, such as chiropractic, naprapathy, spondylotherapy, electro-therapy, hydro-therapy, suggestive-therapy, psychotherapy, magnetic healing, chiropody, Swedish movement, massage, etc., under the state medical board; (p. 297) amended the dental law by permitting the state dental board to affiliate with the N. A. D. E. as an active member, raised the preliminary education requirement to graduation from a first grade high school of the state or its equivalent and prescribed the penalties of illegal practice; (p. 329) amended the pharmacy act by appointing an entrance examiner to determine the sufficiency of the preliminary education of applicants for examination and defined the requirements of a school considered as in "good standing"; (p. 344) provided that a penalty of from \$25 to \$500 be exacted for representing one's self to be an attorney at law unless regularly licensed.

*Oregon* (ch. 252, 1915) amended the medical law by requiring applicants for a medical license to possess a diploma from an approved medical college requiring four terms of instruction of eight months each; (ch. 286) amended the osteopathic law by requiring

approved schools of osteopathy to have a course of study of at least three years of nine months each, that subsequent to February 1, 1918, the minimum requirement shall be a high school diploma or its equivalent and a course of at least four years of eight months each and that no school of osteopathy shall include a course in materia medica, pharmacology or prescription writing; (ch. 325) created a state board of chiropractic examiners, defined its powers, provided for the examination and licensing of chiropractors, and regulated the practice of chiropractic in the state.

*Pennsylvania* (ch. 124) amended the dental act by requiring annual registration with the board of dental examiners; (ch. 144) amended the veterinary act by requiring a preliminary education of at least 15 standard high school units or their equivalent; (ch. 256) amended the pharmacy law by providing for admission to the licensing examination, of applicants from other states or foreign countries having equal standards and whose boards extend like privileges to applicants from this state; (ch. 358) amended the nurse training act by requiring a copy of the license to be filed in the office of the state commissioner of health instead of in that of the secretary of the commonwealth, by providing for the licensing without examination of registered nurses from other boards whose standards equal those of this board, by preparing and publishing a list of approved training schools, and by the appointment of a state educational director of training schools; (ch. 374) amended the C. P. A. act by forbidding special examinations and accepting in lieu of examination five years' practice as public accountant in another state.

*Porto Rico* (ch. 6, 1915) amended the medical act by providing that no person may practise without previous examination.

*South Carolina* (ch. 116, 1915) created a board of examiners of public accountants, fixed their duties and qualifications and provided for the examination, registration and licensing of certified public accountants; (ch. 123) amended the nurse training act by providing for the indorsement of the licenses of other state boards having equal standards and granting like privileges to licensees of this board.

*Tennessee* (ch. 35, 1915) established the Tennessee Polytechnic Institute at Cookeville; (ch. 44) created a state board of preliminary examiners to ascertain the educational qualifications of all applicants to practise medicine, surgery, osteopathy or any other form of the healing art except Christian science; (ch. 85) repealed all existing optometry laws, enacted a new law, defining the practice of optometry, appointing a state board of optometry, increasing

the qualifications of practitioners and regulating the practice of optometry in the state.

*Utah* (ch. 14, 1915) amended the law for admission to the bar by requiring a preliminary examination, at least three years of law study and, unless a graduate of the law school of the University of Utah, an examination before the supreme court; (ch. 65) amended the pharmacy act by forbidding the licensing or renewing of a license of any applicant who has been convicted of more than one violation of the law governing the sale of liquor and narcotics; (ch. 94) amended the optometry law by requiring a preliminary education equivalent to at least two years of high school.

*Washington* (ch. 67, 1915) provided that graduates of the law department of Gonzaga University may be admitted to the bar on motion.

*West Virginia* (ch. 33, 1915) created a board of veterinary examiners, defined its duties, prescribed the qualifications of veterinarians and regulated the practice of veterinary medicine in the state; (ch. 32) amended and reenacted the dental law without changing the educational qualifications; (ch. 66) changed the name of the West Virginia Colored Institute to West Virginia Collegiate Institute and established collegiate courses therein; (ch. 65) provided for the admission of 600 students as cadets in the military department of West Virginia University for a term of four years with the privilege of reenlisting for two additional years.

*Wisconsin* (ch. 325, 1915) amended the pharmacy law by granting registration to licensees of other boards having an equal standard with this board; (ch. 334) provided that the medical school of the state university shall consist of courses customarily covered in the first two years of a medical curriculum; (ch. 436) amended the dental law without changing the educational qualifications; (ch. 595) amended the medical law by requiring that subsequent to January 1, 1919 applicants must submit evidence of having completed the equivalent of the two years' premedical course at the university; (ch. 469) forbade "fee splitting" by physicians under penalty of fine or imprisonment; (ch. 595) amended and reenacted the nurse training law placing the regulation of the profession under the medical board instead of the board of health.

*Wyoming* (ch. 65, 1915) amended the dentistry act concerning meetings and penalties; (ch. 78) amended the pharmacy act concerning poisons; (ch. 125) created a state board of veterinary examiners, prescribed its duties and the qualifications of veterinarians and regulated the practice of veterinary medicine in the state.

## CONVOCATION

The Fifty-first Convocation of The University of the State of New York was held in Albany, October 21-22, 1915. Five of the six newly elected presidents of colleges and universities, who entered upon their duties during the year, were welcomed by President Finley and responded in brief addresses. They were Frank D. Blodgett, Adelphi College; A. R. Brubacher, New York State College for Teachers; Henry N. MacCracken, Vassar College; Sidney E. Mezes, College of the City of New York; Joseph A. Mulry, Fordham University.

## HONORARY DEGREES CONFERRED BY THE REGENTS

The following list of honorary degrees conferred by the Regents from the beginning to date is preserved for ready reference. The list gives the degrees and the names of the recipients chronologically arranged with the date of the degree's conferment.

*Doctor of laws.* Robert R. Livingston, Mar. 13, 1792; William Patterson, Mar. 20, 1792; William A. Duer, Oct. 23, 1829; Benjamin F. Butler, Jan. 28, 1834; William L. Marcy, June 1, 1844; Alexander H. Stevens, Feb. 23, 1849; Harvey Prindle Peet, Mar. 22, 1849; Salem Town, Oct. 31, 1849; Joseph Henry, Apr. 12, 1850; Valentine Mott, Jan. 24, 1851; John McLean, Sept. 9, 1854; Mark Hopkins, July 9, 1857; Peter Cooper, July 11, 1878; Thurlow Weed, Apr. 11, 1879; Martin Brewer Anderson, July 12, 1881; Aaron Lucius Chapin, July 13, 1882; Clarence A. Walworth, July 5, 1887; Seth Low, Dec. 10, 1889; William P. Letchworth, Feb. 9, 1893.

*Doctor of civil law.* William Beach Lawrence, July 29, 1873.

*Doctor of letters.* George Ticknor, Jan. 15, 1864; John Lathrop Motley, Jan. 15, 1864; Charles Murray Nairne, May 9, 1865; Benjamin N. Martin, Aug. 4, 1869; Edward North, Aug. 4, 1869; Goldwin Smith, Jan. 14, 1870; William Cullen Bryant, Aug. 3, 1870; Horatio Seymour, Aug. 3, 1870; Taylor Lewis, Aug. 1, 1871; William D. Wilson, Aug. 1, 1871; Frederick A. P. Barnard, Aug. 7, 1872; Charles Davies, July 8, 1874; Moses Coit Tyler, July 11, 1883; George Fisk Comfort, Mar. 13, 1890.

*Doctor of philosophy.* Philip P. Carpenter, Mar. 27, 1860; David Henry Cochran, Mar. 11, 1862; David Murray, Jan. 15, 1864; Alonzo Crittenden, Jan. 12, 1865; Noah Turner Clarke, Aug. 4, 1869; Malcolm McVickar, Aug. 4, 1869; Emerson John Hamilton, Aug. 3, 1870; Joel Dorman Steele, Aug. 3, 1870; Joseph

Elijah King, Aug. 7, 1872; Jonathan Allen, July 29, 1873; Alonzo Flack, July 29, 1873; Cecil Franklin Patch Bancroft, July 8, 1874; Daniel J. Pratt, July 8, 1874; Albert Barnes Watkins, July 8, 1874; Edwin Austin Sheldon, July 7, 1875; Homer Baxter Sprague, July 7, 1875; John Howard Van Amringe, July 11, 1877; John Winthrop Chandler, July 11, 1877; Stephen Gale Taylor, July 8, 1879; John Edwin Bradley, July 8, 1879; Ray Thomas Spencer, July 14, 1880; Merrill Edwards Gates, July 14, 1880; Daniel Strobel Martin, July 14, 1880; Franklin Benjamin Hough, Jan. 14, 1881; Rodney Glentworth Kimball, July 11, 1883; Edward Payson Waterbury, July 11, 1883; Joseph Albert Lintner, July 9, 1884; Willard Parker Ward, July 9, 1884; Sylvanus Adon Ellis, July 9, 1884; John M. Milne, July 10, 1890.

## ASSOCIATION OF COLLEGES IN THE STATE OF NEW YORK

At its meeting held May 21, 1914, the association voted to hold its next meeting on the second Tuesday of January. At a conference of the president and secretary, held in January 1915, it was decided that it would be better to abandon the date of January 12th and call a meeting on some later date, as no matters for discussion had been brought to the attention of either official. A request was made to the executive officers of the several higher institutions, for topics from which a docket should be prepared for the meeting. The limited number of replies to this request led to the deferring of the meeting beyond the school year under revision in this report.

As a result, no appointments were made to fill the vacancies on the committee on selection for Rhodes scholars, which necessarily holds over to the next school year and is composed as follows: Elmer Ellsworth Brown, chancellor of New York University, term to expire in 1915; William C. Rodgers, president of St Stephen's College, term to expire in 1916; Jacob G. Schurman, president of Cornell University, term to expire in 1917.

## RHODES SCHOLARSHIPS

This report for the second year of the second decade has reference only to the experience of the year and announcements for the coming year.

**Conferences.** The committee on selection of a Rhodes scholar for 1914 met in the office of the permanent secretary, Dr Augustus

S. Downing, January 16, 1914. Six candidates presented themselves, and the scholarship was awarded to Richard Ridgely Lytle, jr, of New York City, class of 1913 of Princeton. Mr Lytle is 23 years of age. His record at school and college has been a creditable one from every standpoint. He has been active in college journalism, having been an editor of the Daily Princetonian since his freshman year. His fondness for athletic sports found expression in his participation on teams representing his club at Princeton in track, football, baseball and tennis. The committee felt strongly that Mr Lytle will do New York State credit at Oxford.

The committee appointed as alternate Mr Archie Austin Coates of Columbia University.

**Committee on selection.** As no meeting of the Association of Colleges in the State of New York was held subsequent to the conference referred to above, no committee on selection was appointed; and as a result, the committee on selection appointed in November 1913 holds over to the school year 1914-15.

**Examinations.** In 1913-14 a change was made in the system of selection of Rhodes scholars in the United States. Under this system the 48 states were divided into three groups (A, B and C) of 16 states each. For the year 1916 scholars are to be elected from groups A and B; for 1917 from groups A and C; and for 1918 from groups B and C, and subsequently in the same combination year by year. The division of the states into groups for the purposes mentioned is as follows:

A	B	C
Maine	California	Arizona
New Hampshire	Washington	Delaware
Vermont	Oregon	Florida
Massachusetts	Colorado	Idaho
Rhode Island	Nebraska	Louisiana
Connecticut	Kansas	Montana
Pennsylvania	Minnesota	Nevada
New York	Wisconsin	New Mexico
Maryland	Michigan	North Carolina
New Jersey	Missouri	North Dakota
Virginia	Iowa	Oklahoma
Ohio	Georgia	South Carolina
Indiana	Texas	South Dakota
Kentucky	Alabama	Utah
Illinois	Arkansas	West Virginia
Tennessee	Mississippi	Wyoming

Qualifying examinations were held in New York State October 5 and 6, 1915, in Albany, New York, Ithaca and Rochester.

The candidates who took the examinations were:

NAME	HOME AND COLLEGE ADDRESS	DEGREE AND CLASS	WHERE EXAMINED
Darlington, Elliot.....	.....	.....	New York
Griffith, Ernest Stacey..	Columbia College, New York... 1409 Oneida st., Utica, N. Y....	1915 A.B.	Albany
Smith, T. Treadwell....	Hamilton College, Clinton, N. Y. 600 W. 122d st., New York.....	1917 .....	New York
Mackenzie, Hugh.....	Harvard College..... Millbrook, N. Y.....	1915 A.B.	Ithaca
Treble, Hector W.....	730 University av., Ithaca..... 187 Hodge av., Buffalo.....	1916 .....	Ithaca

An examination will be held in New York State in the autumn of 1916 for selection of a scholar to enter in 1917; but no examination will be held in this State in the autumn of 1918, under present rules.

The result of the examination conducted by the delegacy October 5 and 6, 1915, was reported by the local examination offices at Oxford, England, on November 5, 1915.

Mr J. B. Armstrong was awarded exemption from responsions.

The following candidates have satisfied the examiners in Latin, arithmetic, and either algebra or geometry, and will be entitled to exemption from responsions as soon as they either shall have passed in *Oxford* the examination in the Greek language only at responsions, or shall have satisfied the examiners in Greek in a subsequent examination conducted by the delegacy for the Rhodes trustees: E. S. Griffith; H. Mackenzie.

The following candidates are not entitled to any certificate: A. H. Wood; J. P. Knox; H. W. Treble.

**The American Oxonian.** This quarterly, devoted to the interests of the Rhodes scholars from America, began January 1915 and was completed with no. 4, October 1915. The first number is properly entitled, "A manual for prospective Rhodes scholars," which gives a synopsis of the requirements for the Rhodes scholarships, the Oxford system versus our own, the organization of the University of Oxford, social phases of Oxford life, books dealing with Oxford and the Rhodes scholarships, comments on the Rhodes scholarships in American periodicals, and Oxford in war time.

The second and third numbers are an expansion of this last topic of the first number, having for topics the Rhodes scholars in Belgium, the destruction of Louvain, the Y. M. C. A. army camps, Paris in war times, diary of a day in Belgium, and Mr Ransom on the case for Germany.

The last number has formal articles on the Oxford college and the American fraternity, Princeton, and the journey home. The article on the Oxford college and the American fraternity, by Hugh A. Moran, is well worthy the attention of the presidents of the colleges and universities of liberal arts and sciences in the United States.

### STATISTICS OF HIGHER INSTITUTIONS

**Comparison with foreign countries.** The year has seen considerable educational activity in lines developing closer relations between the United States and the other countries of the western hemisphere. Early in the year an earnest effort was made to assemble the latest information available from South American countries and to supply missing information from every available source.

Correspondence with administrative officers in several of the countries is in progress and is bringing together much accurate information concerning educational conditions not only in the Latin-American countries of the western hemisphere, but also in the British dominions.

Unfortunately, the conditions of Europe preclude further comparisons between the students in attendance on the higher institutions of Europe and those in institutions of the United States.

**Items of interest in New York State.** In the report on higher education last year, the gifts to higher education in the United States through a single channel, the General Education Board, were contrasted with the wants of a single higher institution in New York State, Columbia University. The annual report of Columbia for the year under revision is so suggestive that it deserves the attention of the executive officers of all higher institutions of learning. It may well serve as an exemplar of the three essentials of annual reports — promptness of issue, clearness of typography and lucidity of thought. The items of interest in this report are too numerous for mention, even in the briefest abstract, and a single statement of a proposed financial obligation must suffice for example: "in order to enable the university to carry out its part of the contemplated enterprise (with the Presbyterian Hospital) it

will be necessary to raise by gift a fund of no less than \$7,500,000 within the five-year period."

Noteworthy events occurred during the school year 1914-15 in the following institutions of higher education. The institutions of the University not specifically mentioned in the following list did not report items of special interest.

*College of the City of New York.* The accession of President Mezes and the completion and dedication of the Lewisohn stadium.

*Columbia University.* The separate organization and administration of the new School of Business, the extraordinary growth of extension teaching and of the summer session, the rearrangement of academic fees and the centralization of the entire admission machinery.

*Fordham University.* The appointment of the Rev. Joseph A. Mulry S.J., as president of the university.

*Hamilton College.* The burning of the hall, which is about to be rebuilt, and a freshman class with conditions all made up.

*New York University.* The establishment of a course in commerce combined with general education in the College of Arts and Pure Science at University Heights; and the provision for business fellowships for graduate students who will give part time to advanced commercial studies and the remainder to regular employment on salary by leading commercial corporations.

*Niagara University.* The approval by the Regents of the course of studies leading to the degree of bachelor of philosophy.

*St Bonaventure's Seminary and College.* The breaking of ground for the new \$100,000 college building given by the alumni association.

*St Francis College.* Increase of students and in the salaries of professors, with \$5000 private donations.

*St Joseph's Seminary and College (Cathedral College).* The resignation of Rt. Rev. Bishop P. J. Hayes D.D., and the inauguration of the Very Rev. W. F. Hughes D.D., as president.

*St Stephen's College.* The installation of a heating plant and the entire reconstruction of Aspinwall Hall, together with the campaign for a \$250,000 building and endowment fund.

*Union College.* The celebration of the centennial anniversary of the occupancy of the present site; the completion of the \$300,000 endowment fund; and the reunion of Union College veterans on the fiftieth anniversary of the close of the Civil War, with the granting of degrees to the veterans who had left college to enlist and were unable to return.

*College of Mount St Vincent.* The spontaneous offer of the Alumnae Association to raise a \$100,000 building fund.

*Elmira College.* The inauguration of President John Balcom Shaw and the plans for a new dormitory and dining hall to be completed for fall occupancy.

*Hunter College.* The reduction in the number of the board of trustees from 47 to 11; and the provision for an additional and alternative system of entrance requirements.

*Vassar College.* The accession to office of President Henry Noble MacCracken and the gift of Taylor Hall from Mr and Mrs Charles Pratt.

*Wells College.* The graduation of the largest class in the history of the college and a beginning of the \$500,000 endowment fund.

*William Smith College.* The installation of Miss Anne Dudley Blitz, the first woman dean.

*Adelphi College.* The selection of President Frank D. Blodgett after a lapse of three and a half years; the gift from the Adelphi College Auxiliary of a completely furnished "rest house" and the acquisition of an adjoining house to be used for the teaching of all the languages taught in the institution.

*Alfred University.* The discontinuance of the preparatory department and the movement for a new gymnasium.

*Cornell University.* The extension of military training from one year to two and the erection of a drill hall.

*New York State College for Teachers.* The giving of extension courses conducted in Albany, Troy and Schenectady with an enrolment of 193, and the adoption of a rule by which students who do not maintain a scholarship standing amounting to eight credit hours will be dropped automatically at the mid-year examinations.

*Syracuse University.* The acquisition of the Hospital of the Good Shepherd, representing a half million dollars' investment; the addition of a group of young women's homes with a common dining hall; and extensive additions and improvements at the Joseph Slocum Agricultural College Farm.

*University of Rochester.* The establishment of a women's college and the separation of men and women in all classes except advanced electives; the completion of Catharine Strong Hall and Anthony Memorial Hall; and the purchase of a new athletic field.

*Alfred Theological Seminary.* An addition of \$10,000 to the endowment fund.

*Auburn Theological Seminary.* The providing of a chair to be known as the "John S. Kennedy Chair of Religious Education."

*The Jewish Theological Seminary of America.* The establishment of a "Professorship of Jewish Codes" under the Rev. Dr Moses Hyamson LL.D. (University of London); and the publication of the fifth volume of texts and studies of the seminary, entitled "Saadya's Polemic against Hiwi Al-Balkhi."

*Rochester Theological Seminary.* A change in the arrangement of the school year from two to three terms; and the election of Clarence A. Barbour D.D., as president and professor of homiletics.

*Union Theological Seminary.* The inauguration of the Rev. Robert E. Hume Ph.D., as professor of the philosophy of history and religion, of Rev. Harry E. Fosdick D.D., as professor of practical theology, and the appointment of Rev. Daniel J. Fleming Ph.D., as director of the department of foreign service.

*Cornell University College of Law.* An action by the faculty providing for the publication of the Cornell Law Quarterly by the law school.

*Syracuse University College of Law.* The first year under the advanced admission requirement of one full year's course of study in a liberal arts college.

*Union University, Albany Law School.* "The marked increase in the enrolment and the continued success of our graduates in the state bar examinations."

*The Long Island College Hospital.* The completion of the \$200,000 "Arbuckle Memorial" building and of the "Herriman Memorial" as an extra lecture hall at a cost of \$50,000.

*New York Homeopathic Medical College and Flower Hospital.* The increase in the preliminary requirements of a year of college work in chemistry, physics and biology and the employment of a full-time professor of clinical medicine.

*New York Medical College and Hospital for Women.* The decision of the faculty to raise the entrance requirement for 1916 to one year of college grade work and the inauguration of a campaign to raise funds the results of which, so far, are the purchase of an adjoining building.

*Union University, Albany Medical College.* The complete reorganization of the institution and important changes in the personnel of the teaching staff.

*University of Buffalo, Medical Department.* The presentation to the University of Buffalo by the Women's Educational and Industrial Union of their property on Niagara square, valued at about \$100,000; change in the form of government of the medical department by which each member of the faculty may have a voice in its government.

*College of Dental and Oral Surgery.* No conditions in matriculation and the devotion of the entire time of the dean to the work of the institution.

*New York College of Dentistry.* The purchase of a site for a new college building, the abolishment of conditions in matriculation, and the limitation of the number of incoming students.

*Columbia University College of Pharmacy.* The inauguration of a complete course in pharmaceutical accounting and an organized series of evening courses, both of which have been included in the extension teaching work of the university.

*Union University, Albany College of Pharmacy.* The equipment of new chemistry and pharmaceutical laboratories, each capable of accommodating 70 students, and the enlargement and improvement of the reference library and the microscopy laboratory.

*Cornell University, New York State Veterinary College.* The official action to extend the course from three to four years; an increase of about 90 per cent in students; and the establishment of a new department of research on the diseases of breeding cattle.

*New York American Veterinary College.* Doctor Liautard's gift of his library of over 3000 volumes and his museum of rare specimens—the collection of 50 years; the employment of a master in veterinary science devoting his whole time as director and in research, and 100 per cent increase in the number of students.

*School of Chiropody of New York.* The enlargement of the teaching staff and medical members of the faculty; the establishment of a separate department of chiropodical orthopedics and the clinical treatment of 10,665 patients.

The sums spent for new buildings were: College of the City of New York, \$52,489; Cornell University, \$306,429; Hamilton College, \$36,536; Hebrew Technical Institute, \$26,292; Mackenzie College, \$14,400; New York University, \$15,493; Robert College, \$41,689; Syracuse University, \$109,652; Union College, \$3800; University of Nanking, \$34,605; University of Rochester, \$17,188; Vassar College, \$104,991.

For sites: Columbia University, \$505,535; Cornell University, \$16,500; Hamilton College, \$1810; Hobart College, \$450; Robert College, \$1320; University of Nanking, \$2103; University of Rochester, \$45,270.

Gifts and bequests during the year amounted to \$2,186,578, a decrease of \$709,579 from last year. The colleges receiving gifts of \$10,000 and above were: Alfred University, \$24,098; Auburn Theological Seminary, \$32,879; Colgate University, \$58,190; Col-

lege of St Francis Xavier, \$11,253; College of New Rochelle, \$12,000; Columbia University, \$442,525; Cornell University, \$179,632; Hamilton College, \$33,034; Hebrew Technical Institute, \$167,603; Institute of Musical Art, \$11,528; Jewish Theological Seminary, \$17,368; Keuka College, \$12,085; New York Post-Graduate Medical School, \$25,209; New York University, \$45,745; Rensselaer Polytechnic Institute, \$200,700; Robert College, \$77,313; St Bernard's College, \$19,800; St Bonaventure's College, \$12,000; Syracuse University, \$265,490; Union Theological Seminary, \$292,064; Union College, \$94,123; University of Nanking, \$80,990; University of Rochester, \$70,949.

### CHARTERS, DEGREES AND LICENSES

In 1915 an interesting volume appeared, entitled "The American College," which gave the property requirement for the incorporation of colleges and universities by the Regents as \$200,000. It cited as even more rigid the Pennsylvania requirement. It transpired that the New York requirement was \$500,000 and that the Pennsylvania requirement was adopted subsequent to the act of the New York legislature. This led to a careful study of the laws of the 53 political divisions of the United States regarding the requirements and methods of incorporating educational institutions. The same year (1915) the Bureau of Education published a bulletin (No. 5), entitled "Organization of State Departments of Education," which sets forth the reorganization and composition of state boards of education.

The trend of educational development is toward the state board of education as the administrative head of the educational system. In 37 of the 48 states in the United States there are state boards of education with functions relative to the public schools; in one other, Minnesota, there is a state board with functions relative to the public high schools only. In the other 10 states, namely, Alabama, Illinois, Iowa, Maine, Nebraska, New Hampshire, Ohio, South Dakota, Wisconsin and Wyoming, there are no such boards. Two of these 10, Nebraska and Iowa, have state boards known as boards of education. The Nebraska board has charge of the state normal schools and has no other functions; the Iowa board has charge of the state institutions of higher education, including normal schools, but has no functions concerning other schools.

"This movement toward centralization," says the report, "has come to its most complete expression in the New York board." The powers of the Regents of The University of the State of New York were set forth concisely in the report of the Illinois educational commission, issued in 1911.

Commenting on this tendency to centralize responsibility and power in the state board of education, President Butler, of Columbia University, says:

There can be no doubt about the general tendency being strongly toward greater centralization. Not only are its advantages quite apparent, but the overwhelming current of legislation and of the decisions of the courts is making it imperative. These are practically in accord, and are to the effect that in each state the school system is not local, but general; not individual schools controlled by separate communities, but a closely related system of schools which has become a state system and is entirely under state authority. Local school officials are now uniformly held to be agents of the state for the administration of a state system of education.

“It has been urged that the New York State board is going too far in exercising supervision over private institutions. But it should be definitely understood that in a very important sense there is no such thing as a private educational institution; an educational institution is by the nature of its function essentially public and should be responsive to the needs of the public which it serves. Every educational agency in the state is a part of the state’s educational system and should be under the general administrative supervision of the state board of education.”

From the facts that a study worthy of preservation in book form, and a monograph issued by a national government should be in error regarding the Regents’ power to incorporate educational institutions and their duty of supervising all schools — elementary, secondary and higher — it seems necessary to call attention in this prominent way to these inaccuracies of book and of monograph.

**Incorporation of educational institutions.** A study of the statutes of the 53 political divisions of the United States affords the following information regarding the incorporation of educational institutions. The value of this study lies in the citations rather than in the brief abstracts which show the latest legal authority for the chartering of higher educational institutions.

*Alabama* (R. S. 1907, v. 2, p. 455). The general assembly is the sole authority for the chartering of colleges and universities.

*Alaska* (L. 1913, ch. 12). Three or more residents of the territory upon subscribing to articles of incorporation that are in accordance with law and filing a copy of them in the office of the territorial secretary and with the district clerk in which the incorporation is to be located may become an educational corporation to transact the business for which it is incorporated for a term not to exceed fifty years.

*Arizona* (R. S. 1913, p. 721, et al.). Any number of persons may adopt articles of incorporation signed and acknowledged as are deeds and filed in the office of the corporation commission and with the recorder of the county of business, subsequent to the publishing six times in a newspaper of the articles of incorporation. Corporations are also created by the legislature. There is no separate provision made for the chartering of colleges and universities.

*Arkansas* (L. 1911, ch. 375, 431). Educational institutions are incorporated by the state board of education. Application is made and the desired charter presented to the board. If approved, a copy of the charter issued by the board with a certificate of approval must be filed with the secretary of state. The state board of education possesses the sole power to grant charters to educational institutions, including colleges and universities. The by-laws giving the full requirements of incorporation are found in the report of the board.

*California* (Civil Code, § 292, 296, 301, 303, 304, 649). Any number of persons desiring to establish a college or seminary may incorporate themselves under the special act for the incorporation of colleges and seminaries of learning and on filing the articles of incorporation with the secretary of state become a corporate body for the purpose specified in the articles of incorporation.

*Colorado* (Annotated statutes, 1911, § 1018-33). Educational institutions may be created under the special provisions of the corporation law or by acts of the legislature.

*Connecticut* (L. 1903, p. 150, § 1-4). Educational institutions are incorporated by special charter of the general assembly or in accordance with the general corporation law. Corporations organized under the general corporation laws may do business in any state of the Union or in any foreign country. There is no special provision made for incorporating colleges or universities.

*Delaware* (1903, ch. 394). Educational institutions are incorporated by the general assembly under the general corporation law, which authorizes a corporation to conduct business in other of the United States and in foreign countries. No separate provisions for educational institutions.

*District of Columbia* (Code 1911, ch. 18, § 574-86). Five or more persons desiring to establish an institution of learning must make, sign, acknowledge and file with the recorder of deeds a statement in accordance with law and thereby they become a body corporate for the transaction of educational business.

*Florida* (C. L. 1914, ch. 3, § 2830-39). Any five or more persons wishing to form a scientific institution of learning must present to the circuit judge a proposed charter, the intention of such application having been published in one newspaper of the county, each week, for four weeks. If the proposed charter is approved and indorsed by the circuit judge, the charter with all its indorsements is recorded in the office of the clerk of the circuit court and the subscribers and their successors become a corporation. Educational institutions may also be incorporated by special act of the legislature.

*Georgia* (Code 1911, § 2824, L. 1914, p. 58). One or more persons may petition the superior court for authority to establish a school, academy, college or university and the court may grant such person or persons and their successors corporate powers. A certified copy of the articles of incorporation, under seal of the court, shall be evidence of incorporation.

*Hawaii* (R. L. 1915, ch. 81). Secondary institutions are established by the department of public instruction. No separate provisions for the incorporation of colleges, but the superintendent of public instruction must bring any violation of the charter of an educational institution to the attention of the attorney general, who must take steps to annul the charter.

*Idaho* (R. C., p. 1195). Five or more persons may form a corporation to establish a college, academy or seminary of learning by filing articles of incorporation in the office of the county recorder and a copy in the office of the secretary of state, who will issue over the great seal of the state a certificate of the facts; the persons executing the articles and their successors become a corporate body for a term not to exceed fifty years.

*Illinois* (Annotated Statutes, 1913, v. 6, p. 6354). Universities, colleges, academies etc., may be incorporated under general or special law. A statement of the incorporators must be filed in the office of the secretary of state and if in accordance with law, the secretary issues a certificate of incorporation which must be recorded in the office of the recorder of deeds in the county where the institution is to be located.

*Indiana* (Annotated Statutes, 1914, v. 2, § 4195-4203). Five or more persons may organize a corporation for the purpose of establishing a college by filing a verified statement of their application which must be in accordance with law, with the clerk of the county where the institution is to be located and a duplicate

copy with the secretary of state whereupon the subscribers become a body corporate. Educational institutions may also be incorporated under the voluntary associations act.

*Iowa* (Code, 1897, title IX, ch. 2, p. 602; code, 1915, p. 608). Three or more persons may incorporate themselves for the purpose of establishing a college by signing, acknowledging and filing with the county recorder articles of incorporation which are in accordance with the requirements of law, and such signers then become a body corporate for a term not to exceed fifty years.

*Kansas* (G. S. 1909, ch. 23, § 1706, 1821-27). Five or more persons seeking to form a private corporation, academy, college or university must make application to the charter board on blank forms supplied by the secretary of state. If the application is approved it is indorsed and signed by the board, recorded in the office of the secretary of state and a certified copy given to the incorporators. The term of incorporation shall not exceed fifty years.

*Kentucky* (Carroll's Statutes, 1909, ch. 32, p. 504, 1929). Any number of persons may associate to form a corporation for educational purposes. Articles of incorporation in accordance with law must be signed and filed in the office of the secretary of state and in the office of the clerk of the county where the institution is to be located. When the certificate of fact is issued by the secretary, the signers and their successors become a corporate body.

*Louisiana* (1914, ch. 254). Six or more persons may form a "nontrading corporation" for literary, scientific, religious and charitable purposes, by filing in the office of the recorder of mortgages or clerk of the court in the parish of domicile, and in the office of the secretary of state, articles of incorporation. When such articles are so filed and recorded, the subscribers become a body corporate.

*Maine* (R. S. 1903, ch. 47, p. 51, 433, 442). Educational corporations are organized by special acts of the legislature or under the general corporation law. Any corporation in this state may conduct business in other of the United States or in a foreign country, except those organized under chapter 57, R. S. 1903, which are considered local.

*Maryland*. Incorporation, amendments of charter and approval of bequests of educational institutions are authorized by acts of the general assembly.

*Massachusetts* (1912, ch. 481; 1914, ch. 56). Notice of a petition to the general court for the incorporation of an educational

institution must be published for three successive weeks in such newspaper as the secretary of the board of education shall direct. The petition must be deposited in the office of the secretary of the board of education and by him transmitted to the general court with the recommendation of the board thereon. Incorporation is by the general court.

*Michigan* (L. 1911, ch. 231; R. S. 1913, § 8387-96). Educational institutions other than those under state control which are incorporated by the legislature, are incorporated under the act of 1911 by which five or more persons may become an educational corporation by filing articles of association with the secretary of state. If these are in conformity with the requirements, the secretary issues a certificate of incorporation. Colleges heretofore incorporated are entitled to the benefits of this act without change in its articles of association by certifying to the secretary of state that it complies with the required provisions. The supreme court controls all gifts, grants, bequests or trusts of the corporation and the corporation is subject to the visitation of the superintendent of public instruction and reports to him annually.

*Minnesota* (G. S. 1913, § 6522-33). Three or more persons may form an educational corporation by adopting, signing, acknowledging and filing with the secretary of state and with the registrar of deeds a certificate conforming to the requirements of law. Every college is subject to examination by the superintendent of public instruction and must report to him annually.

*Mississippi* (Code 1906, p. 374). Persons desiring to incorporate apply to the secretary of state for blank form of application for charter. When filled out, signed and acknowledged it is transmitted to the secretary of state who refers it to the attorney general for his indorsement. It is referred to the governor and if he approves, the secretary of state records the same in his office, certifies it under the great seal of the state and transmits it to the incorporators who thereby become a corporation for a term not to exceed fifty years.

*Missouri* (R. S. 1909, § 3432-45, p. 1240). Three or more persons may become a corporation by submitting the articles of agreement to the circuit court and, if approved, they are recorded with the recorder of deeds and filed in the office of the secretary of state, who issues to the signers a certified copy with its several appended certificates, which is the charter of incorporation.

*Montana* (R. C. 1907, v. 1, p. 1254). Three or more persons who desire to establish a college or seminary may incorporate

themselves by filing articles of incorporation, in accordance with law, in the office of the secretary of state.

*Nebraska* (R. S. 1913, § 617, p. 231). Five or more persons desiring to found a college or university may present a petition to the judge of the district court who shall appoint a commission to examine into the facts of the petition. If the petition is approved the judge indorses the report of the commission and it is filed with the petition in the office of the county clerk, and the petitioners then become a body corporate for the purpose specified.

*Nevada* (R. L. 1912, p. 394, 395). Three or more persons may incorporate for educational purposes, under the general corporation law. The real estate held by such corporation may not exceed one block in any town or city or ten acres in the country.

*New Hampshire* (Public statutes, ch. 147, § 1-5). Five or more persons of lawful age may associate together to form a corporation for educational purposes under the general corporation law. The articles of agreement must be filed with the secretary of state and with the clerk of the town in which the corporation is located. There are no separate provisions for the chartering of educational institutions.

*New Jersey* (R. L. 1910, p. 1595, 3080, 4294; L. 1912, ch. 315). Incorporation of educational institutions is by general act of the legislature, which must amend the charter and alter or dissolve the corporation. Colleges incorporated by the legislature may confer degrees but only on such terms and conditions as are approved by the state board of education.

*New Mexico* (C. S. 1915, § 1055-61, p. 392). Five or more persons may organize a corporation for the establishment of colleges, academies or seminaries by making, signing, acknowledging and filing with the state corporation commission a certificate in accordance with law. The constitution prohibits the incorporation of any company or institution by other than general law.

*New York* (Education Law, § 59-63; Regents Rules, § 18-24). All educational institutions are incorporated by the Regents of The University of the State of New York. None may be incorporated under other general law without the consent of the Regents. Formal application is made by the institution. After formal inspection, formal action is taken by the Regents and a formal charter is issued. The record is published in the Journal of the Regents. The administration lies with the President through his assistant for higher education. The original act was enacted in 1784.

*North Carolina* (Revised 1908, § 1135). Educational institutions are incorporated by the general assembly which may amend, alter and dissolve any corporation. There are no special provisions for educational corporations. Institutions not conferring degrees may also be incorporated by the secretary of state.

*North Dakota* (C. L. 1913, § 5005-15, 4495). Educational institutions are incorporated under the general corporation law but are subject to alteration, suspension or repeal by the legislative assembly.

*Ohio* (G. C., ch. 1, ch. 3). Five or more persons may make, sign, acknowledge and file with the secretary of state articles of incorporation of educational institutions and so become a corporation. Or they may incorporate by special act or general law in accordance with requirements.

*Oklahoma* (R. L. 1910, p. 310, § 1210, 1218, 1223; art. 14, p. 382). Educational institutions are created by statute or under the general corporation law. The constitution forbids the creation of any corporation by special law.

*Oregon* (L. O. L. § 6784; G. L. 1915, ch. 126). Three or more persons may make, sign, acknowledge and file with the corporation commissioner, a copy of articles of incorporation in accordance with law, and a second copy with the clerk of the county where the institution is located. The original articles may remain with the corporation as evidence of incorporation.

*Pennsylvania* (Purdon's Digest, v. 1, p. 610; v. 5, p. 5300). The articles of incorporation, in accordance with law, must be acknowledged before the recorder of deeds of the county in which the corporation is located, and the certified copy presented to a judge of the court of common pleas. If indorsed, it is transmitted to the superintendent of public instruction, and passed upon from an educational standpoint by the college and university council, without whose indorsement no charter giving power to grant degrees may be granted.

*Porto Rico* (L. 1911, ch. 22, p. 74). Any five or more persons who may desire to form an educational corporation may make, sign, acknowledge and file in the office of the secretary of Porto Rico a certificate of incorporation and the secretary shall issue a certificate of such filing, which constitutes the association a corporate body. Educational institutions are also incorporated by the legislature.

*Rhode Island* (G. L. 1909, p. 707). Any five or more persons may incorporate for educational purposes by signing, acknowledg-

ing and filing with the secretary of state articles of agreement in conformity with law. The secretary issues a certificate in the prescribed form under the seal of the state and the incorporators thereby become a corporation to carry out the purposes of the agreement. Educational institutions may also be incorporated by the legislature.

*South Carolina* (Civil Code, 1912, § 2862-72, p. 784). Two or more persons desiring to associate themselves for educational purposes may after three days' notice in the newspapers of the county where the organization is to be perfected file a written declaration in accordance with the required form in the office of the secretary of state, who issues to the proposed corporation a certificate of incorporation.

*South Dakota* (Compiled Laws, 1910; p. 39, 40, 139; S. L. 1915, ch. 122). Three or more persons may subscribe to articles of incorporation, which must contain the branches of learning to be taught and, if a college, the number of professorships, and upon filing them with the secretary of state he shall issue to them over the great seal of the state a certificate of incorporation. Corporations may be created by special or general act under the general corporation law.

*Tennessee* (Code 1896, § 2513-34, 2542). Five or more persons desiring to form an educational corporation must sign and acknowledge on prescribed forms before the clerk of the county court and register the application in the office of the county register where the corporation is to be located. It is then transmitted to the secretary of state and upon his certificate over the great seal of the state the formation of the corporation is declared complete. Educational institutions may also incorporate by special act.

*Texas* (C. S. 1914, v. 1, § 1121 (2); 1122-23, 26, 31, 32; 1225-30). Three or more persons may form a corporation for educational purposes by making, signing and acknowledging a charter, which must be filed in the office of the secretary of state, who shall give a certificate of record to the incorporators if the charter conforms to the legal requirements. The original charter must remain on file in the secretary's office. When the certificate is recorded the signers become a body corporate for the purpose specified.

*Utah* (C. L. 1907, p. 241). Educational institutions are incorporated under the general law of corporations not for pecuniary profit; the legislature is the sole authority for the incorporation of colleges or universities.

*Vermont* (P. S. 1906, § 4320, p. 82). Educational institutions are incorporated by the general assembly or under general corporation laws, but no institution chartered under the corporation law governing voluntary associations may confer degrees. No separate provisions for the incorporation of colleges and universities.

*Virginia* (Code 1904, p. 551). Three or more persons desiring to associate for the incorporation of a college may execute and acknowledge a certificate of incorporation in accordance with the requirements of the law, which must be presented to the judge of the circuit court of the county where the corporation is to be located. If certified by the judge, it is presented to the state corporation commission which shall judge if the applicants are entitled to the charter. If certified by the commission, it is transmitted to the secretary of the commonwealth and when properly recorded the certificate with all its indorsements is returned to the state corporation commission and incorporators and their successors become a corporate body. Any corporation may conduct its business in other states or in foreign countries.

*Washington* (G. S. § 3731-37, p. 220). Two or more persons desiring to form a corporation for a college may make, subscribe and acknowledge articles of incorporation in triplicate, one of which must be filed in the office of the secretary of state, one in the office of the county auditor where the corporation is to be located, the third to remain in possession of the corporation. When these articles are properly filed, the subscribers become a corporate body for the purposes specified in the articles.

*West Virginia* (Code, v. 2, p. 1166). Five or more persons may unite to form a corporation for a college, university or any educational institution by making and signing an agreement in accordance with the legal requirements and forms. The agreement with its required acknowledgments and affidavits must be filed with the secretary of state, who issues a certificate to the incorporators, who then become a corporation for the purposes specified in the agreement.

*Wisconsin* (R. S. 1913, § 1771-72, p. 1292; § 1990, p. 1505). Five or more persons desiring to organize a corporation for educational purposes may sign and acknowledge a certificate in the required form and file the original or a certified copy with the secretary of state. A copy with the certificate of the secretary of state showing the date of filing must also be recorded in the office of the register of deeds of the county where the corporation is

located. The secretary of state, upon a certificate of the recording, issues a certificate of incorporation to the incorporators.

*Wyoming* (R. S. 1910, ch. 280, p. 1037). Any number of persons, not less than three, may incorporate to establish an educational institution by making, signing and acknowledging articles of incorporation in accordance with law, and filing them in the office of the clerk of the county of domicile and with the secretary of state. Upon such filing the incorporators become a body corporate with power, if the institution is a college, to confer degrees and diplomas. All corporations are subject to legislative control.

**Charters.** During the year the Regents incorporated or amended the charters of the following institutions. More detailed information concerning the incorporations and the powers conferred, appears in the Journal of the Board of Regents.

*November 19, 1914*

The Daughters of Israel, Newburgh; as a "School for the instruction of Hebrew children in the language, religion and history of the Hebrew race"; provisionally for five years.

The Savage School for Physical Education, New York; stock company, with power to issue \$10,000 capital stock; provisionally for five years.

Smith Business School, Elmira; stock company, with power to issue \$10,000 capital stock; provisionally for five years.

Von Ende School of Music, New York; stock company, with power to issue \$25,000 capital stock; provisionally for five years.

*March 4, 1915*

New York Red Cross Hospital Alumnae Association, New York; as an association of graduates of the Red Cross Hospital and Training School; provisionally for five years.

Wood's Business School, Brooklyn; charter amended by increasing the number of trustees from three to four.

*June 24, 1915*

The Misses Masters School, Dobbs Ferry; charter amended by permitting salaried employees to act on the board of trustees and to allow the trustees discretionary powers in regard to assisting pupils or pensioning teachers.

New York Business Institute; charter of June 27, 1898 revoked.

*September 16, 1915*

The Historical Society of the town of Warwick; provisionally for five years.

Mary Immaculate School of Eagle Park, Ossining; as an academic and elementary day and boarding school for girls; provisionally for five years.

The New Way Automobile Corporation's Automobile School, New York; given a license, revocable at the pleasure of the Regents, to carry on a school.

The Dentists Laboratories', inc., School of Mechanical Dentistry, New York; given a license, revocable at the pleasure of the Regents, to carry on a school of mechanical dentistry.

*October 21, 1915*

Hope-Jones Unit Orchestra School, North Tonawanda; corporation dissolved, charter deemed to be surrendered and institution dropped from University roll.

*December 2, 1915*

Loyola School, New York; incorporated provisionally June 9, 1910; charter made absolute.

Music School Settlement for Colored People in the City of New York; incorporated provisionally December 12, 1912; charter made absolute.

Peking University; incorporated by Secretary of State, June 25, 1890 as "Trustees of Peking University, China"; charter amended by changing name to Peking University, granting powers and privileges of corporations created under Education Law, etc.

Cortland County Hospital School for Nurses; incorporated December 3, 1903 as Cortland Training School for Nurses; charter amended by changing name to present title.

**Degrees.** An institution holding a provisional charter is one which is in process of meeting all the requirements for an absolute charter. There are several such institutions in the State and during the year they were authorized by the Regents to confer and did so confer degrees upon their graduates as follows: bachelor of arts, 14; bachelor of science in civil engineering, 13; bachelor of divinity, 26; doctor of divinity, 1; doctor of medicine, 8; doctor of dental surgery, 209; bachelor of library science, 20; total degrees conferred by the Regents for the year, 291.

*Bachelor of Arts.* On the following 2 graduates of Keuka College.

Havens, Marietta Bates

Sergeant, Ruth Fellers

On the following 12 graduates of the University of Nanking, Nanking, China:

Chao Sien Tung  
Chen Yü Men  
Chu Shan Yuen  
Kwoh Chiong Yao  
Ling Tsüen 'g  
Lu Sien Teh

Sie Chia Sheng  
Tao Wen Tsün  
Tsü Tseh Ling  
Tsü Yü Ho  
Wu Peh Kwei  
Yang Tsong Chen

*Bachelor of science in civil engineering.* On the following 13 graduates of Mackenzie College, São Paulo, Brazil:

Barbosa, José Olympio  
Caiuby, Olavo Franco  
Cardoso, Carlos de Siqueria  
Corner, Gustavo  
da Costa, Joao Rodrigues  
Dantas, Oswaldo de Moraes  
Dantas, Renato de Moraes

de Camargo, Ignacio Franco  
de Laet, Adolpho  
Lima, Joao Bierrenbach  
Mello, Alberto de Campos  
Oliveira, Alvaro de Salles  
Vieira, Mario Loureiro

*Bachelor of divinity.* On the following 26 graduates of Union Theological Seminary:

Ballard, John Hudson  
Burrows, Millar  
Cavert, Samuel McCrea  
Cavert, Walter Dudley  
Fairbank, Alan Melvin  
Gordon, Frederick Marsh  
Gottschalk, Robert Jacob  
Hillery, Horace Everett  
Imes, William Lloyd  
Jackson, Roderick Colin  
Krolfifer, Julius Frederic  
Kurtz, Arthur Frederick  
Lamprecht, Sterling Power

Lemon, William Philip  
McClellan, Clarence Stuart Jr  
McCormick, Harry Benton  
Mowry, Thomas Garrett  
Otsuka, Setsuji  
Pannkoek, Otto Herman  
Ross, William Neely  
Rothrock, Lawrence Elwood  
Schauss, Daniel  
Showers, Ralph Walter  
Simpson, William Gayley  
Stout, Presley Downs  
Swift, Orville Brace

*Doctor of divinity.* On the following graduate of Union Theological Seminary:

Hatch, William Henry Paine

*Doctor of medicine.* On the following 8 graduates of New York Medical College and Hospital for Women:

Anderson, May R.  
Gould, Nona Smith  
Isaacson, Beatrice Frances  
McCarthy, Margaret

Pasternack, Ida B.  
Rosenzweig, Louise  
Rothstein, Florence V.  
Vandervall, Isabella

*Doctor of dental surgery.* On the following 77 graduates of the College of Dental and Oral Surgery of New York:

Alexander, George Maxwell  
Auerbach, Rachmiel  
Ball, Louise Charlotte  
Baranowsky, Isaac  
Birnberg, Frederick  
Blattstein, Leon  
Brody, David Seigmund  
Chestman, Israel  
Chodos, Maxwell Paul  
Colson, Henry Joseph  
Connolly, Joseph  
Cooperstein, Gussie  
Demetrius, Menelas  
Dorkin, Charlotte Harriette  
Englander, Henry  
Evans, George, Jr  
Flax, Joseph  
Fraenznick, Charles Augustus  
Freund, Johann Frederick  
Gayda, Victor  
Goldberg, Louis  
Goldenberg, Morris Lewis  
Graham, Edward Breckinridge  
Greenstein, Louis  
Hughes, Austin Vincent  
Hughes, Joseph Egan  
Jaffy, Charles  
Kahan, Rose Colominsky  
Kahn, Augustus  
Karp, Joseph  
Klein, Joseph Abramovitz  
Koplun, Isaac  
Kulkin, Mary  
Lenz, Harry  
Levy, Samuel Jacob  
Lifschitz, Rose  
Lipstein, Bertha  
Macher, Hugo Martin  
Maggin, Solomon

**Licenses.** Under the professional laws, the Regents conducted at stated intervals during the year examinations for admission to the practice of teaching, medicine, dentistry, pharmacy, as druggists, veterinary medicine, optometry, chiropody, for the registration of nurses, the certifying of public accountants and of shorthand reporters. The year has seen the enactment of a law registering architects, the appointment of the board, and the inception of the work of registration and examination.

It has not been the policy of the State to make the advancing requirements of its professional laws retroactive. Hence, licenses may continue to be issued under earlier statutory requirements, which are reported under the item of exemptions.

As the result of state examinations during the year, the Regents licensed 622 physicians, 5 osteopaths, 371 dentists, 385 pharmacists, 152 druggists and 37 veterinary surgeons. They registered 1199 nurses and 12 certified public accountants, 24 optometrists, 25 chiropodists and 2 certified shorthand reporters.

Under the exemptions of the various professional laws, the Regents also licensed during the year 61 physicians, 29 dentists, 47 pharmacists,<sup>1</sup> 7 veterinary surgeons, and registered 93 nurses, 2 optometrists and 5 certified shorthand reporters.

The licenses granted by the Regents during the year on examination and exemption are given in tabular form on other pages of this report.

## FOREIGN INSTITUTIONS

In this report of last year, regarding the chartering of extra-territorial institutions, there appeared a brief statement of the reasons for such action by the Regents. That report will be helpful to applicants from foreign countries desirous of incorporation and registration relations with the Regents.

During the year progress has been made toward the incorporation of Fukien Union College. A conference on higher Christian education in the Fukien province was held March 25, 1911, at which representatives of the following missions were present: the Methodist Episcopal, the Church Missionary Society (Protestant Episcopal), the Reformed Church in America, the London Missionary Society (Congregational), the English Presbyterian Missions, and the American Board of Commissioners for Foreign Missions (Congregational). Subsequent meetings were held and progress made in the preliminary organization of the university.

---

<sup>1</sup> In exchange for licenses issued under former boards of New York State.

Progress was also made through correspondence and conference looking to the incorporation and registration of Cairo University, Egypt.

Last year's report, including a review of the decade, afforded statistics from 1904 to 1914 inclusive. For this reason this year's report gives the statistics of 1915 only.

**Statistics of foreign institutions incorporated by the Regents, 1915<sup>a</sup>**

No. of institutions.....	6
Faculty .....	184
Students .....	1211
Graduates .....	99
Total property .....	\$5,698,440.82
Total receipts .....	542,219.54
Total expenditures .....	516,192.34
Salaries paid .....	231,791.00

## DEPARTMENT ACTIVITIES

The Report on Higher Education in the State of New York for the year ending July 31, 1914, was reprinted from the Eleventh Annual Report of the Commissioner of Education and appeared as Bulletin 627, dated November 15, 1916. The executive officers of all ministries and departments of education throughout the world that receive this publication are again urged to forward all laws, ordinances and regulations governing admission to the practice of the various professions that have been issued during the year, and to place this Department on their permanent lists to receive their current publications and any additional information that will prove serviceable for the cause of higher education.

**Syllabuses.** During the year work on the dental syllabus has made progress. The need for the educational syllabus now out of print is growing, and the committee will soon be at work on its revision. The pharmaceutical syllabus is in force and its distribution in satisfactory progress.

**Handbooks.** While it is the intention that the professional handbooks shall be printed annually as near the close of the legislative session as possible, the attempt is also made to include the results of the Regents deliberations at their June meeting. Important rules that were referred to committee for action preclude the issuance of the handbooks in June 1916.

---

<sup>a</sup> No report from Canton Christian nor Peking universities.

**Regents rules.** The Regents rules affecting higher education that were revised during the year, including any reorganization in the Department and necessary change for meeting the requirements of amended professional laws, are reprinted here. A painstaking effort is annually made to preserve in permanent form the new rules and decisions. For convenience of reference the interpretations of rules and decisions affecting higher education have also been preserved, and follow below in chronological order.

*Regents rules.* March 4, 1915, the Regents amended section 418 entitled, "Schools of Chiropody," by extending the requirement of high school preparation from 1919 to 1921, and that of two full-time instructors from 1914 to 1916 and by adding to the course of study four new subjects. April 16, 1915, the Regents amended the rules affecting the organization of the Department, section 3, by empowering the Commissioner of Education to designate one of the Assistant Commissioners as Deputy Commissioner, and changing the title of Chief of the History Division to Director of Archives and History, and Chief of the Division of Vocational Schools to Director of Agricultural and Industrial Education.

*Interpretation of rules.* During the year the following interpretations of rules and decisions affecting higher education have been made:

1 Registration under section 408 does not meet the requirements for admission to the Library School. April 2, 1915.

2 New York may not enter into reciprocal relations to indorse licenses earned on examination with any board of examiners established in any other state for any distinctive school of medical practice; when reciprocal relations are established they shall be inclusive of all licensees in such states, who have received licenses after examination by a composite board representing such schools of medicine. April 8, 1915.

3 Certificates approved by former representatives of Pennsylvania for higher credit than New York would have given them at the date of such approval shall not now be rated any higher than they would have been rated at the time of their approval. April 10, 1915.

4 It is not allowable to confer the B.A. degree on the completion of the first year of a law course in a registered law school. March 17, 1915.

**Enforcement of professional laws.** The administration and enforcement of the laws relating to professional education frequently require either the prosecution or the defense of actions or

proceedings in the civil courts. The subjects incidental to such litigation are the granting, indorsement and revocation of professional licenses; the maintenance of the standards prescribed by law for higher institutions, including the protection of degrees; the unlawful conduct of professional schools, and the illegal issuance of diplomas by unauthorized institutions. Several such cases involving one or more of these items have appeared in the courts. The cases reported last year and acted upon by the Regents, as they appear in the Journal of the Regents for the year January 1915 to December 31, 1915, are reported below.

*Matter of Colegrove.* It appeared that at a term of the police court of the city of Rochester, held on the 17th day of September 1914, Walter E. Colegrove M.D., having pleaded guilty to the charge of committing and maintaining a public nuisance, was convicted and sentenced to be imprisoned in the Monroe County Penitentiary for six months.

On November 13, 1914, the Medical Society of the County of Monroe preferred charges against Walter E. Colegrove and petitioned the Board of Regents and the Board of Medical Examiners to exercise the authority vested in them by section 170, chapter 45, Laws of 1909, and hear and determine the evidence submitted and to take proper action thereon.

On February 13, 1915, a committee consisting of Aaron B. Miller M. D., William G. Bissell M.D., and Ralph H. Williams D.O., for the State Board of Medical Examiners, duly appointed in accordance with law to hear and determine the charges against said Colegrove, held a meeting for hearing such charges and after such hearing made report of their findings and recommendation as follows:

- 1 We unanimously find that said charges are sustained,
- 2 We unanimously recommend that the Regents revoke the medical license of Walter E. Colegrove and that they annul his registration in the clerk's office of each county where he is registered.

Upon recommendation of the committee, it was *voted* by the Regents at the regular meeting held March 4, 1915, that the medical license of Walter E. Colegrove be revoked and his registration in Monroe county and in any other county in which he may be registered, be annulled.

*Matter of Glickstein.* The license of Abraham Glickstein, a practising physician in New York City, was revoked by the Regents on June 25, 1914, it having been proved that he was guilty of the felony charged against him. Having served his sentence of imprisonment and fine, and having been pardoned by the President, he made appli-

cation to the Regents for the restoration of his medical license, submitting letters from the federal judge who tried his case and from various other persons, indorsing his application. He requested that the Board of Regents grant him a hearing. After consideration of the matter, it was *voted*, June 24, 1915, that the matter of the restoration of his medical license to Abraham Glickstein be referred to the committee on licenses, and that a hearing be granted him before that committee on the afternoon of June 24, 1915, at half past five, in the office of Regent Elkus.

A hearing was accordingly held, and thereafter, at the meeting of July 27, 1915, on recommendation of the committee, it was voted by the Regents that the application of Abraham Glickstein for the restoration of his license to practise medicine in this State be granted.

*Matter of Becker.* At a meeting of the Board of Pharmacy held in Albany, September 14, 1915, a resolution was unanimously adopted recommending to the Board of Regents that the license of Wilhelm Becker of Jeffersonville, Sullivan county, be suspended for six months.

The violations of the provisions of the pharmacy law of which Wilhelm Becker was guilty are as follows:

September 29, 1909, illegal sale of drugs, store not registered. Paid \$50

July 26, 1912, adulterated drugs: Tr Iodine, Tr Opii. Paid \$100

August 4, 1913, sale of prohibited articles: Tr Arnica, Camphor Liniment. Paid \$50

August 8, 1914, deficient sample of chloroform liniment and prescription of Kali Iodide, i, Aqua Menthe pip qs ad, i. Paid \$50

Upon recommendation of the committee, it was *voted* October 21, 1915, that the pharmacy license of Wilhelm Becker of Jeffersonville, Sullivan county, N. Y., be and hereby is suspended for six months.

*Matter of Holmes.* At a meeting of the Board of Pharmacy held in Albany, September 14, 1915, a resolution was unanimously adopted recommending to the Board of Regents that the license of Anson B. Holmes of 17 East Market street, Corning, be suspended for one year.

The violations of the provisions of the pharmacy law of which Anson B. Holmes was guilty are as follows:

Paid \$25 July 17, 1903, for the sale of drugs by unlicensed clerk

Paid \$25 December 6, 1909, for the sale of adulterated drugs

Paid \$100 November 2, 1911, for the sale of drugs by unlicensed clerk

Evidence obtained December 9, 1913, for deficient prescription of Tr Iodine

(Churchill's) ; case pending in the hands of Attorney Remington to whom it was sent February 11, 1914

Evidence obtained December 18, 1914, for the sale of prohibited drugs by unlicensed clerk. Case sent to Attorney Remington December 22, 1914, with a recommendation for criminal prosecution.

Upon recommendation of the committee, it was *voted*, October 21, 1915, that the pharmacy license of Anson B. Holmes of 17 East Market street, Corning, N. Y., be and hereby is suspended for one year.

*Matter of Smith.* At a meeting of the State Board of Pharmacy held in Albany, September 13, 1915, a resolution was unanimously adopted recommending to the Board the revocation of the license of Frank S. Smith of 54 State street, Auburn.

The violation of which Frank S. Smith was guilty was that of unlawfully, wrongfully and feloniously selling, furnishing and disposing of otherwise than at wholesale a certain quantity, to wit: about 4 drachms of alkaloid cocaine to one Samuel S. Taylor, without any written prescription of any physician therefor, the said substance being contained in bottles and not in original packages. And the said Samuel S. Taylor was not then a pharmacist, druggist, physician, veterinarian or dentist.

For this violation, said Frank S. Smith, at a term of the Supreme Court held in the city of Auburn, in and for the county of Cayuga, on the 22d of October 1914, having been duly indicted, was arraigned upon said indictment, and by his own confession and plea of guilty, convicted of the crime of unlawfully selling cocaine as charged in the indictment. Having shown no legal cause why the sentence of the court should not be pronounced against him, he was by said court, sitting on the 22d of October, 1914, sentenced to pay a fine of \$1000.

Upon recommendation of the committee, it was *voted*, October 21, 1915, that the pharmacy license no. 1284, issued to Frank S. Smith under date of December 5, 1884, be and hereby is revoked and the registration of his certificate annulled.

**Inspections.** During the year inspections were made of the professional schools by the secretaries of the boards of examiners in the professions of medicine, dentistry and pharmacy, respectively; in colleges of liberal arts and science they were made by the Assistant Commissioner for Higher Education and his assistant, and by the same in institutions applying for charters and for charter amendments, and for determining the standing of the institution in question. This inspection work has been carried on at a great dis-

advantage, and not with the thoroughness that its importance demands, because there were no funds at the disposal of the University to pay the necessary incidental expenses. It is true that satisfactory inspection of institutions without the State has been made by the institution meeting the incidental cost, but such inspection is not based on sound principles, in that the inspector is not in the position of a disinterested observer. Again the suggestion is earnestly advocated that the Legislature make appropriation for such special inspections, to the end that the University may be able not only to inspect the professional schools in this State frequently, but may, when necessity demands, have the funds at its disposal to make inspection of professional, technical and other higher institutions in neighboring states seeking registration.

**Registration.** The registration of domestic and foreign institutions by the Regents in terms of New York standards, the fixing of the value of degrees, diplomas and certificates issued by institutions of other states and countries, which is called equation by this Department, continued with even greater volume during the year than heretofore, owing to the disturbed conditions of Europe. The formal agreements with other states, that have been developed during the decade, continued in force, but no new agreements were drawn.

Examinations conducted by certain boards and universities are accepted in lieu of Regents examinations for certificates qualifying the holder for admission to professional schools. During the year recognition was accorded the examinations of the same institutions as were reported previously, but no new examining body was placed upon the recognized list. The institutions registered by the Regents during the year, on formal recommendation of the Department, are classified under their respective titles.

**Examinations.** Regents examinations furnish the standard of graduation and of admission to colleges. Certificates called qualifying certificates admit to professional schools, while diplomas conferred by the Regents on students who satisfactorily pass the academic examinations admit to colleges of liberal arts and science. The professional examinations conducted by the Regents admit to the practice of the professions and are based on the education acquired in the higher institutions of learning. The professional examinations are authorized by special professional statutes, several of which were amended during the year. Examinations for professional licenses are conducted in January, June and September

of each year, in accordance with the requirements of the several professional statutes. Special academic examinations are conducted in January, June and September of each year, in Albany, Buffalo, New York and Syracuse, for qualifying certificates.

The official record of the dates of examination is often of advantage in connection with court procedure and with other inquiries. For this reason the dates of the examinations of the past year are appended. Examinations were held January 18-22 and June 14-18, 1915, for rural school renewable certificates; September 22-23, 1914, professional and technical students in academic subjects; January 18-22, 1915, in all academic subjects; June 14-18, 1915, in all academic subjects. Examinations were held August 10-14, 1914, for teachers professional certificates, life state certificates, special commercial certificates, special stenographer certificates; September 22-25, 1914, in all professional subjects except law, which is conducted by the State Board of Law Examiners; January 26-29, 1915, in all professional subjects; May 25-28, 1915, in all professional subjects; June 29-July 2, 1915, in all professional subjects. The State Board of Law Examiners held examinations for admission to the bar in 1915 as follows: January 19-20, April 20-21, June 22-23, and October 12-13.

During the year certificates qualifying the holders to enter the professional schools or professional licensing examinations of the State were issued as a result of the academic examinations, or on equivalent work based on credentials from secondary and higher institutions, or on equivalents supplemented by examinations. The following table indicates the extent and results of these examinations with the kind of certificates issued.

Qualifying certificates issued August 1, 1914 to July 31, 1915

**Summaries.** It has been customary to glean from the statistical tables certain classified facts for the use of the several groups of students that are interested in higher education and its several subdivisions. These are designed to contrast the year's experience with the preceding year and to form the basis of a comparison of growth in education extending over a period of years.

In 1915 the teaching force employed in the higher institutions in the State numbered 5650 as against 5450 in 1914, being an increase of 176 men and 24 women.

In 1915 there were in these institutions 52,606 students, including those unclassified and those pursuing graduate courses; an increase of 2061 students, 1657 of whom were men, and 404 women. In the regular undergraduates courses it shows an increase of 2407 students and in the graduate courses an increase of 436 students.

First degrees conferred in course during the year 1915 numbered 6167, of which 4384 were on men and 1783 on women. For the preceding year the number was 3765 on men and 1565 on women, a total of 5330. Of the 6167 degrees conferred in 1915, 2345 were given by professional schools divided as follows: theology, 62; law, 675; education, 479; medicine, 506; dentistry, 311; pharmacy, 278; veterinary medicine, 34. The honorary degrees

conferred this year numbered 91 as against 98 in 1914 and 109 in 1913.

The total amount of property, including investments, is \$173,392,412.36, an increase of \$4,764,155.25 over that reported for 1914. The receipts were \$19,464,146.89, a decrease of \$2,172,818.57 over the preceding year; the expenditures were \$17,853,442.55, a decrease of \$2,592,771.05 over the preceding year.

The salary list for higher institutions was \$7,619,038.89 for 1915, an increase of \$540,182.82 over the amount expended last year.

**Statistics.** The grand total for higher institutions, excluding foreign colleges, taken from tables 1 and 2 of the appendix, are here classified by officers of instruction, number and classification of students, degrees, summaries of property and expenditures.

## UNIVERSITIES

Drafting a constitution for the University of Illinois. In February 1911 the senate of the University of Illinois appointed a committee on the organization of the university. The Iowa experiment, noticed in this report for 1911, and the Kansas bill of 1911 (L. 1913, ch. 287), were referred to as illustrations of the changing and shifting conditions in the universities of the United States. It was felt that radical changes should come on the initiative of the universities themselves, if they were to be made, rather than from politicians; and that they should come only after a careful study of the whole situation.

It was expected that the committee would be engaged at least one year before the report would be prepared.

The preface to the printed report is dated October 1, 1915, and in it the president says: "I have given considerable attention to this problem of university administration, especially in Great Britain, France and Germany. I became quite convinced that no one of these countries had a system which we could afford to imitate to any considerable extent, nor had any one of them a system based upon careful thought and consideration in the light of the conditions of modern society. Each system was simply a historical product and full of survivals of useless or injurious members."

The committee's point of view regarding the problems of the state university is set forth in these words: "The state university is an institution of a distinctly individual type, possessing problems of its own and looking for opportunities to discharge its responsibilities to a different constituency from that which is served by institutions of other types. At the outset of our discussion it was

suggested that the problems of the state university were distinctly different from those of an institution organized under private auspices. This conviction became more and more strongly impressed upon the committee as the discussion proceeded, and when an analysis of the general problems was undertaken in connection with those visitors who on invitation met and discussed the subject with the committee the impression became a demonstration admitted frankly by both parties to the discussion. The most evident and difficult problems of the private institution are not those of the state university."

The work of the committee was "directed primarily toward an effort to ascertain and incorporate into legal form those broad general principles which constitute the foundation stones of university organization. The fundamental principles are those that concern division of authority and responsibility and contribute to efficiency of administration without loss of proper checks and balances. As far as the committee found it possible the fundamental problems have been worked out rather than the details which will naturally and necessarily come up in connection with the application of the broader principles. In fact, the final copy of the constitution first presented herewith differs from the earlier draft most distinctly in the elimination of many details and in added emphasis upon the general principles of administration."

The study was confined "to the more intimate, internal organization of the institution so furnishing in itself a reasonably well-limited topic, the consideration of which could not be carried out as well by any other body."

From its experience the committee reached certain convictions regarding effective methods of handling such a document, and these it desired to commend to the careful consideration of the senate, having in mind only the advantages that would be gained and the delays that would be avoided by the adoption of some such plan.

The recommendations of the committee "as to procedure" are well worthy the careful considerations of all committees entering upon a service of like magnitude, and the introductory paragraph of the proposed constitution may well be quoted as the latest attempt at defining a state university.

**Definition of a state university.** "The University of Illinois is an institution of higher learning initiated and encouraged by the federal government, but controlled and in the main supported by the people of the state of Illinois. Founded upon the training of

the public schools, and completing the systems of secondary and of collegiate education, it is devoted to the advancement and dissemination of knowledge in those fields of study which contribute most directly to the enrichment of life and to the well-being of society. The welfare of the student as a future citizen of the state and nation and the promotion of research are thus primary considerations in determining the proper administrative organization and educational policy which the university shall adopt."

**Montana's experience.** For several years past there has been waged in Montana a campaign for consolidation of the higher educational institutions, which was ended last year when by popular vote the question was voted down. Since then the state board of education has put into effect the Leighton law (L. 1913, ch. 90) passed by the legislature previous to the vote taken upon the question as above mentioned. This law (the Leighton) provides, among other things, that the University of Montana, located at Missoula; the School of Mines, at Butte; the Agricultural College, at Bozeman, and the Normal School at Dillon, shall be collectively known as the University of Montana; and that a chancellor shall be provided who shall maintain his residence in Helena and have control of the divisions of the newly created university.

The state board of education has recently chosen as chancellor, Dr E. C. Elliott, who was formerly in charge of the School of Education at the University of Wisconsin. His term of office began February 1, 1916.

**College presidents' reports.** A recent writer in commenting on the fact that very few college reports are received by such representative libraries as Teachers College (Columbia), the New York Public Library, and the Library of the United States Bureau of Education, says: "The most important academic research — potentially — is study by colleges and universities of their own work and opportunities."

From the number of colleges whose reports of president or trustees of 1914 were not found at Teachers College or the New York Public Library (359), and from the statement that for 61 colleges having over 36,000 students and spending nearly eight million dollars annually, Teachers College records that no report is published, I was led to make a special study of the fact as it pertains to New York State higher institutions.

We are positively informed that 13 of the 33 colleges and universities within the State of New York publish reports, namely, Alfred University, Barnard College, Columbia University, Cornell Univer-

sity, Elmira College, Hunter College, New York University, New York State College for Teachers, Rochester University, Syracuse University, Union University, Vassar College and Wells College.

Nineteen publish no report. These are Adelphi College, Cathedral College, Colgate University, College of Mount St Vincent, College of New Rochelle, College of St Francis Xavier, College of the City of New York, D'Youville College, Fordham University, Hamilton College, Hobart College, Manhattan College, Niagara University, St Bonaventure's College, St Francis College, St John's College, St Lawrence University, St Stephen's College and William Smith College. Canisius College was not heard from.

If in the same ratio colleges and universities of the United States do not print reports of presidents or trustees, then the reports of the presidents of  $\frac{19}{32}$  of the 695 colleges and universities of the United States (412) could not under any circumstances be found in libraries, for they are not published. Nevertheless, the writer's opinion of the importance of these reports is worthy of careful consideration by the chairmen of the boards of trustees and the presidents of the colleges and universities.

**The differentiation of the university from the college.** In the Eighth Annual Report on Higher Education there was raised an important question regarding the differentiation of college and university. It was contemplated that the matter should be discussed by the Association of Colleges in the State of New York, but the question was laid aside in the interests of the University scholarships. From that time the discussions of the subject in associations of various characters have been reported and referred to in these reports on higher education. The Ninth Annual Report gave the action of the Association of American Universities at its Illinois meeting, and showed that the evolution in progress is a world movement, by a brief summary of the proceedings of the Congress of Universities, held in London, England, July 1912. The proposed requirements for the college entrance diploma also appeared, as well as a tentative college curriculum.

In the same annual report the Assistant Commissioner for Secondary Education discusses, under the caption "Certification of Secondary School Teachers," the licensing of teachers in secondary schools, and includes a study of the statutory requirements of the several states of the Union that have such requirements. He suggests requirements for the secondary teachers certificate to be based on undergraduate and graduate work in colleges of liberal arts and science.

The Eleventh Annual Report continued the study and discussed the question, "By what authority do the Regents rank institutions of higher education, and what obligations rest upon them to classify colleges and universities?" These reports are available for those interested in this important question, and should be consulted by those responsible for the administration of the colleges and universities of the State in their preparation for the discussion of the proposed amendments to Regents Rules.

During the year considerable progress has been made in the revision of the lists of colleges and universities registered by the Regents under sections 401, 403, and 404. At the same time, correspondence with the university authorities manifests clearly a desire for closer relations and more concerted action in the conferring of undergraduate and graduate degrees in course, as distinguished from degrees conferred *causa honoris*. A noteworthy debate and vote was reported in the Association of American Universities, that shows a strong disposition on the part of the leading institutions of the country to lessen and limit honorary degrees. An effort is being made in the State, for example, to standardize the theological degrees and differentiate the honorary theological degrees from those conferred on resident study. While the time does not seem ripe for an agitation to stop the further conferring of honorary degrees, it is clear that the master's degree in arts and science and the doctor's degree, not only in philosophy but in the several professions, should be conferred on resident work only.

**Summary.** Again this report gives a summary of the students in attendance on the universities of the State. The statistics from the foreign institutions classified in this group are omitted. In 1915 there were 3027 students in graduate courses, of whom 1923 were men and 1104 were women. The total number of higher degrees conferred during the year was 960, of which number 647 were conferred on men and 313 on women. The total number of honorary degrees conferred was 49.

### COLLEGES

**The New England Association of Colleges and Secondary Schools.** The thirtieth annual meeting of the association was held at Boston University, October 29-30, 1915. The president of Mount Holyoke College, Mary E. Woolley, presided. Principal Alfred E. Stearns, Phillips Academy, Andover, was elected president for the ensuing year; and Professor Walter B. Jacobs, Brown University, secretary-treasurer.

**Association of Colleges and Preparatory Schools of the Middle States and Maryland.** The proceedings of the twenty-eighth annual convention, held under the auspices of the College of the City of New York, November 27 and 28, 1914, contains two general topics of interest in higher education: first, "Has the Unit System Fostered or Retarded Sound Education?" by Professor Arthur H. Quinn of the University of Pennsylvania; and second, "What Standards Should Be Used in the Classification of Colleges?" discussed by Samuel P. Capen of the National Bureau of Education. Both topics were discussed by experienced school men and are worthy of careful consideration by those responsible for the standardization and classification of secondary and higher institutions. The fourth test or characteristic which one of the speakers affirmed must be found in the work of any classification that is to be effective or to accomplish its purpose, is worth rereading: "The classification, to have any validity or significance at all, must be perpetually renewed; any classification that is put upon the shelf is obsolete almost as soon as it is printed."

**North Central Association of Colleges and Secondary Schools.** The twentieth annual meeting of the North Central Association of Colleges and Secondary Schools was held at Chicago, Ill., March 19-20, 1915. It celebrated the twentieth anniversary of the organization of the association. The president, in his address, stopped a moment to survey the path over which the association had traveled, and reviewed in five-year periods the four steps that had been taken, before outlining his suggestions for the steps to come, in which he recommended (1) a revision of the rules for accrediting lists; (2) urging all universities to avail themselves of the association; (3) the appointment of a committee to recommend a method for securing uniform legislation in connection with the conferring of degrees, and the use of the terms college and university; (4) the commission to evaluate credits so as to encourage consecutive work; (5) the appointment of a committee to revise the constitution; (6) the appointment of a committee to consider the advisability of incorporating the association; (7) the consideration of the employment of a permanent director. The commission on standards reported the lists of colleges and universities (1915-16), and gave the standards of accrediting colleges and universities for 1914, which are quite elaborate.

**New England College Entrance Certificate Board.** The thirteenth annual report of this board, which contains the proceedings of the annual meeting held in Boston, on May 14, 1915, gives

the New England colleges represented in the board. A recommendation from the executive committee, that was adopted by the board, is of interest in connection with the action of the national boards already reported. The delegates were requested to represent to the appropriation officers of their institutions that the list of approved schools should be followed closely in accepting certificates.

**Registration.** Colleges and universities registered during the school year August 1, 1914 — July 31, 1915, with the degrees and the sections of recognition, are:

*Alberta, Canada*

University of Alberta, Edmonton, B.A. § 403.

*New Brunswick, Canada*

University of New Brunswick, Fredericton, B.A., B.S. § 404.

*China*

University of Nanking, Nanking, B.S., Ph. B. § 403.

*Turkey*

Robert College, Constantinople, B.S. in M.E., in E.E., in C.E., in Min. E. § 403.

*California*

Throop College of Technology, Pasadena, B.S. (gen.) § 404, B.S. in E.E., in M.E., in C.E., in Ch. § 403.

*Delaware*

Delaware College, Newark, B.A., B.S. § 404, B. A. in E., B.S. in E. § 403.

*District of Columbia*

Georgetown University, Washington, B.S. § 404.

Trinity College, Washington, B.S. § 404, B.L. § 403.

*Illinois*

Decatur College, Decatur, B.S., (gen.) § 404, B.A., (spec.) B.S. (spec.) § 403.

University of Illinois, Urbana, B.A. in Med. (7yrs) § 403, § 402.

Wheaton College, Wheaton, B.A. § 404.

*Indiana*

Butler College, Indianapolis, B.A., B.S. § 404.

*Iowa*

Iowa Wesleyan College, Mt Pleasant, B.A., B.S. § 404.

*Kansas*

College of Emporia, Emporia, B.A. § 404.

Friends University, Wichita, B.A. § 403.

*Kentucky*

Transylvania University, Lexington, B.A., B.S. § 404.

*Maine*

Bates College, Lewiston, B.S. § 404.

University of Maine, Orono, B.S. in Agr. § 403.

*Maryland*

Hood College, Frederick, B.S. in H. Econ. § 403.

*Massachusetts*

Boston College, Boston, B.S., Ph. B. § 404.

Worcester Polytechnic Institute, Worcester, B.S. in Ch. § 403.

*Minnesota*

University of Minnesota, Minneapolis, B.A. in Ed. § 404, B.S., B.S. in Ch. and Ch. E., in E. M., in E. M. in Geol., in Met. E. § 403.

*Mississippi*

University of Mississippi, University, B.A., B.S. § 404, B.E. § 403.

*New Jersey*

College of St Elizabeth, Convent Station, B.S. (gen.) § 404, B.A., (spec.), B.S. (spec.) § 403.

St Peter's College, Jersey City B.A. § 404.

*New York*

Canisius College, Buffalo, B.S. § 401.

Fordham University, Fordham, Ph. B. § 401.

Niagara University, Niagara University, Ph. B. § 404.

Syracuse University, Syracuse, B.S. in Agr., B.L.E. § 403, B.O.E., B.L.S. § 404

Washington Square College, New York, B.A., B.S. § 401.

*North Carolina*

Wake Forest College, Wake Forest, B.S. in Med. § 403.

*North Dakota*

Fargo College, Fargo, B.A., B.S., § 403.

*Ohio*

Baldwin-Wallace College, Berea, B.A., B.S. § 404, B.S. in H. Econ. § 403.  
 Defiance College, Defiance, B.A. § 403.  
 Heidelberg University, Tiffin, B.A., Ph. B., B.S. § 404, B.L. § 403.  
 Lake Erie College, Painesville, B.A. § 404.  
 Oxford College for Women, Oxford, B.A. § 403.  
 Wittenberg College, Springfield, B.A. § 404.

*Oregon*

St Mary's College, Portland, B.A., B.S. § 403.

*Pennsylvania*

Lincoln University, Lincoln University, B.S. § 403.  
 Pennsylvania State College, State College, B.A. in Ed. § 404, B.S. (spec.) § 403.  
 University of Pennsylvania, Philadelphia, B.S. in Ed. § 404.  
 Waynesburg College, Waynesburg, B.A., B.S. § 403.  
 Westminster College, New Wilmington, B.A., Ph. B., B.S. § 404.

*Texas*

Agricultural and Mech. College, College Station, B.S. § 403.

*Virginia*

Hampden-Sidney College, Hampden Sidney, B.A., B.S. § 404, B.L. § 403.

*Washington*

University of Washington, Seattle, B.S., § 404, B.S. (spec.) § 403.

*Wisconsin*

Beloit College, Beloit, B.A., B.S. § 404.  
 Ripon College, Ripon, B.A. (gen. & ed.) § 404, B.A. (spec.) § 403.

**Summary.** This report continues the separate summary of the students in attendance on the colleges of liberal arts and science distinct from the universities with their graduate students. In 1915 there were 33 colleges of liberal arts and science, of which 17 were for men, 9 for women, and 7 for men and women.

There were 1531 teachers, 1154 men, 377 women, of whom 566 men and 2 women were in colleges for men, 174 men and 330 women in colleges for women, 414 men and 45 women in colleges for men and women.

There were 14,474 students in attendance, of whom 7878 were men and 6596 women. There were 5713 men and 247 women in the colleges for men, 4483 women in the colleges for women, and 2165 men and 1866 women in the colleges for men and women.

## PROFESSIONAL SCHOOLS

**Professional legislation, 1914.** The laws or rules affecting colleges, universities, professional and technical schools that were amended in some particular during the year, as well as the other educational legislation affecting elementary and secondary schools, appear in Law Pamphlet 3, University of the State of New York Bulletin 598, dated September 1, 1915.

Several amendments were made in the professional laws to make valid imperfect registration. The medical act was amended (L. 1915, ch. 552) by allowing any physician engaged in the practice of medicine prior to September 1, 1891, and who had failed to register, to receive a certificate of registration from the Regents, on the unanimous recommendation of the state board; chapter 53 provided for registration in case of the Legislature creating a new county from an existing one; the same amendment was made in the dental law (ch. 54), in the veterinary law (ch. 52), and in the chiropody law (ch. 55); chapter 302 permitted physicians and surgeons to register their authority to practise in the county of Bronx. The practice of veterinary medicine was materially amended (L. 1915, ch. 381) by the annual appointment of members of the state board, the requirement of annual registration with an annual fee, and the transfer of the power of action for violations from the incorporated veterinary societies to the Attorney General. The general business law was amended (L. 1915, ch. 454) regulating the practice of architecture, by creating a board of examiners, prescribing the requirements for registration and for the title of R.A., and placing the enforcement of the law with the Board of Regents. The pharmacy law was amended (L. 1915, ch. 502) by providing that experience may be acquired in a registered drug store as well as in a pharmacy, omitting the examination of apprentices and storekeepers, providing for prosecution by the board and adding to the list of poisons. Section 1132 of the Greater New York charter was amended (L. 1915, ch. 161) by providing for the gratuitous instruction in the College of the City of New York of students or employees of the city, in vocational subjects and civic administration; section 1140 of the charter was also amended (L. 1915, ch. 516) by the appointment by the mayor of a board of trustees for Hunter College in the place of the New York City board of education, formerly trustees of the college. Various educational local laws were enacted not of general interest.

**Advisory Councils.** An important and exceptional gathering occurred at the Education Building, December 16, 1914. Separate meetings of the several professional councils were held on the morning of the 16th, under the chairmanship of the Regents. There was a free discussion of such amendments to the several professional practice acts as in the judgment of the conferees should be made for the betterment of professional practice, the better administration of the law, and the more efficient means for its enforcement.

In the afternoon, separate councils united in a joint session at which President Lowell of Harvard University addressed the assembly on "Medical Education," which precipitated a general discussion. It was deemed undesirable by the chair to undertake action upon general business at the December 16th meeting of the Board of Regents.

At the meeting of the Board of Regents held January 26, 1915, the Assistant Commissioner for Higher Education presented amendments to the public health law in relation to the practice of optometry, veterinary medicine and surgery, pharmacy, dentistry, medicine and nursing, which had been prepared in accordance with the recommendations of the various professional councils that met December 16th.

After a discussion of these proposed amendments it was the opinion of the Board of Regents that they should be enacted in such form as to leave the Regents greater freedom in the management of the professions which are under their supervision, and that when this had been accomplished some of the proposed amendments should be embodied in the Regents Rules.

**Summaries.** In 1914 there were 1255 students in attendance in the theological schools of the state; 3110 in the law school; 3205 in the schools of education; 3584 in the medical schools; 1232 in the dental schools; 1093 in schools of pharmacy; 142 in veterinary schools; and 4502 in 130 registered nurse training schools from which reports were received.

In 1915 there were 1347 students in attendance in the theological schools of the state; 3276 in the law schools; 3606 in the schools of education; 3561 in the medical schools; 1546 in the dental schools; 1220 in the schools of pharmacy; 136 in veterinary schools; and 4766 in registered nurse training schools from which reports were received.

### Theology

Schools of theology receive recognition by the University and are registered by the Regents under section 406 of the Regents Rules.

**Registration.** No schools of theology were registered by the Regents during the year.

**Summary.** Detailed information concerning the numbers of students, officers of instruction, degrees granted, and courses offered in the several schools of theology, is given in table I, exhibit H. In comparison with 1914 the theological schools of the State show for 1915 the same number of institutions, 15 more instructors, and 92 more students.

### Education

Schools of education receive recognition by the University and are registered by the Regents under section 408 of the Regents Rules.

**Registration.** Registration is effected on formal application to the Regents in the same manner as the other professional schools. The schools of education registered during the school year August 1, 1914 to July 31, 1915 were:

#### *Illinois*

Decatur College, Decatur; B.A. in Ed. § 408b. President, George E. Fellows.

#### *Minnesota*

College of Education, University of Minnesota, Minneapolis; B.A. in Ed. § 408b. Dean, George F. James.

#### *New York*

Canisius College, Buffalo § 408c. President, George J. Krim.

Washington Square College, New York; B.S. in Ped. § 408c. Chancellor, Elmer E. Brown.

William Smith College, Geneva; B.A., B.S., § 408c. President, Milton H. Turk.

#### *Pennsylvania*

School of Education, University of Pennsylvania, Philadelphia; B.S. in Ed. § 408b. Dean, Frank P. Graves.

#### *Tennessee*

George Peabody College for Teachers, Nashville; B.S. (groups a-f, j and k) §408b. President, Bruce R. Payne.

#### *Washington*

College of Education, University of Washington, Seattle; B.A. in Ed., B.S. in Ed. §408b. Acting President, Henry Landes.

*Summary.* Detailed statistics concerning the various schools of education for the year are given in table 1, exhibit H. In comparison with 1914 the schools of education of the State show for 1915 the same number of institutions, 14 more officers of instruction, 401 more students in attendance and 121 more graduates.

*Examinations for Renewal of College Graduate Limited Certificates, August 1914-May 1915*

SUBJECTS	PAPERS WRITTEN	PAPERS ACCEPTED
Psychology .....	110	95
History of education .....	134	85
Principles of education .....	100	86
Methods in English .....	67	50
Methods in foreign languages .....	71	64
Methods in mathematics .....	31	23
Methods in science .....	27	27
Methods in history .....	54	45
Total .....	594	475

During the year there have been issued 323 provisional certificates to graduates from approved pedagogical courses in colleges and universities; 184 college graduate professional permanent certificates; 273 limited certificates and 75 life certificates. The total number of certificates issued was 855; number renewed 80. This aggregates 935 as against 969 reported last year.

### Law

The thirty-eighth annual meeting of the American Bar Association was held at Salt Lake City, Utah, August 17-19, 1915. President Peter W. Meldrim of Georgia presided. The chronological list of papers read before the association and the papers read before the section of legal education is a most interesting and helpful bibliography.

The proceedings of the section of legal education are of more interest from the educational standpoint than the proceedings of the association itself, for they are of special interest to three elements: the teachers who prepare applicants for admission to the bar; the state examiners who test the fitness of applicants for admission to the bar; and the practising lawyers who absorb them into the general body of the bar.

For that reason, gentlemen, it seems to me peculiarly unfortunate that the Association of American Law Schools, as an official body, has been prevented . . . from meeting with us this year. . . . It is to be hoped that in

future some arrangement can be made by which there may be more positive and decided cooperation between the Association of American Law Schools and the section of legal education of the American Bar Association, and also that there may be more positive and direct cooperation and interaction between the law schools and the bar examiners.

“The Importance in the Practice of the Law of a Broad General Education” was discussed in a paper at the second session of the section, which was followed by a paper “Should the Standard of Admission to the Bar be Based on Two Years or More of College-grade Education? It Should.”

These three items show the present trend of opinion by the leaders of the legal profession, namely: first, the necessity for closer cooperation of the schools, the board and the profession; second, a broader general education as an essential part of the lawyer's equipment; and third, that the standard of admission to the bar should be based on at least two years of college education. The paper on the standard of admission is so brief, so clear and so pertinent to the conditions prevailing in New York State that it is reproduced in its entirety in this report, in the expectation of its influencing leaders of the New York State bar to secure for this State the closer cooperation, the broader general education and the higher standards that shall enable New York State to continue its leadership in legal education.

#### **Should the Standard of Admission to the Bar be Based on Two Years or More of College-grade Education? It Should**

1 The reason is not merely that modern law school education calls for mature and well-trained students. More emphatic and obvious than this, the professional work at the bar and on the bench requires well-educated men.

*a* The problems of litigation and of legislation demand the best trained minds. The coming generation will see more difficult problems of reconstruction and restatement than have arisen in America for a century past. The best trained American minds must handle them. And no one doubts that, on the whole and in the average, a university training best develops all the latent powers that are to be used in the world's work.

*b* Otherwise, the legal profession will be left far behind by the men of other callings. It is behind today. Thousands and thousands of young men are today taking a college education to fit them for business life, for farming, for journalism, for engineering, for applied industrial sciences. The law as a profession has lost its prestige of leadership in public thought. It will never regain it so long as it declines to insist that its followers shall have the best attainable education.

2 *Objections.* (1) That the poor boy can not afford to go to college. *Answer:* The fact is just otherwise. Every state in the union provides free a complete college education, the same as it does a high school course. There is absolutely no obstacle to a poor young man's getting a college education.

Thousands are doing it all over the country. The poor young man who will not make the effort to do it is either too indifferent to its importance, or too lacking in stamina. That class of young men the legal profession can well afford to lose. (2) That the law schools should be left to make the requirement, if they choose. *Answer:* The law schools include only a small portion of the annual grist of new lawyers, and their influence alone is inadequate. Moreover, only a small proportion of the law schools can or will make the requirement voluntarily. Unless the state embodies it as a rule for admission, the bulk of the schools will continue to meet the demand for "the easiest way."

3 The bar is overcrowded with incompetent, shiftless, ill-fitted lawyers, who degrade the methods of the law and cheapen the quality of services by unlimited competition. The number of lawyers should be reduced by one-half. As a method of elimination for the future, a stricter requirement for preparation is a sensible method. And a requirement of two years of college is a rational and beneficent measure for reducing hereafter the spawning mass of promiscuous semiintelligence which now enters the bar. The legal profession all over the world is a selected, limited group; and such is the Anglo-American tradition of the past. We must restore this tradition, if the profession of the law is to regain its leadership in American thought.

**Association of American Law Schools.** The fifteenth annual meeting of the Association of American Law Schools was held at Chicago, Ill., December 28-30, 1915. Professor Harry S. Richards of the University of Wisconsin presided, and presented a survey of the progress in legal education. There was also a review and discussion of the Redlich report on legal education in the United States. Prof. William Draper Lewis of the University of Pennsylvania regretted that the president's address could not have been heard by the members of the bar who are not teachers in law schools and by the boards of law examiners. He suggested that the time has now come to substitute for the legal section of the American Bar Association the Association of American Law Schools. The president's report proved so important a document that the executive committee was recommended to print it separately and to send copies to all members of the American Bar Association and to members of the state boards of examiners. Several statements in the address are so pertinent to New York State conditions that they are reproduced here in connection with the selections from the report of the American Bar Association:

No figures are available as to the number of those studying in law offices or by correspondence. The number of the latter must be very large, since a majority of these schools appear to be prosperous and all of them are organized as commercial ventures. If we compare the growth of law schools with the growth of other callings classified as professional, we find that law has outstripped all but veterinary science. . . . Fifteen years ago medical

education was even more commercialized than law, yet today the commercial medical school has been eliminated. Although most states by law require students of medicine to attend medical schools, no state in the union requires attendance at a law school or attempts to make any distinction between the man that comes from the office, a poor school, or a good school; indeed, the common type of bar examination favors the poor school. . . . If you examine the class rolls of the night schools in our great cities, you will encounter a very large proportion of foreign names. Emigrants and sons of emigrants, remembering the respectable standing of the advocate in their old home, covet the title as a badge of distinction. The result is a host of shrewd young men, imperfectly educated, crammed so that they can pass the bar examinations, all deeply impressed with the philosophy of getting on, but viewing the Code of Ethics with uncomprehending eyes. . . .

The most striking feature of law school development during the past fifteen years has been the rapid adoption of the case method of study. . . . Another change has occurred that is even more significant. . . . Twenty years ago . . . the faculties were composed either of men in active practice or men who having passed middle life had retired to the law school from the bar or the bench. . . . The demand came for men who were interested in teaching and investigation and who were willing to devote their time and thought to legal education. This idea extended rapidly, and today the majority of the teachers in the schools of this association are devoting their entire attention to teaching.

The report by Professor Redlich, for the Carnegie Foundation, was regarded as one of the significant things in legal education. Professor Stone of Columbia University in opening the discussion on the report said:

We now have for the first time a comprehensive statement of the origin and development of one of the most notable educational movements which this — or indeed any — generation has witnessed . . . a document remarkable alike for its accurate portrayal of the case system . . . and for its just appreciation of the true significance of this development in American legal life. . . . The primary task undertaken by him (Professor Redlich) was the investigation and appraisal of an educational method, and not the investigation and appraisal of educational institutions. .

**The New York State Bar Association.** The thirty-eighth annual meeting of the New York State Bar Association was held in Buffalo, January 22–23, 1915. The Honorable Alton B. Parker presided and delivered the president's address. The annual address was delivered by the Honorable William Howard Taft, on "State Constitutions."

In presenting the President of the University of the State of New York and the Commissioner of Education, the president of this association stated:

There is another court of final resort in this State besides the Court of Appeals. It likewise is located at Albany. That court passed on a very

important question the other day. . . . It rather looks as if the decision of that court was approved by the court which the light-minded have sought to involve with recall jurisdiction.

The Commissioner asked his audience to think for a moment under what variegated conditions men are trying to live, labor and pursue happiness lawfully between Montauk Point, Rouses Point and Niagara Falls. He employed nine illustrations of the polyglot, polygenetic, polyarchic, polycephalous collection of creatures found within those boundaries.

**Registration.** Schools of law during the school year August 1, 1914 to July 31, 1915 received recognition by the University under the rules of the Regents and of the Court of Appeals, in addition to those announced in the decade report, as follows:

*District of Columbia*

School of Law, Catholic University of America, Washington. Dean, Thomas C. Carrigan.

*Maine*

College of Law, University of Maine, Bangor. Dean, William E. Walz.

*Tennessee*

College of Law, University of Tennessee, Knoxville. Dean, Henry H. Ingersoll.

*Washington*

School of Law, University of Washington, Seattle. Dean, John T. Condon.

**Summary.** Detailed statistics concerning the various law schools for the year are given in title 1, exhibit H. In comparison with 1914 the law schools of the State shows for 1915 the same number of institutions, 7 less officers of instruction, 166 more students, and 152 more LL.B. degrees conferred on completion of course. Through the courtesy of Franklin M. Danaher, secretary of the State Board of Law Examiners, the following statistical report is available:

Statistical report for 1914 and 1915

EXAMINATION	NUMBER EXAMINED		NUMBER FAILED		NUMBER ADMITTED		PER CENT OF FAILURE

All who were refused certificates of having passed in all the groups are reported as having failed, many of whom, however, received pass cards for having successfully passed one of the groups.

### Medicine

The tenth annual report of the Carnegie Foundation for the Advancement of Teaching is silent regarding medical education, a somewhat noteworthy fact.

**Council on Medical Education.** The report of the eleventh annual conference of the Council on Medical Education is published in volume 10 of the American Medical Association Bulletin for March 15, 1915. Dr Arthur Dean Bevan of Chicago presided over the conference which, from standpoint of attendance, is reported to have been the largest in the history of the council. In his opening address the chairman called attention to the new scheme of classification, the third, which has finally reached the classification developed in this Department prior to 1904. The experience of New York State supplemented by this experience of the Council on Medical Education may prove helpful to other professions advancing their requirements. The new grouping of the colleges has a definite purpose which had been attained in this Department in 1900, namely, to group the institutions recognized into three classes: an acceptable group, class A of the council, section 401 of the Regents Rules; class C, now including a limited number of schools believed unworthy of recognition, section 404 of the Regents Rules, made up of those the recognition of which must be determined in each individual case; class B, a group of schools made up of those that are doubtful, section 403 of the Regents Rules, constituting the minimum colleges defined as such by the rules of the Court of Appeals.

**Association of American Medical Colleges.** The twenty-fifth annual meeting of the Association of American Medical Colleges was held in Chicago, February 17, 1915. "The Medical Career" was the president's address by Dean Isadore Dyer of Tulane University, Louisiana. President Pritchett of the Carnegie Foundation addressed the association on the "Classification of Medical Schools." Other addresses were given by M. G. Seelig of St Louis University, on "Some Fallacies in the Argument Against Full-time Clinical Instruction"; by F. C. Waite of Western Reserve University, on "Minimum Expense of Maintenance of First Two Years of an Acceptable Medical School"; by John L. Heffron of Syracuse University, on "The Minimum Expense of Maintenance

of the Clinical Department of an Acceptable Medical College"; and by John Sundwall of the University of Kansas, on "The Present Relations Between the College and the Medical School."

**American Academy of Medicine.** The fortieth annual meeting of the American Academy of Medicine was held at San Francisco, June 25-28, 1915. The annual address by Chancellor Jordan of Leland Stanford University discussed "The Relation of Medicine to the Peace Movement," a digest of which appears in *The Journal of Sociologic Medicine*, together with other interesting papers of the academy. A noteworthy action recommended by the council was consummated by the academy, in that a fund to be known as the Charles McIntire fund was created, the interest thereof to be used for the promotion of some phase of sociologic medicine, its specific purpose to be determined by Doctor McIntire during his lifetime and thereafter as the council may direct each five years. The leadership of the academy is shown in its ability to adapt its work to changing conditions, and the quiet power of Doctor McIntire can be read between the lines of its publication. In his thesis that he defended at the thirty-ninth meeting of the academy, entitled "Rigidity of the Curriculum an Obstacle to the Progress of Medical Education," Doctor McIntire refers to his paper of 1893, entitled "Medical Education in the United States; from Chaos toward Cosmos." It was under the inspiration of the academy and by request of its secretary that the University of the State of New York prepared and published its "Professional Education in the United States — Including Medicine."

The February 1915 issue of the *Bulletin of the American Academy of Medicine* is number 1 of volume 16, under its new title, "The Journal of Sociologic Medicine." In its leading article this journal attempts to define the field of sociologic medicine as distinct from the various branches of medicine:

It is surprising how the entire field, vast as it is, becomes unified as one meditates upon the subject. So while an intensive study of each division is necessary for the greatest results in that division, there is need for the broader view and safer counselings by bringing various subjects together in a single publication like the *Journal* and discussing them as at the meetings of the academy.

**Reciprocity.** Agreements to indorse licenses earned on examinations have been entered into between New York and other states of the union from time to time, and the list in force was published in the *Decade Report*. During the year correspondence was in progress with several states, which did not, however, materialize in formal agreements.

*Registration.* Registration is effected on formal application to the Regents, as in the case of other professional schools. Students of these registered schools receive recognition for such subjects of the course as are of general and cultural value in lieu of Regents examinations for qualifying certificates, both for admission to other professional schools and for admission to other professional licensing examinations. The following schools of medicine were registered by the Regents during the current year.

*China*

University of Nanking Medical School, Nanking. Dean, R. T. Shields.

*United States*

*Illinois*

College of Medicine, University of Illinois, Chicago. President, Edmund J. James.

*Philippine Islands*

College of Medicine and Surgery, University of the Philippines, Manila. Dean, W. E. Musgrave.

**Annual Meeting of the State Board of Medical Examiners.** The State Board of Medical Examiners met in the Education Building, October 22, 1914. The following officers were elected for the ensuing year: Dr Henry B. Minton, President; Dr Arthur W. Booth, Vice President.

**Inspection of medical schools.** The work of inspecting the medical schools in the State and other schools outside the State, whose maintenance of a proper standard came under question, was continued for a time by the retiring secretary of the State Board of Medical Examiners, who reported to the Commissioner of Education on the results of his findings.

The University was represented at the annual meetings of the Association of American Medical Colleges, the Federation of State Medical Boards and the American Medical Colleges by Dr O. V. Huffman, secretary of the State Board of Medical Examiners.

On May 4, 1915, the President of the University presented to the Regents the resignation of Doctor Huffman as secretary, and recommended that it be accepted to take effect September 1, 1915. Doctor Huffman left to take the headship of the Long Island Medical College, a professional advance for him. On formal motion the Regents voted "that the resignation of Dr Otto von Huffman be accepted, and that the Board of Regents hereby expresses its appreciation

of his efficient services as secretary of the State Board of Medical Examiners and its regret that he is to sever his connection with the University."

**Summaries.** The distribution of the medical students among the several higher institutions of New York State in 1915 was as follows: Columbia University, College of Physicians and Surgeons, 374; Cornell University, Medical College, 205; Fordham University, School of Medicine, 309; Long Island College Hospital, 280; New York Homeopathic Medical College and Flower Hospital, 247; New York Medical College and Hospital for Women, 41; New York Polyclinic Medical School and Hospital, 267; New York Post Graduate Medical School and Hospital, 781; New York University, University and Bellevue Hospital Medical College, 587; Syracuse University, College of Medicine, 100; Union University, Albany Medical College, 173; University of Buffalo, Medical Department, 197.

The number of students, instructors and other information concerning the various medical schools is given in table 1, exhibit H. In comparison with 1914 the medical schools of the State for 1915 show the same number of registered institutions, 67 more officers of instruction and 23 less students. The number of degrees conferred was 59 more than in 1914.

**Examinations.** Medical licensing examinations were held September 22-25, 1914, January 26-29, May 25-28, June 29-July 2, 1915.

COMPARISON OF MEDICAL SCHOOLS IN NEW YORK AND OTHER STATES  
AND COUNTRIES

This table shows for 1915 the rejections by topics, exclusive of candidates who took only the first half of the divided examinations. Each applicant is counted only once in the number of candidates, but under the several topics each failure is indicated, excluding any answer papers not examined.

Of the papers submitted by 535 graduates of New York schools 180 were rejected, while 140 of those submitted by 151 graduates of schools in other states, and 85 of those submitted by 36 graduates of schools in foreign countries, were rejected. In addition to these candidates from schools in which there was at least one failure, 19 graduates of one New York school and 35 graduates of 19 schools in other states and countries were examined.

### Chiropody

This report covers the third year of the administration of the statute relating to chiropody. The responsibility for examinations lies with the State Board of Medical Examiners, which insures the gradual raising of standards for the practice of this branch of surgery.

**Registration.** Schools of chiropody may be registered as maintaining a satisfactory standard under section 417 of the Regents Rules. There is one registered school in the State. There were no schools registered by the Regents during the year.

**Summary.** The number of students in the School of Chiropody of New York, registered for the year in day and night classes, was 82, of whom 65 were men and 17 women. In the night course there were 20 men registered and 2 women; total 22. In the day sessions, therefore, there were 45 men and 15 women; total, 60. The school reports 36 professors and adjunct professors, 15 instructors, tutors and lecturers, and 23 other assistants on the adjunct force.

**Examinations.** Four examinations were held during the year. There were 25 applicants examined and there were no rejections. There were no honors conferred on examination.

#### Results of chiropody licensing examination 1913-15

### Dentistry

The year under revision was fruitful in the discussions of advancing requirements throughout the United States. It is unfortunate that the reports of the proceedings of certain of the national associations are unavailable for use at the date this report goes to press.

**National associations.** *The Seventh International Dental Congress* is planned for Madrid, Spain, and Doctor Aguilao, prominent in college work and dental affairs generally, publisher of a dental journal, and a man of very high regard everywhere, will preside at the next gathering.

*The National Dental Association* held its last annual meeting in San Francisco, which proved to be a fine meeting with many in attendance not only from the United States but from other countries as well. These international gatherings afford opportunity for extending dental influence throughout the world. For example, this Department's publications, laws and studies in dentistry were supplied to such visitors as Doctor Magnus of Sidney, New South Wales, the head of dental education in that commonwealth.

*The National Association of Dental Faculties* met in San Francisco, but the report of its proceedings is not available for reference at this writing.

*The Dental Faculties of American Universities* held its seventh annual meeting at Philadelphia, Pa., February 24 and 25, 1915. Its proceedings appeared from the press of the "Dental Cosmos," Philadelphia, 1915.

*The National Association of Dental Examiners* held its thirty-third annual meeting in San Francisco, August 30-31, 1915. An interesting discussion on the term equivalent was projected by the president's address, which led to a recommendation of the committee that it be eliminated from the requirements of state boards. The committee further emphasized the importance of advancing educational requirements. Another live topic of interest in New York State, because of proposed dental legislation, was projected by the president regarding the dental nurse. The negative side of the question was voiced in the words, "If we start anything like this it is going to open up an avenue that is going to be an everlasting trouble." The affirmative, in some modified form, seems likely to occur in New York State in the near future.

**Dental Society of the State of New York.** The forty-seventh annual meeting of the Dental Society of the State of New York was held at Albany, May 1915. The report of the committee on trained nurses said, "Consideration should at this time be given to the matter of assistants in the practice of dental prophylaxis," and recommended the amendment of the dental law by a clause similar to that enactment by the Connecticut State Legislature, namely:

Sec. 12. A registered dentist may employ a woman assistant or assistants, which assistants shall be known as dental hygienists. The dental hygienist may remove all lime deposits, accretions and stains from the exposed surfaces of the teeth and directly beneath the free margins of the gums, but shall not perform any other operation on the teeth or mouth, or on any diseased tissues of the mouth. They may operate in the office of a registered dentist, or in public or private institutions such as schools, hospitals, orphan asylums and sanitariums, under the general supervision of a registered

dentist, but not otherwise. The dental commission may revoke the license of any registered dentist who shall permit any dental hygienist operating under his general supervision to perform any operation other than that permitted by this section.

President Finley of The University of the State of New York welcomed the association with a reference to the importance of dentistry in the preservation of health and the plans contemplated by the State Medical Inspector, under whom the medical inspection of all children in the schools of the State is carried on. "Our educational institutions should be more extensively utilized in extending the propaganda of clean mouths and good teeth."

**State Board of Dental Examiners.** The board continued its work in the preparation of a minimum course of study and a syllabus, and distinct progress was made.

The annual meeting was held in the Education Building, Albany, October 2, 1914. The election of officers resulted as follows: president, Dr A. M. Wright; secretary, Dr H. J. Burkhart; editor, Dr A. R. Cooke.

A special meeting was held at the Onondaga Hotel, Syracuse, November 12, 1915. On formal motion it was

*Voted*, That the board request the Regents to indorse the diploma of George Bender Poole. . . .

*Voted*, That it be recommended to the Regents to change the rule with reference to a failure in two or more subjects. . . .

*Voted*, That the Regents be requested to approve of a change in the rule adopted October 13, 1911, to read: That the candidate for license take the Dental State Board examination . . . at the end of the second year in college, and after two years' regular work.

*Voted*, That the syllabus as agreed upon today be sent by examiners to the professors in the various subjects in the colleges of this State for suggestion and criticism. . . .

*Voted*, That the board indorse the amendments to the law prepared by the special committee of the Dental Society of the State of New York.

*Voted*, That the board is in favor of an amendment to the law, permitting women to do prophylactic work in public schools. . . .

**Registration.** Schools of dentistry continue to receive recognition by the University, and the list of institutions registered under section 410 is published in Handbook 10. The following dental schools were registered during the year 1914-15.

#### *Illinois*

College of Dentistry, University of Illinois, Chicago. Dean, Frederick B. Moorehead.

#### *Ohio*

College of Dentistry, Ohio State University, Columbus. Dean, H. M. Semans.

**Summaries.** The number of students, instructors, and other information concerning the various dental schools is given in table 1 of exhibit H. In comparison with 1914 the dental schools of the State show the same number of institutions, 17 more officers of instruction, 313 more students. There were 66 more degrees conferred.

**Examinations.** Dental licensing examinations were held September 22-26, 1914, January 26-30, June 29-July 3, 1915. As the result of examinations, 371 licenses were issued. There were two honor licenses issued.

COMPARISON OF DENTAL SCHOOLS

The dental schools of New York State compare favorably with those of other states as shown by the licensing examinations. The table shows for 1915 the rejections by topics: group 1, New York schools; group 2, schools in other states and countries. Each applicant is counted only once in the number of candidates, but under the several topics each failure is indicated, excluding any answer papers not examined. Of the papers submitted by 380 graduates of New York schools 177 were rejected, while 176 written by 114 graduates of schools in other states and countries were rejected. In addition to the above, 1 candidate had filed evidence of study under private preceptor before August 1, 1895, 1 of whose papers was rejected.

## Pharmacy

The manifestations of educational activities shown by the various professions are most interesting. In the proceedings of the meetings of the national associations for the current school year the students of education will find a wide variety of results attained. The same problems are being solved by one profession that have already been met by another; and the influence of successful advance by one is felt by all the others. Pharmacy, coming to

realize the need of higher educational requirements, has developed educational organizations and journals that show an interest in every phase of pharmaceutical education far beyond that of veterinary medicine, which had earlier attained statewide requirements. Law, that led the professions in the closing decades of the last century, is now found by its own profession to be lagging behind veterinary medicine and contrasting its inferiority with its former rival — medicine.

**National Associations.** *The American Pharmaceutical Association* held its sixty-third annual meeting at San Francisco, August 9-14, 1915. Education was by all odds the most important topic discussed, beginning with the meeting of the National Association of Boards of Pharmacy, at which a resolution was passed expressing the hope that by 1920 prerequisite legislation based upon an entrance requirement of high school graduation would obtain in all states; continuing in the deliberations of the American Conference of Pharmaceutical Faculties, the subject pervaded the meeting of the association and reached its climax when President Mayo announced the establishment of an American Fairchild scholarship to be administered jointly by the association, the Conference of Faculties and the Association of Boards of Pharmacy. The association's experience in the pioneer work of the syllabus committee is manifest in this joint administration of the American Fairchild scholarship, and this pioneer work on the pharmaceutical syllabus may wisely prove the method for joint procedure in similar enterprises by all other professions.

*The National Association of Boards of Pharmacy* held its twelfth annual convention August 5, 1915, at San Francisco, with President T. A. Miller of Richmond in the chair. Reference has already been made to the action of this association regarding a prerequisite requirement. Recommendations were made and approved affecting incomplete records, reciprocal registration and official blanks. Recommendations of the committee on legislation were adopted, regarding five interesting items which were referred to the section on education and legislation of the American Pharmaceutical Association. Mr Culley of the committee on syllabus stated that there had been no active work on the syllabus during the year, the work on which should remain in abeyance for the present.

*The National Association of Boards of Pharmacy* held its sixteenth annual meeting at San Francisco, August 6-14, 1915. President Wulling presented the annual address with a thoroughness and importance seldom attained. So complete and far-reaching

were the recommendations, that the conference referred the address to two committees — one to consider outward relations of the conference and the other to study the suggestions made as to internal management. The proceedings of this conference appear in so complete and attractive a form as to warrant no attempt to abbreviate it.

The proceedings also contain the record of the joint meeting of the National Association of Boards of Pharmacy with the Conference of Pharmaceutical Faculties, held August 7, 1915, in San Francisco.

At this meeting a joint committee made up from the faculties and boards was appointed to help in a propaganda to secure prerequisite laws throughout the United States.

**New York State Pharmaceutical Association.** The thirty-seventh annual convention of the New York State Pharmaceutical Association was held at Buffalo, June 29–30, July 1–2, 1915. The annual report of the State Board of Pharmacy was presented by the secretary and is incorporated in its entirety in the proceedings of the association. This report of the state board and the discussions of the association thereon, together with the recommendations for appointments on the board, are of interest to all students of pharmacy.

**Pharmacy Council.** Representatives of the Regents, of the Board of Pharmacy and of the Pharmacy Council met in the Education Building, on December 16, 1914, pursuant to call of the Regents. Regent Lord presided. The suggestions for amendment of the pharmacy law were taken up *seriatim*, and after discussion the changes decided upon were unanimously approved by those in attendance on the conference. It was

*Voted*, To recommend to the Regents and to the legislative committee of the state association, that the changes be presented to the Legislature for enactment at the coming session.

**State Board of Pharmacy.** A meeting of the State Board of Pharmacy was held June 26–28, 1915, the proceedings of which have been referred to before under the report of the state association. The board recommended certain amendments to the pharmacy rules, which were approved by the Regents (November 19, 1914) and appear in the journal of the Regents or in the amended form of the rule appearing in the Pharmacy Handbook.

The fifth annual meeting of the New York State Board of Pharmacy was held in the Education Building, Albany, September 17,

1914. The following members were present: Alfred B. Husted, president; Wayne B. Bissell, George C. Diekman, Willis G. Gregory, Jacob Diner, Thomas F. Raymow, J. Leon Lascoff, John Hurley, Byron M. Hyde and Warren L. Bradt, secretary.

The following officers were elected for the ensuing year: president, J. Leon Lascoff; vice president, Wayne B. Bissell. The following committees were appointed by the president: *violations committees*: Albany — John Hurley, Alfred B. Husted, J. Leon Lascoff; Buffalo — Byron M. Hyde, Willis G. Gregory, Wayne B. Bissell; New York — George C. Diekman, Thomas F. Raymow, Jacob Diner; *question committee*: Warren L. Bradt, Alfred B. Husted.

On June 25, 1914, the Board of Regents appointed as examiners of the Board of Pharmacy for three years each from August 1, 1914; John Hurley, to succeed himself; J. Leon Lascoff, to succeed himself; Jacob Diner, in place of John R. Wall whose term expired July 31st.

#### *Statistics for 1914*

Pharmacies registered .....	4 718
Drug stores registered .....	54
Certified storekeepers certificates .....	760
Apprentice certificates .....	918
Licenses exchanged .....	47

**Registration.** Schools of pharmacy continue to receive recognition by the University and the list of institutions registered under section 411 is published in Handbook 11. Students of these registered schools receive recognition for such subjects of the course in pharmacy as are of general and cultural value in lieu of Regents examinations for qualifying certificates, both for admission to other professional schools and for admission to other professional licensing examinations.

The following pharmacy school was registered during the year 1914-15:

*Maine*

Department of Pharmacy, University of Maine, Orono  
Dean, H. S. Boardman

**Summary.** The number of students, instructors, and other information concerning the various pharmacy schools is given in table 1 of exhibit H. In 1915 there were 5 schools of pharmacy, having 85 officers of instruction and 1220 students in attendance. There were 258 degrees conferred on graduation.

**Examinations.** Examinations were held September 23-24, 1914, January 27-28, May 26-27 and June 30-July 1, 1915, at Albany,

Buffalo and New York. The results of these examinations show that licenses were issued as follows:

	PHARMACISTS	DRUGGISTS
September .....	70	25
January .....	62	41
May .....	186	65
June .....	67	21
Total .....	385	152

Pharmacy licenses have been issued to 46 applicants in exchange for licenses issued by former boards and in lieu of those lost or destroyed as provided in rules 13 and 14.

**Results of pharmacy licensing examinations, September 1914-June 1915.** Examinations, 4; examined, 497; rejected, 112; per cent rejected, 22.5; licenses issued, 383.

Toxicology and posology .....	96
Pharmaceutical chemistry .....	193
Theoretical pharmacy .....	190
Practical examination .....	93

**Results of druggist licensing examinations, September 1914-June 1915.** Examinations, 4; examined, 220; rejected, 68; per cent rejected, 30.9; licenses issued, 152.

*Rejections by topics<sup>1</sup>*

Materia medica and botany.....	93
Toxicology and posology.....	52
Pharmaceutical chemistry.....	63
Theoretical pharmacy.....	89
Practical examination.....	16

### Optometry

The World's Optometrical Congress united with the American Optical Association in its gathering at San Francisco, July 19, 1915. After an address on optometrical legislation and advancing standards for optometrists, Augustus S. Downing was unanimously elected an honorary member of the association.

<sup>1</sup> Includes all papers rated below 75 per cent.

**The American Optical Association.** The eighteenth annual convention of this association was formally opened at San Francisco July 19, 1915. There were representative optometrists in attendance from all parts of the country, and meetings were continued through the week.

**Optical Society of the State of New York.** The twentieth annual convention of this society met in Albany June 21, 1915. The relations of the state board to the state society seemed likely to disrupt the convention through misapprehension of the relations existing between the state board, the state society, and the Regents. The opportunities of free discussion in open meeting dissipated the misapprehensions and brought about an enthusiastic session which led to important resolutions having to do with improper advertising, annual registration, and the raising of the preliminary standard for admission to the profession, to a four-year high school course.

**The Seventh Annual Meeting of the Board of Examiners in Optometry.** This meeting was held October 22, 1915, in the Education Building, Albany. Present: Messrs Bissell, Watts, Fox and Marchant.

The minutes of the sixth annual meeting held in October, 1914 were read and approved. The report of the secretary, as read, was approved, and the board organized for the ensuing year as follows: president, Charles F. Prentice, New York City; secretary, W. W. Bissell, Rochester. Questions committee: Charles F. Prentice and W. W. Bissell.

The application of Julius Applebaum for a certificate of exemption was reconsidered, and it was recommended that a certificate of exemption be granted.

On appeal, Abraham Sussman was granted a hearing in person and by counsel. Further investigation was referred to Examiner Marchant for report.

The case of Samuel Blum was reconsidered and after a careful review of the evidence the board reaffirmed its previous decision that Mr Blum was not entitled to a certificate.

The case of Joseph Ruthig was reconsidered. Additional evidence was presented and on report of the thorough investigation of the case by Examiner Marchant, it was recommended that Mr Ruthig be given a certificate of exemption.

In the case of Orlando B. Shedd, a reconsideration of his application reviewed by the board showed no additional evidence warranting a reversal of the board's former decision.

The case of Adolph Landau was reconsidered and referred to Examiner Marchant for report.

**Advisory Council.** A conference was held in the Education Building at Albany, December 16, 1914, between the Regents, the members of the board and the representatives of the profession. Regent John Moore presided and Examiner Bissell acted as secretary.

**Registration.** Schools of optometry may receive recognition through registration by the University, and the list of institutions registered under section 413 is published in Handbook 28. No optometry schools were registered during the year 1914-15.

**Summary.** For the first time this report gives a separate summary of the students in attendance on the schools of optometry in the State. In 1915 there were 2 schools of optometry, having 17 officers of instruction and 79 students in attendance. The number of students, instructors and other information concerning the various schools of optometry is given in table 1, exhibit H.

**Examinations.** Examinations were held September 22-25, 1914; January 26-29, and June 30-July 2, 1915.

**Results.** Examinations, 3; examined, 42; rejected, 18; per cent rejected, 42.8.

Veterinary Medicine

**National associations.** The proceedings of the National and State Veterinary Medical Associations appear in unique form in the journal, formerly the American Veterinary Review, in that the minutes of the meeting and the papers presented appear serially.

**American Veterinary Medical Association.** The combined fifty-first and fifty-second meetings of the American Veterinary Medical Association was held in Oakland, Cal., August 30-31, 1915. The addresses of welcome and of the president; the reports of the

secretary, of the treasurer and of the librarian; the reports of committees — finance, resolutions, legislation, Salmon memorial, intelligence and education; and the paper by Professor Fish, on "Requirements of a Veterinarian," appear in the October journal.

The minutes of the business meeting and additional papers appear in successive journals. The reports of special interest are those of the college investigation committee and of the committee on veterinary education in agricultural colleges, as well as the paper on the requirements for a veterinarian.

**State associations.** The twenty-second annual meeting of the New York State Veterinary Medical Society was held in Ithaca, at the State Veterinary College, August 3-5, 1915. An abridged account of this meeting is given in the editorial of the American Veterinary Review published in September 1915.

### **Laws relating to the practice of veterinary medicine**

**New York's first law.** The first law restricting the practice of veterinary medicine was enacted in New York in 1886. In this act (ch. 313, L. 1886) no person might practise veterinary medicine and surgery, or any branch thereof, as a profession, in this State, for compensation, until he had duly registered in the office of the clerk of the county in which he resided.

Those entitled to register were of three classes: first, the graduates of a legally chartered or incorporated college or university; second, those holding a certificate of qualification from a legally incorporated veterinary society; third, those who had been practising veterinary medicine and surgery as a profession, in this State, for a period of not less than three years preceding the passage of the act, without a diploma from a school or a certificate from a society.

**The source of practitioners under the law.** At the date of the enactment of this law there were two veterinary schools in the State: first, the New York College of Veterinary Surgeons that was organized in 1857, graduated its first class in 1867 and continued to graduate classes each subsequent year, except 1879-83 inclusive. It was consolidated with the American Veterinary College, in 1899, to form the New York American Veterinary College; second, the American Veterinary College of New York City, that was organized in 1875, graduated its first class in 1876, and continued to graduate classes each subsequent year till its consolidation with the New York College of Veterinary Surgeons, in 1899, to form the New York American Veterinary College. Columbia Veterinary College, organized in 1878, united in 1884 with the American Veterinary College. The New York State Veterinary College, at

Ithaca, was not organized until 1896, and it graduated its first class in 1897.

The report for the school year 1886-87 shows that 164 students were in attendance at the two schools of the State, 48 of whom were graduated. In addition to the two New York schools there was one school in Illinois, one in Massachusetts, one in Minnesota and one in Pennsylvania. Less accurate reports for the United States give 268 students in attendance on the six schools of the United States, of whom 93 were graduated. These 93 graduates indicate the possible supply of registered veterinarians from the schools of the United States at the date of the enactment of this first law, more than half of which were from the schools of New York State.

It is impossible to determine from the records available the number of candidates for registration under the second and third provisions, referring to the holders of certificates from incorporated veterinary societies or those practising not less than three years without the diploma of a school or the certificate of a society.

**Veterinarians in State and Nation.** Before further consideration is given to the legal requirements of the State and the Nation, a comparison should be instituted of the student body in the veterinary schools, as well as the supply for entrance on the new profession. After eleven years' experience under the new law, the report for the school year 1897-98 shows 3 schools in the State instead of 2, and 17 in the Nation, namely: California 1, District of Columbia 2, Illinois 2, Indiana 1, Iowa 1, Massachusetts 1, Michigan 2, Missouri 1, Ohio 1, Pennsylvania 1, and Washington 1, instead of 6; 99 students in the schools of the State instead of 164, and 368 in the Nation instead of 268; 40 graduates from the schools of the State instead of 48, and 123 from the schools of the Nation instead of 93. That is, the schools of the State increased 50 per cent during the first decade of the law's enforcement, those of the Nation nearly 300 per cent; the number of students in the State fell off nearly one-third while the number in the Nation increased nearly one-fourth; the number of graduates fell off one-sixth in the State, increased one-third in the Nation.

After twenty-two years' experience under the new law, the report for the school year 1908-9 shows 2 schools in the State instead of 3, and 19 in the Nation instead of 17; a new school in each of the states of Alabama, Colorado, Kansas and Ohio, and 1 less in Massachusetts; 110 students in the schools of the State instead of 99, and 2677 in the Nation instead of 368; 30 graduates from the schools of the State instead of 40, and 590 from the schools of the Nation

instead of 123. That is, the schools of the State fell off one-third during the second decade, those of the Nation increased about one-tenth; the number of students in the State increased about 10 per cent, the number in the Nation increased about 627 per cent; the number of graduates in the State fell off about 33 per cent, while the number in the Nation increased about 379 per cent.

The last available report, for the school year 1913-14, gives New York's experience under the new law for twenty-seven years. It shows 2 schools in the State, the same number as at the beginning, 149 students, a falling off of 15, and 53 graduates, an increase of 5; while the Nation had 22 schools, an increase of 18 over the beginning, 2058 students, an increase of 1790, and 560 graduates, an increase of 467. That is, New York State, possessing at the beginning one-third of the schools and more than one-half of the students and graduates, finds itself, nearly one-third of a century later, with about one-eleventh of the schools, one-thirteenth of the students in attendance, and one-tenth of the graduates of the Nation.

The reason for New York's conservative growth and the Nation's steady progress is not hard to discover. It was the influence of the New York veterinary practice acts.

**New York State veterinary laws.** The original act authorized, as we have seen, the registration of any practising the profession for three or more years prior to May 11, 1888, who held neither a diploma from a college nor a certificate from a society. The law required the filing of an affidavit of practice, and limited the time for registration of such practitioners within six months of the passage of the law. The law contemplated that all such practitioners should register before November 11, 1886, but subsequent amendments extended the time for the registration of such practitioners (ch. 166, L. 1887) to January 1, 1888; (ch. 537, L. 1889) to January 1, 1890; (ch. 419, L. 1890) to January 1, 1891.

Meanwhile, an amendment (ch. 431, L. 1888) limited the registration of those holding certificates from societies to only those holding certificates issued prior to May 27, 1888. A law (ch. 286, L. 1890) authorized the incorporation of veterinary medical societies without the power to confer certificates of qualification.

In 1893 the original law was codified (ch. 661, L. 1893) and became article 10 of the public health law, which it remains to this day.

In 1895 article 10 of the public health law was rewritten (ch. 860, L. 1895), a state board established, the administration of the law

committed to the Regents; a general education required preliminary to professional study, a three-year professional course, and a degree for admission to a formal examination; and provision made for the correction of errors in registration, construction of the article, penalties and their collection.

The attempt to mitigate hardships arising under these advancing requirements was continued by the Legislature. In 1896 (ch. 840, L. 1896), on unanimous recommendation of the state board, the graduate of a veterinary school who had failed to register might receive from the Regents a certificate entitling him to register at any time prior to July 22, 1896. In 1899 (ch. 505, L. 1899) the law legalized the registration of veterinary surgeons who had failed to register prior to January 1, 1891, who had registered prior to May 1, 1891. In 1900 (ch. 479, L. 1900) any person who was not registered because of some error, misunderstanding or unintentional omission, who could submit satisfactory proof that he had all the requirements prescribed by law required for registration and was entitled to be legally registered, might, on the unanimous recommendation of the state board, receive from the Regents a certificate which could be registered. In 1901 (ch. 231, L. 1901) two classes of persons might be admitted to the veterinary examinations: first, the matriculate of a veterinary school, who matriculated prior to January 1, 1895 and received his degree prior to January 1, 1897; and second, any person who was engaged in the practice of veterinary medicine prior to the year 1886.

In 1909 the public health law (ch. 49, L. 1909) became chapter 45 of the consolidated laws, without change in the text.

In 1912 (ch. 178, L. 1912) imperfect registration could be rectified by action of the Board of Regents without unanimous recommendation of the state board.

In 1913 (ch. 676, L. 1913) the New York American Veterinary College became a state institution.

In 1915 an important amendment was made that had been repeatedly suggested for the improvement of the administration of the law (ch. 381, L. 1915), which provides a continuous board by making the term of a member expire annually. The other important item of this amendment was the provision for annual registration and for the collection of penalties.

The last amendment (ch. 505, L. 1916) permits of the issuance of a certificate of facts by the Regents to any veterinary practitioner in any county of this State who was registered in the county clerk's office between July 1, 1895 and July 1, 1915. This certificate

may be registered and thus make valid previous imperfect registration.

From this citation of the several laws enacted by New York State to regulate the practice of veterinary medicine and surgery within the Commonwealth, it is apparent that the State sought not only to advance the requirements rationally till the practice should become a profession in fact, but also so to mitigate the hardships of such advancing requirements as to secure legal practice.

The reason for New York's rational growth in the veterinary profession is also apparent. It is the law of 1895 that established the five essentials: first, a disinterested administration free from partisan politics and vitally related to all the educational activities of the State; second, a general education preliminary to entering the profession and equivalent to that required for admission to the older professions — law, medicine and theology; third, professional study and a degree of attainment comparable with those of the other learned professions; fourth, formal and impartial examinations by representatives of the profession; fifth, a legal standing through licensure that protects the profession, the public and the State.

**New York State's leadership.** A brief reference is made to the Nation's steady progress in the enactment of legislation affecting the veterinary profession under the influence of New York's experience. The first law, as we have seen, restricting the practice of veterinary medicine, was enacted in New York in 1886. In 1899 (thirteen years later) there were laws affecting the practice of veterinary medicine in twelve states: California, Illinois, Maryland, Michigan, Minnesota, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Virginia and Wisconsin; in 1909 (ten years later) in thirty-two states: Connecticut, Colorado, Delaware, District of Columbia, Georgia, Indiana, Iowa, Kansas, Louisiana, Maine, Massachusetts, Missouri, Nebraska, New Hampshire, North Carolina, Oregon, South Dakota, Tennessee, Utah and Washington having enacted laws during the decade; in 1916 in forty-four states: Alabama, Arkansas, Hawaii, Idaho, Mississippi, Montana, Oklahoma, Porto Rico, Rhode Island, Vermont, West Virginia and Wyoming having enacted laws in the interim.

In 1899 there were five states in which a diploma did not admit to practice, an examination being required in all cases, namely: Minnesota, New York, North Dakota, Pennsylvania and Virginia; in 1909 there were twenty-two states: California, Colorado, Connecticut, District of Columbia, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Missouri, Nebraska, New Jersey, North Carolina, South Dakota, Washington and Wisconsin having enacted laws

during the decade; in 1916 there are thirty-six states: Alabama, Arkansas, Delaware, Hawaii, Illinois, Indiana, Ohio, Oklahoma, Oregon, Rhode Island, Utah and Vermont having enacted laws in the interim.

In 1899 there were four states in which a diploma was required for admission to the licensing examinations, namely: Minnesota, New York, North Dakota and Pennsylvania; in 1909 graduation was required in sixteen states: California, Colorado, Delaware, District of Columbia, Indiana, Iowa, Maine, Maryland, Michigan, New Jersey, South Dakota and Washington having enacted laws during the decade; in 1916 graduation is required in twenty-four states, Alabama, Montana, North Carolina, Ohio, Oregon, Rhode Island, Utah, Vermont and Wyoming having enacted it into laws during the interim, and Indiana having repealed this provision of its law.

In 1899 New York exacted an academic course in a registered academy or high school, or its equivalent, for admission to the licensing examination, and Pennsylvania a competent common school education; in 1909 New York required a full high school course, or the equivalent, and Delaware, New Jersey and Pennsylvania required a competent common school education; in 1916 New York maintains the same high requirements for admission, Pennsylvania 15 standard high school units, and Delaware and New Jersey require a common school education.

In 1905 one state required annual registration — Oregon; in 1909 five states, Iowa, Michigan, Porto Rico and Wisconsin having enacted laws during the same decade; in 1911 Indiana adopted biennial registration and North Carolina annual; in 1912 Vermont adopted annual registration; in 1913 Montana; and in 1915 Alabama, New York and Washington; so that in 1916 there are eleven states requiring annual registration, and one requiring biennial.

From this review of legislation the influence of the New York statute appears summarized in tabular form.

**Legislation Affecting the Practice of Veterinary Medicine in the United States**

1886	FIRST VETERINARY MEDICINE PRACTICE ACT, NEW YORK STATE					
YEAR	State laws	Examinations, not diplomas	Diplomas required	High school	Common school	Annual registration
1899.....	12	5	4	1	1	0
1909.....	32	22	16	1	3	5
1916.....	44	36	25	2	2	11

In the third of a century during which New York State has led the Nation in the enactment and enforcement of laws affecting professional education, what power has she possessed not found in other political divisions of the Nation? A disinterested administration free from partisan politics and vitally related to all the educational activities of the State. What forces placed on the statute book a compulsory school system? uniform teachers licenses? general educational requirements preliminary to the study of the professions, practically a compulsory law for secondary and higher education, professional laws affecting the practice of theology, education, law, medicine, chiropody, dentistry, pharmacy, optometry, veterinary medicine, nursing, librarianship, accountancy, shorthand reporting, architecture and dental hygiene? University scholarships — physical and disciplinary without military training in the elementary and secondary schools? the Education Law and the Regents Rules? That unique creation — over 130 years old — The University of the State of New York, whose examinations test pupils facing adolescence, entering on higher education and commencing life; whose councils stand for the schools; whose boards speak for the professions; whose officers administer elementary, secondary and higher education; and whose trustees are Regents serving without pay in the administration of all the educational affairs of the State committed to them by the Legislature in the interests of all the people of the Commonwealth.

### State Board of Veterinary Examiners

The annual meeting of the New York State Board of Veterinary Examiners was held at the Education building, November 16, 1915. Present: Messrs Knapp, Beebe, Huff and Stone, Dr H. L. Taylor was present as the representative of the Assistant Commissioner for Higher Education.

The board was organized temporarily by the election of Mr Stone as president, and Mr Knapp as secretary.

After a careful reading of the amendments to the veterinary practice act and the methods of carrying them into effect, the several items were taken up *seriatim*: (1) What shall be the procedure in the administration of the amended act? (2) What procedure shall be followed in reregistration? (3) What facts shall annually, in the month of January, be reported under oath to the State Board of Examiners? (4) What form of certificate shall be issued for display with the original certificate of registration?

The board concurred in the procedure proposed by the Assistant Commissioner for Higher Education, namely: that in the absence of funds for the initiation of the work, the Administration Division provide an additional stenographer and typewriter from December 1st through February, with necessary desk, chair and light; card indexes, including trays and cards necessary for alphabetic and county lists of the veterinarians registered annually; filing cases, including files, application forms, stationery for correspondence and certificates; 1500 copies of the amended veterinary practice act, forms for the use of applicants, and letters of transmission. It was agreed that a letter should be addressed to all veterinarians of the State, the 1st of December, inclosing a copy of the amended statute and an application for reregistration.

On formal motion, it was voted that the application for annual reregistration be annually reported in the month of January.

After careful consideration of the form of the original certificate issued by the county clerk, and of forms issued by other boards, it was voted that the certificate for the registration of a pharmacy be the model in form, and the following the wording of the certificate of reregistration:

NEW YORK STATE  
BOARD OF VETERINARY MEDICAL EXAMINERS

No. \_\_\_\_\_ [seal] 1916

This is to certify

That \_\_\_\_\_ [Degree or title] \_\_\_\_\_ co., N. Y.  
reported under oath to the State Board of Examiners the facts required by  
the board, paid to the Regents a registration fee of one dollar (\$1) and  
received this

#### CERTIFICATE OF REREGISTRATION

in conformity with the provisions of section 220 of article 10, chapter 45 of the Consolidated Laws.

This certificate must be conspicuously displayed, together with the original certificate of registration.

This certificate expires on the thirty-first day of December, 1916.

[seal]

.....  
*Assistant Commissioner for Higher Education*

On formal motion, the permanent organization of the board for the ensuing year was perfected as follows: president, Garry T. Stone, Sidney; secretary, H. S. Beebe, Albion.

**Veterinary Council.** A meeting of this council was held December 16, 1914. Present: Regent Moore, Doctors Moore, Blair, Knapp and Beebe.

It was the unanimous opinion of the council

1 That membership of board of examiners should expire, one each year; an appointment to be made each year for a term of five years; that the Board of Regents and Commissioner of Education shall determine who shall fill the one, two, three, four and five year terms; that in this instance, the association shall name to the Department each year five persons from whom the appointment shall be made.

2 That section 224 of the veterinary practice act should be amended so as to provide for prosecution by the Attorney General rather than by the district attorneys of counties.

3 That for the better promotion of the interests of the society and the advancement of the profession as well as to secure protection for those entitled to practise, and to furnish information to the Attorney General for procedure against those that are not entitled to practise, the law be so amended that the veterinarians of this State shall be required to register annually with the Education Department.

4 That the fee for such registration shall be \$1.

5 That an amendment should be made to the law by which those who are not entitled to practise and who persist in the practice of veterinary medicine shall be prosecuted as misdemeanants and that such illegal practice shall be a misdemeanor, punishable by a fine of \$25 or 30 days in jail, or by both fine and imprisonment, in the judgment of the court.

A veterinary student who has completed two years of study in a recognized veterinary school shall not be guilty of a misdemeanor when practising during his third year and before obtaining his license, provided he shall be at the time in the employ of a licensed veterinarian.

6 That it would be unwise to amend the veterinary law so that persons who are practising veterinary medicine at least ten years prior to the enactment of the law in 1909 shall receive a certificate of facts from the Board of Regents which they might register and thus become legal practitioners.

**Registration.** Schools of veterinary medicine continue to receive recognition by the University, and the list of institutions registered under section 412 is published in Handbook 12. The following schools of veterinary medicine were registered during the year 1914-15.

*Kansas*

Veterinary Department, Kansas State Agricultural College, Manhattan  
Professor in charge, F. S. Schoenleber

Michigan

Division of Veterinary Science, Michigan Agricultural College, East Lansing  
Dean, Richard P. Lyman

**Summary.** The number of students, instructors and other information concerning the various schools of veterinary medicine is given in table 1, exhibit J. In 1913 there were 2 schools, 47 officers of instruction, and 142 students. The number of graduates, as shown by the degrees conferred, were 53. In 1914 veterinary schools of the State show the same number of institutions, 49 officers of instruction, and 136 students. There were 34 degrees conferred.

**Examinations.** Veterinary licensing examinations were held September 22-25, 1914, January 26-29, May 25-28, June 29-July 2, 1915, at Albany, Buffalo, New York and Syracuse. Thirty-five veterinarians were licensed on examination.

Nurse Registration

It is fitting to introduce the first report of the national and state associations interested in nursing, with the reason for reporting them.

It is not an attempt to furnish information alone nor to refer interested students to sources of information, though it does both. It is the purpose of this report that goes to all the institutions and departments of higher education throughout the world, to call

attention to all activities, individual and collective, personal and professional, free, benevolent and public, working in and for higher education, in so far as the limits of space and appropriations permit.

In the two decades that have elapsed since nursing became an active candidate for admission to the learned professions, through the incorporation of its schools, this State and Nation have witnessed a development of nurse training schools exceeded only by that of the secondary schools during the same period. Two illustrations must suffice to show New York's position in this movement, the one personal and the other public.

A commission appointed by a foreign government investigating the practice of medicine and its allied subdivisions asked the representative of its graduate nurses association whether the New York State nurse practice act established a satisfactory principle for that government to act upon. "I think of all the registration bills that have been put into operation in the different states of the American Union, that the New York State bill has worked out and given the best results."

Miss Sophia F. Palmer R. N. was the first president of the New York State Board of Nurse Examiners under the act referred to above. She may very properly be regarded as the mother not only of the New York State nurse practice act but of all others in the Union, for her influence has been felt through the American Journal of Nursing in all campaigns, past and present, for the advancement of nursing. Her remark in committee editing the New York State nurse training syllabus became a classic. "This work is as good as a liberal education."

**American Nurses Association.** The proceedings of the eighteenth annual convention of this association held at San Francisco June 20-25, 1915 appear in the American Journal of Nursing, volume 15, number 11. It is a matter of interest that the membership of this association comprises two national associations; 41 state associations; 50 county and city associations; 231 alumnae associations; 201 permanent members and 20 charter members. It should be further noted that there were in attendance on this eighteenth annual convention, 2 delegates from national associations; 44 from state associations (representing 35 associations); 31 from county and city associations; 172 from alumnae associations (representing 91 associations); 55 permanent members; 3 charter members; 7 officers and 347 visitors. Representatives of the International Council were present from America, England,

Holland and Australia. The president announced that it was decided to hold the meeting of 1918 in Denmark, under the presidency of Madame Henny Tscherning, and Miss Lavinia L. Dock was reelected honorary secretary.

The report of the board of directors of the American Journal of Nursing Company was presented by the president, which showed marked advancement through the two years of reconstruction that has established it upon a sound financial basis, thus making it a model, through the influence of its editor in chief, Miss Palmer, for similar publications of other professions.

**New York State Nurses Association.** The fourteenth annual convention of this association was held in New York City, October 20-21, 1915. The most interesting feature of the session was the recital of individual experiences in the various countries at war, by Red Cross nurses. The report of this meeting appears in the American Journal of Nurses, volume 16, number 3.

**State Board of Nurse Examiners.** The annual meeting of the New York State Board of Nurse Examiners was held in Albany, October 2, 1915. The following were elected officers for the ensuing year: President, Miss Nancy Cadmus; secretary, Miss Jane E. Hitchcock.

**Nurse Training School Council.** In April 1914 the Regents enlarged this council to include ten members as follows: five registered nurses; two representatives of hospital boards of trustees; a representative of the New York State Department of Health; a representative of the New York City Department of Health; and the president of the Medical Society of the State of New York. The names and addresses of the council as announced by the Chancellor, appeared in the Eleventh Annual Report.

On December 16, 1914, at the first meeting after the increase in its membership, the council, under the chairmanship of Regent Alexander, at the request of the New York State Nurses Association, considered the amendment to the nurse practice act which was presented to the Legislature in the spring of 1914, and with one dissenting vote indorsed the measure. The Board of Regents did not approve the action of the council, but appointed a committee to prepare a substitute amendment. An amendment was submitted by this committee and received the indorsement of the Board of Regents and the New York State Nurses Association. The amendment was lost in committee, both Senate and Assembly.

**Registration.** Schools of nursing continue to receive recognition by the University, and the list of institutions registered under sec-

tion 421 is published in Handbook 13. The following nurse training schools were registered during the year 1914-15:

*Illinois*

Oak Park Hospital, Oak Park  
Superintendent, Sister St Lawrence

*Massachusetts*

Cambridge Hospital, Cambridge  
Superintendent, Alma E. Grant  
New England Baptist Hospital, Boston  
Superintendent, Emma A. Anderson

*New York*

Broad Street Hospital, Oneida  
Superintendent, Jessie Broadhurst  
City Hospital, Blackwells Island, New York  
Principal, Carolyn E. Gray  
Misericordia Hospital, New York  
Superintendent, Mary MacPhee  
Mount St Mary's Hospital, Niagara Falls  
Superintendent, Sister Mary Cherubim  
Ossining Hospital, Ossining  
President, George F. Secor  
St Joseph's Hospital, Far Rockaway  
Superintendent, Mary L. Carney  
St Joseph's Hospital, Yonkers  
Superintendent, Sister Mary Lewis  
United Hospital, Port Chester  
Superintendent, Claribel A. Wheeler

*Ohio*

Lutheran Hospital, Cleveland  
Superintendent, E. Mannel

*Vermont*

Mary Fletcher Hospital, Burlington  
Superintendent, Thomas S. Brown

The registration of the following nurse training schools was rescinded by Regents actions during the same year:

City Training School, Blackwells Island, New York  
Principal, Carolyn E. Gray  
Saratoga Cure and Infirmary, Saratoga  
President, George F. Comstock

**Inspection.** The statistics for the past two years show a definite increase in the number of candidates seeking entrance to the registered nurse training schools in this State, and the credentials

submitted to the Department bear evidence that a large majority of these candidates have educational qualifications very considerably in advance of the minimum requirements. A number were still being admitted under the equivalent; many of these equivalents were given for much more than one year's secondary education, but were for work in unregistered schools and definite credit could not be given.

A substantial number of schools require the nurse student certificate for admission to their preliminary courses.

The amount of paid instruction has increased and better classroom facilities have been provided.

New residences for pupils have been erected by three large Brooklyn hospitals, namely, the Brooklyn, the German and the Methodist Episcopal. Funds have been provided for building and equipping a residence for the pupils of the German Hospital of New York City. Flushing and Williamsburg Hospitals have remodeled buildings to provide more adequate accommodations for their nurses.

**Professional records.** Much time, thought and effort have been given to secure the adoption of an adequate and uniform system of student records, and the Department in the Syllabus for the Guidance of Nurse Training Schools has fully outlined such a system. While very great improvement has been made, the records in a number of our registered nurse training schools are incomplete, indefinite and in some instances inaccurate.

The courses in dietetics and pediatrics are limited in many of our nurse training schools. More than half the number of schools are without the services of a resident dietitian, not only to give a sound course of instruction (as outlined in the syllabus) but also to supervise the practical work of each pupil during six or eight weeks' service in the preparation of invalid diets in the hospital diet kitchen.

Affiliations have been made for pediatrics by many of the schools that can give only a limited course of clinical instruction in this branch of nursing, and such affiliations are sought by many others. It is the conviction of training school committees that pupils should not be graduated without a thorough training in the care of sick children in view of the large part this knowledge will play in their work when graduated, whether it be in any of the avenues of public health, private duty or school nursing.

Very little has been done to shorten the hours on duty for student nurses, particularly on night duty where, with very few exceptions, the schools require that students give twelve consecutive hours out of every twenty-four to hospital duty, without any periods for rest,

study or recreation. The sentiment is strongly opposed to this over-use of the services of pupil nurses, even among the faculties of the schools where longest hours obtain.

Evening class work has been very generally discontinued but is still given in a few schools. Unfortunately the longest hours on duty obtain in the very schools in which the largest number of lecture and recitation periods are scheduled in the evening. It would seem reasonable to suppose that schools which require of the student body long hours daily of hospital service would arrange their courses of instruction to exclude night periods. The reason most often given for both conditions is that the residences for pupils are entirely inadequate in capacity to house the number of pupils which would be necessary if shorter hours were required.

As every new wing or department added to a hospital presupposes an increase in the number of graduate nurses and pupils, it would seem obvious that a corresponding new wing should be added to the nurses' residence. This unfortunately is usually postponed, the result being an overcrowding of the student nurses, which fact is sometimes the cause of a high percentage of illness among them.

For some reason difficult to fathom, the services of obstetrics and pediatrics are occasionally combined. Indeed, one hospital has erected a separate building for these services so that they can not be separated. Another hospital has set apart and equipped one floor in a new building for this combination of services. Although an effort was made to separate the nursing care in these departments during day hours, in both instances a single pupil was expected to care for all patients on both services at night.

**State hospitals.** Improvement has been made in the training school facilities in a few of the New York State hospitals for the insane. A new residence for the women nurses of Manhattan State Hospital will be of material assistance in attracting a better qualified class of women to its nurse training school. A demonstration room has been set aside and fully equipped at Willard State Hospital. A resident dietitian has been appointed at St Lawrence State Hospital and it is now possible to give an adequate course of dietetics and invalid cookery to the pupils in this school. The classroom facilities and nursing equipment for the wards in St Lawrence State Hospital are now equal to those in general hospitals in good standing, and the pupil nurses are separated (both as to dining room and residence) from the employee force.

The majority of these hospitals require a three-year course for all pupils who wish to take the state examinations for registration and to prepare for general nursing, nine months of this time being spent in a general hospital. There should be only two groups of students giving nursing care to the patients in state hospitals. The first group should be called student nurses and all should qualify for state registration. The second group should be called attendants and should receive the same instruction as is now given to the group called nurses, many of whom fail to qualify for registration, but who do leave the state hospital service to do general nursing.

Miss Katherine Tucker in her report on "Nursing Care of the Insane in the United States" for the American Nurses Association draws the following conclusions:

1 The importance of the position of the superintendent of nurses is not recognized. Not enough previous training and experience is required; her salary is too low; she has little or only divided authority in regard to the training school; her jurisdiction is too limited in scope, as it should include supervision of all those giving nursing care, with the view to greatly increasing the number of trained nurses and decreasing the number of attendants.

2 The requirements for admission to the training schools are too low, especially as to age and education. These should correspond to the general hospital.

3 The hours are far too long. In this branch of nursing, especially, an eight hour day is essential and at least three weeks' annual vacation.

4 In most instances the curriculum is not sufficiently well rounded. This should correspond to the curriculum of general hospital training schools.

5 Less than two-thirds of the state hospitals affiliate with general hospitals. Every state hospital should affiliate with the training school of a general hospital as part of its regular course. The general hospital training school should be ready and glad to give this cooperation.

6 The living conditions of the nurses in state hospitals is most deplorable and one of the most serious defects.

Most of the defects in the nursing service in hospitals for the insane in this State can be directly traced to the "lack of recognition of the importance of the position of the superintendent of nurses," for she is too generally regarded as a purely theoretical instructor without the authority either to supervise the practical ward work or to maintain the discipline of the school.

**Advanced work for graduate nurses.** The growth and development of the nursing profession, necessitating a sound academic as well as technical preparation for those entering it, are rapidly making the position of the superintendent or principal of a school of nursing closely analagous to that of the dean of a professional school or college. Those desiring to qualify for these positions

should obviously be possessed of a broad knowledge of educational and social problems, and must be qualified to teach as well as to administer. The work required by the department,<sup>1</sup> therefore, in preparation for training school administration includes courses in psychology, the principles of teaching, the history of education, and teaching in training schools, together with courses in institutional administration, institutional planning, modern social problems, social legislation and sanitary science.

To meet the increasing demand for nurses qualified to hold the position of hospital superintendent, a course in hospital administration is offered, dealing in detail with the problems of the various departments of institutions, such as accounting, the food department, the laundry, as well as with the wider questions of municipal sanitation, the principles of organization, of economics, of institutional planning, and kindred subjects.

Not infrequently the superintendency of the small hospital includes the superintendency of the school of nursing, and students desiring to prepare themselves for this dual position are permitted to select from the required courses in training school and hospital administration, those bearing most directly on its two aspects, the previous professional training and experience being determining factors in the selection of the subjects. A valuable and highly appreciated feature of the courses in administration are the visits to the various institutions for the study and comparison of their construction, equipment and methods.

The positions open to nurses who have thus prepared themselves still greatly exceed the supply. It is gratifying to find that both the graduates of the department and the hospital authorities who have secured their services, express themselves as convinced of the practical value of the knowledge obtained.

The preparation of instructors for nurse training schools follows closely the accepted ideals for the preparation of teachers for other types of schools. The educational requirement is full high school, with the professional diploma from a hospital training school of approved standing. In special cases, long experience and proven ability in the field of training school work may be accepted even where the student has not had a complete high school training, the student making good her deficiencies after admission.

The subjects studied may be divided into three main groups: (1) those which give the principles and technic of teaching such as

---

<sup>1</sup>The department of nursing and health at Teachers College, Columbia University, New York City.

psychology, principles and history of education, and special methods to be used in training school teaching and supervision; (2) those which give a solid grounding in the subjects which the nurse may teach or closely related scientific subjects such as chemistry, bacteriology, anatomy, physiology, hygiene and sanitation, materia medica and nutrition; (3) those which give a broader point of view about the profession and strengthen the cultural background, such as history of nursing, social science, English, history and language.

Observation and experience in teaching is obtained in the training schools for nurses connected with various New York hospitals, several of our students serving each year as part-time assistants in such institutions.

There is abundant evidence that the field for the instructor in nursing schools is both a useful and promising one. Hospitals are finding it impossible to carry on their educational work in any satisfactory way without specially trained teachers who can give their whole time to fundamental subjects. The demand has grown rapidly and is at present greater than the supply. The field has a special appeal for nurses who are interested in the technical and scientific aspects of nursing work, who enjoy the personal contact with pupils, and who are interested in promoting the newer educational ideals in the nursing profession.

A third and highly important division of the department is devoted to the further preparation of graduate nurses for the various branches of public health nursing, which includes visiting nursing, school and industrial nursing, hospital, social service, with special work in infant welfare, tuberculosis and mental hygiene. The development of the modern public health movement has called for specially trained workers, who can carry over most effectively into the lives and habits of the people the practical application of the teaching of preventive medicine and of sanitation, and the hospital trained nurse has been turned to as the worker who could bring the largest degree of serviceable 'preparation for' this vitally important work. With this sound, practical training in nursing as a basis, further and specialized work in various directions is provided in the college.

The courses as at present arranged aim to supplement training school work both in scientific and practical subjects, wherever necessary or desirable, and to include a presentation of modern social and economic theories and conditions, and their relation to health, modern industry and labor problems — immigration, poverty, housing, city sanitation and disease. Present theories, principles

and methods of relief are dealt with. As the keynote of all rational development in public health is education — persistent and universal, and of many kinds — it is clear that the personal instruction and advice which the visiting nurse carries from house to house in her daily rounds, reinforced by practical example and illustration wherever practicable, is a uniquely valuable form of educational work.

Probably the most important work, however, lies in the public schools, where the school nurse has created an outpost of strategic value in the families of the school children coming under her care, and establishing a more sympathetic and vital relationship between parents, teachers and children. There is a marked tendency to require some systematic instruction from the school nurse to the children in personal hygiene, and courses therefore in educational psychology and in teaching methods are offered to school nurses who wish or are required to add the teaching function to their other regular duties.

The demand for school nurses — indeed for all kinds of public health nurses — and especially for leaders and organizers of high educational attainments, is far in excess of any available supply. Hospital and training school workers should endeavor to attract into their schools candidates whose educational qualifications, natural ability and personal qualities are such as to give promise of success in this interesting and most useful field of public service, in which the nurses properly equipped are destined to play an increasingly important part.

One hundred sixty inspections were made during the year, 147 in registered schools and 13 in schools seeking registration. Fourteen conferences were held with members of nurse training school committees.

**Summary.** The total bed capacity reported in 120 hospitals, exclusive of state hospitals, in 1915 was 20,614. The total bed capacity reported in 13 state hospitals for the insane and in Craig Colony for Epileptics in 1915 was 34,852. The total bed capacity reported in the 134 hospitals in connection with registered nurse training schools in New York State in 1915 was 55,466.

19	hospitals	reported	over	500	beds
14	"		from	250	to 500 beds
36	"		"	100	to 250 beds
50	"		"	50	to 100 beds
15	"		"	25	to 50 beds

There are no registered nurse training schools in connection with hospitals of less than 25 bed capacity.

In 1915, 134 schools reported 4766 pupils, an increase of 264 over the year preceding.

The total number of statements received (including applications for nurse student certificates) was 2847; certificates for college work, 45; graduation from high school or its equivalent, 611; one or more years of high school, 1192; equivalent of one year high school, 583; credentials awaiting completion, 128; credentials rejected as not meeting requirement, 288. During 1915, 381 nurse student certificates were issued, an increase of 297 over the preceding year.

**Examinations.** Examinations were held January 26-28 and June 29-July 1, 1915, in Albany, Buffalo, New York and Syracuse; 1282 candidates were examined. Of these, 1199 received certificates, 83 were rejected, 183 received honors and 93 were admitted under the waiver.

## Librarianship

That this field of education aspires to recognition among the professions appears in its literature, in its discussions and in its resolutions. "Professional Standards" is a topic discussed in the catalog section of the Berkeley conference. "But professional librarians understand that school libraries are essential not only to the efficiency of a school, but also to the efficiency of the public library." The committee on standardizing library courses in normal schools reports results and makes recommendations for standard requirements.

What delays the development of this profession? Not the need for skilled, experienced and educated librarians. The demand for librarians in public and private libraries, in schools and colleges, in special and general lines, is large, and steadily increasing. Nor is

it the lack of schools, of leaders, or of associations. It is the absence of public recognition. The duties imposed by the Hippocratic oath brought the practitioners of medicine into public notice; the ordination vows of the minister attracted the attention of the laity; the bar imposed requirements upon the practitioner that were recognized by the public in general. The necessity of protecting the public from unskilled and incompetent practitioners of medicine and at the bar led to licensing requirements. Teaching became a profession when voluntarily the local authorities united in uniform licensing examinations in this State. Legislation enacted to protect the master was supplemented by legislation enacted to protect the apprentice, and both necessarily recognized the duties and obligations due the general public. The bar recognizes but two of the three partners in this legislative program, and suffers, as is shown by the confession of its leaders, cited under other caption. Medicine, while recognizing its duties to the public and the rights of its members, deliberately withdraws the administration of the medical laws from the schools and from the board of censors, and places it in the hands of an independent body representative of the State. Librarianship will become a profession when standards of requirements for admission to a licensing examination and their administration are placed in the hands of an independent authority representing the general public.

**American Library Association.** The thirty-seventh annual meeting of this association was held at the University of California, June 3-9, 1915, with President Wellman in the chair. The proceedings are published in the bulletin of the American Library Association, volume 9, number 4. The report of the committee on training courses for school librarians shows the development of this important work:

<sup>c</sup> It seems evident that almost without exception teachers training schools consider librarianship an auxiliary in formal education, and plan their courses on that principle. . . . Practically all recognize the claims of librarianship as a distinct profession. . . . The lack of standard in our present agencies for training school librarians is regrettable; the lack of interest which fails to use a fair proportion, even of those who try to get training for library service, is even more regrettable. . . . No pressure, however enthusiastic, will produce much improvement until the schools themselves not only endure but demand better service from their libraries and better trained librarians to conduct them.

**New York State Library Association.** The twenty-fifth meeting of this association was held at Squirrel Inn, Haines Falls, September 27-October 2, 1915, Miss Underhill presiding. The report

of the silver anniversary of the association is published in the first number of the fifth volume of "New York Libraries," a quarterly published in the interests of the libraries of the State by The University of the State of New York. The closing speech of the retiring president voiced her hope for the future:

What can be done to establish better standards of professional qualifications and efficiency? Can not some definite cooperation of this association with other educational bodies result in better and broader relationship? . . . It is a source of surprise, and more or less of comment, to discover how many professional and technical men expect to find little of real moment in a public library.

**State Library Council.** The Regents Rules provide for this council, the Chancellor annually appoints successors to the retiring members, and its membership is announced in the Organization Handbook. There is little knowledge of its meetings, less information of its recommendations, and no report of activities this year.

**Registration.** The colleges and universities registered by the Regents under section 401 and 404 receive recognition for admission to the New York State Library School. The list of institutions registered by the Regents during the year, under these sections, is published under the caption "Colleges," and the entire list appears in Handbook 32.

Some effort has been made to adopt standards for the registration of library schools, and amendments to chapter 9 of the Regents Rules were presented to the Assistant Commissioner for Higher Education during the year.

**New York State Library School.** This institution is a teaching department of the University. It admits to its first year class graduates of registered colleges or universities, and by this reason may be regarded as a graduate school, though it is properly classified as a professional school. In time its courses may be modified and increased to provide for the conferring of both the master's and the doctorate degrees in librarianship.

It reported for the year 10 members of the faculty, 5 instructors, and 28 others, a regular student body of 49, and conferred 17 B. L. S. degrees.

**Summaries.** In 1913-14 there were 59 students pursuing regular courses in the New York State Library School, 31 in Pratt Institute School of Library Science, and 47 in the Syracuse University Library School. The number in the Library School of the New York Public Library was not reported.

In 1914-15 there were 49 students in the State Library School, 23 in Pratt Institute, and 65 in Syracuse University. New York Public Library did not report.

In 1913-14, 7 students received the degree of B. L. S. from the State Library School, 27 received certificates from Pratt, 5 received B. L. E. from Syracuse, and the number from the New York Public Library was not reported.

In 1914-15, 20 students received the degree of B. L. S. from the State Library School, 9 the degree of B. L. E. from Syracuse University.

In 1913-14 there were 10 in the faculty of the State Library School, 6 full professors in Pratt, and the numbers in Syracuse and the New York Public Library were not reported.

In 1914-15 the numbers of instructors were not reported. There is a considerable variation in the report of special lecturers and special instructors, so that there is a lack of uniformity in the reports of different schools. An attempt will be made to secure more accurate reports from the several schools of the State, with a view to determining the growth of the teaching force, the student body and the credentials issued.

### Accountancy

In an address delivered before the American Association of Public Accountants, at Seattle, a speaker discussing some phases of professional ethics said:

The position of the certified public accountant in the United States is unique. Of first importance is the fact that his degree is recognized and protected by law in all the industrial and commercial states. This precise condition does not exist elsewhere. On the other hand, there are no broad laws such as exist in other countries effecting compulsory auditing of the accounts of corporations and others. Consequently, there is no general public appreciation of the value or even the use of public accountants' services. This creates a situation pregnant with potentiality for professional advance, either by the education of the business world, or by law, or by both.

**American Association of Public Accountants.** The annual meeting of this association was held in Seattle, Wash., September 21-23, 1915, President Joplin presiding. The president voiced the unanimous sense of the association in the words:

If we could, within our organization, establish such standards and a control to which the profession as a whole would subscribe and measure up, a vital step would be taken which would make for a lasting recognition in the community, and advance the usefulness of the profession to those who depend upon its services and advice in the conduct of their affairs.

To this end he recommended that a special committee be appointed for the purpose, to report at the next annual meeting.

The proceedings are reported in the association's *Journal of Accountancy*, volume 20, number 4.

**New York State Society of Certified Public Accountants.** The annual meeting of this society was held in New York City, May 10, 1915, President Corwin presiding. The treasurer's report was especially interesting in showing the increase in surplus "that will enable the society to devote its energies to constructive work in the furtherance of the interests of the profession." With such a nucleus the society might well consider the question of developing a professional school for the training of public accountants. The formal reports of the president, secretary, treasurer and auditing committee are given in the *Year Book* published by the society and dated October 1915.

**Advisory Council.** No advisory council has been created by Regents action to confer with this profession. Advantage might be taken of such an organization to carry forward propaganda along the lines indicated in the quotation above, and the recommendation of the president of the American association.

**Registration.** Schools of accountancy worthy of registration have developed slowly, from the same reasons as were so pertinently given above. The one school in New York State thus far evolved needs not only the backing of the state society but also of the general public. The opinion seems warranted that such a dense population as Greater New York possesses demands a special school for the professional training of accountants, especially as active educational work is fostered by the large banking institutions of the city.

**School of Commerce, Accounts and Finance.** This faculty of New York University was established in 1900 to meet the widespread demand for scientific preparation and training for business careers. The courses have two objects in view—to add to the knowledge of the students as to business operations, and to train men to think clearly about business problems.

For the year 1913-14 it reported 71 instructors, 2190 students and 175 degrees (B. C. S.) conferred. For the school year 1914-15 it reports 74 instructors, 2711 students, and the conferring of the degree of B. C. S. on 198 candidates.

### Certified Shorthand Reporting

This profession *in posse* has the opportunity and means for performing a helpful service to the general public. Whether it shall become a profession *in esse* time alone can tell. It has the state and national organization; it has legislation in many states; it has a general educational requirement, and for admission to its ranks a professional test to determine the qualifications of its members.

**National Shorthand Reporters Association.** The seventeenth annual convention of this organization was held in San Francisco August 16-20, 1915. Its proceedings appear in book form issued by the association. An interesting report of the committee on legislation recites the state legislation of the year with comments thereon.

**New York State Stenographers Association.** The fortieth annual meeting of this association was held in New York City, December 27 and 28, 1915, President MacClinton presiding. The proceedings have been published by the association. Among the important recommendations of the president were two questions: one involving the extension of the certified shorthand reporters law; and the other raising the question whether the association could be made more efficient by incorporating under a name having a special application to the certified shorthand reporters law. This association is possessed of a state charter, the corporate title of which is the "New York State Certified Shorthand Reporters Association." The discussion of the first of these recommendations of the president led to the appointment of a committee of five to present the matter to the Regents. Regarding the second question, it was voted as the sense of the association that the name should be changed from that of the New York State Stenographers Association to that of the New York State Shorthand Reporters Association.

**State Board of Certified Shorthand Reporters.** The death of Mr James M. Ruso, February 27, 1915, left a vacancy in the board that was not filled by the Regents until December 4, 1915, by the appointment of Mr Irving F. Cragin of Buffalo to fill the unexpired term. As a result, no annual meeting was held and no officers of the board elected for the year.

**Advisory Council.** No advisory council has been created by Regents action to confer with this profession. Advantage could be taken of such an organization to carry forward the proposed action of the president, that was referred to a committee, as reported above.

**Registration.** The law, rules and information regarding certified shorthand reporting are found in Handbook 33. No school of reporting has thus far developed within the confines of this State. The energies of the association and of the state board might with advantage be directed to the development of such a higher professional school for the specialized requirements of court reporting and other higher forms. Such a school might be modeled on the school of journalism. Surely, a profession that has evolved such men of letters as Philander Deming and James M. Ruso would find little difficulty in establishing a school commemorating their work and less labor in securing a liberal patronage by such prominent classmates as the mayor of Albany and the President of the United States.

**Examinations.** Under the laws of 1911, chapter 587, three candidates were examined in the year August 1, 1914–July 31, 1915, two

of whom passed the examination for certified shorthand reporter. They are: Charles W. P. Bigelow, 22 North street, Richmond Hill, N. Y., and Raymond Fenner Martin, 5 Beekman street, New York city. Five certificates were issued under the waiver.

### Registered Architects

The Legislature of 1915 amended the general business law by inserting therein a new article entitled "Article 7-A," which became a law on April 28, 1915.

As customary, in this annual report the new law as placed on the statute book by the Legislature is reprinted in full for information in other states of the Union and in foreign countries.

#### *Article 7-A*

Became a law April 28, 1915 (L. 1915, ch. 454)

### REGISTERED ARCHITECTS

- Section 77 Registered architects
- 78 Board of examiners
- 79 Qualifications; examinations; fees
- 79-a Certificates
- 79-b Violation of article

§ 77 **Registered architects.** Any person residing in or having a place of business in the State, who, before this article takes effect, shall not have been engaged in the practice of architecture in New York State, under the title of architect, shall, before being styled or known as an architect, secure a certificate of his qualification to practise under the title of architect, as provided by this article. Any person who shall have been engaged in the practice of architecture under the title of architect, before this article takes effect, may secure such certificate, in the manner provided by this article. Any person having a certificate pursuant to this article may be styled or known as a registered architect. No other person shall assume such title or use the abbreviation R. A., or any other words, letters or figures to indicate that the person using the same is a registered architect.

§ 78 **Board of Examiners.** The Regents of the University shall, within ninety days after this article takes effect, appoint a board of five examiners who shall make rules for the examination and registration of candidates for such certificates, subject to the approval of the Board of Regents. Such board of examiners shall be composed of architects, who have been in active practice in the State of New York for not less than ten years, previous to their appointment, selected by the Regents. Such examiners shall be entitled to such compensation for their services under this article as the Board of Regents shall determine, not exceeding in the aggregate the amount of fees collected from applicants for certificates.

§ 79 **Qualifications; examination; fees.** Any citizen of the United States, or any person who has duly declared his intention of becoming such citizen, being at least twenty-one years of age and of good moral character, may apply for examination or certificate of registration under this article, but

before securing such certificate shall submit satisfactory evidence of having satisfactorily completed the course in an approved high school or the equivalent thereof and subsequent thereto of having satisfactorily completed such courses in mathematics, history and one modern language, as are included in the first two years in an approved institution conferring the degree of bachelor of arts. Such candidate shall in addition submit satisfactory evidence of at least five years' practical experience in the office or offices of a reputable architect or architects, commencing after the completion of the high school course. The board of examiners may accept satisfactory diplomas or certificates from approved institutions covering the course required for examination. Upon complying with the above requirements, the applicant shall satisfactorily pass an examination in such technical and professional courses as are established by the board of examiners. The board of examiners in lieu of all examinations may accept satisfactory evidence of any one of the qualifications set forth under subdivisions one and two of this section.

1 A diploma of graduation or satisfactory certificate from a recognized architectural college or school, together with at least three years' practical experience in the office or offices of a reputable architect or architects; but the three years' experience shall be counted only as beginning at the completion of the course leading to the diploma or certificate;

2 Registration or certification as an architect in another state or country, where the standard of qualifications for the same are<sup>1</sup> not lower than those required by the board of examiners under this article;

3 The board of examiners in lieu of all examinations shall accept satisfactory evidence as to the applicant's character, competency and qualifications, and that he has been continuously and exclusively engaged in the practice of architecture for more than two years next prior to the date when this article shall take effect; or satisfactory evidence that the applicant has been actually and exclusively engaged in the practice of architecture on his own account or as a member of a reputable firm or association for more than one year prior to the date when this article shall take effect; providing the application for such certification shall be made within one year of such date.

Every person applying for examination or certificate of registration under this article shall pay a fee of twenty-five dollars to the Board of Regents.

§ 79-a Certificates. The result of every examination or other evidence of qualification, as provided by this article, shall be reported to the Board of Regents by the board of examiners, and a record of the same shall be kept by the Board of Regents, and such board shall issue a certificate of registration to every person certified by the board of examiners as having passed such examination or as being otherwise qualified to be entitled to receive the same. Every person securing such certificates shall file the same with the county clerk of the county in which he resides or maintains a place of business. The Board of Regents may revoke any certificate, if such action be recommended by the board of examiners, after thirty days' written notice to the holder thereof and after a hearing before the board of examiners, upon proof that such certificate has been obtained by fraud or misrepresentation, or upon proof that the holder of such certificate has been guilty of felony in connection with the practice of architecture.

---

<sup>1</sup>So in original.

§ 79-*b* Violation of article. Any violation of this article shall be a misdemeanor, punishable for the first offense by a fine of not less than fifty and not more than one hundred dollars, and for a subsequent offense by a fine of not less than two hundred nor more than five hundred dollars, or imprisonment for not more than one year, or both.

### Technical

There have been several attempts to make adequate report of the condition and development of technical and other education, that have failed hitherto from unavoidable causes. It is now proposed to bring to the attention of the educational world the importance of these lines of educational activity as well as to report the growth and development of the institutions for higher instruction in these lines.

This information will be given as in professional education, where such data are available. The following from paper 232 of the International Engineering Congress in 1915 sets forth the tentative lines of report:

Technical education in the United States may be investigated under either of two heads . . . the training of workmen for the industries, supplemented by enough general education to make them intelligent and useful citizens; . . . the collegiate studies in science that commonly lead to a profession.

The name of a technical school is not a reliable indication of its place in this classification. It is often as confusing as a college which may be anything from a business school to a university. The word institute is most commonly used for the higher education, especially when associated with the word polytechnic or technology, but used alone it, too, covers a very wide range from trade school to professional school. It would almost seem worth while to call the polytechnic institutes colleges of applied science, as set off against colleges of liberal arts. They are both institutions of higher education, covering generally the same ground for two years, and then differentiating into studies with a professional or utility end in view and studies with only general information or mental training as the main object. . . .

It is a curious fact that the professional side of technical education should have been the first of the two to gain systematic attention in America. . . . The manual training or mechanic arts high schools are not, strictly speaking, vocational. . . . The trade school is one of our most useful institutions, so long as it remains true to its purpose — the training of young men for the trades. . . .

Notwithstanding the numerous publications and discussions in engineering societies, it is doubtful if there is even substantial agreement upon the best methods of training young men for the technical professions, except along very general lines. . . . The profession of mechanical engineering has changed greatly in the past forty years, in proportion as the great combinations have been formed and as machinery has been standardized. . . . All other branches of engineering have their practical side, which is good only if properly taught. . . . As between a practical course with some theoretical

instruction and a theoretical course with some practical work, the choice is unquestionably for the latter. Engineers spend their lives in gaining experience and education with practical matters, but they study the theory only once.

It is difficult to write on the subject of the professions in applied science without a clear understanding of the distinction between an occupation and a profession. . . . All professions have begun more or less as occupations, and have become professions by the development of principles and rules that must be learned before a man is really considered an adept. . . . When we think of the professions we must recognize that in a certain sense all professions, except the ministry, are coming more and more under the aegis of science, and the methods adopted in scientific research are now generally applied to the study even of history and literature. Yet the term "applied science" is here limited to those applications based almost wholly upon the investigation of materials and forces of nature. This is essentially the difference between the profession of law, of medicine, of teaching, of business, as distinguished from engineering, agriculture and chemistry. Architecture stands in a place by itself. . . . We can classify agriculture and engineering as professions, only because both of them have accumulated by long experience that code of rules and that library of scientific principles so necessary as the basis of any profession. In connection with agriculture, forestry necessarily takes its place as essential to the proper utilization of the soil. These two professions must eventually become more or less state-supported, because few farmers can afford the expense of advice on the management and care of their farms. As professional advisers acquire the confidence of the public and demonstrate beyond question their qualifications to solve all problems relating to the soil, they will take a very large part in our governmental system. . . .

*The four roads by which a young man may enter the profession of engineering:*

1 The older method, by apprenticeship in a shop or in the field, after an early education in the grammar or high school.

2 Apprenticeship in some industry, after a college education without technical study.

3 A four-year course in some school of technology or in the scientific department of a university, followed by a modified form of apprenticeship in some practical field.

4 A general education in some college, followed by postgraduate study in a technical school or in the technical department of a university.

This paper contains most interesting charts showing at a glance the schedule of studies in American technical schools, with comments based thereon. It is followed by paper 233, entitled "Some Considerations Regarding Engineering Education in America." Both papers furnish the basis for the discussions concerning engineering education in America, published in the 11th volume of the International Engineering Congress 1915.

**International Engineering Congress.** The International Engineering Congress held under the auspices of the American Society

of Civil Engineers, the American Institute of Mining Engineers, the American Society of Mechanical Engineers, the American Institute of Electrical Engineers, and the Society of Naval Architects and Marine Engineers, met in San Francisco September 20-25, 1915. Its transactions appear in twelve volumes, including the index volume. The index volume is divided into three sections: historical and statistical; abstracts of papers; and table of contents and author index.

The historical and statistical matter, which appears in section 1, is presented for the double purpose, first, of giving to the members of the congress, the supporting societies and the profession at large, as a matter of general professional interest, as clear an indication as possible of the origin, character and purpose of the congress, the nature of the organization under which it was conducted and the amount of work involved; second, to serve, in some measure, as a guide to those who may be called upon in the future to conduct a similar congress.

**Higher technical schools of New York State.** The higher institutions classified as technical schools by the Regents, include the technical and other higher institutions that maintain courses in applied science, engineering, art, journalism, music, agriculture and forestry.

The nine institutions of higher education in civil, mining, mechanical and electrical engineering are accurately classified in the Regents Organization according to President Hollis's definition, three of which bear the suggested name "Applied Science," and all confer a bachelor of science degree.

The time seems fast drawing near when the B. S. degree shall be conferred by schools of applied science only, and the engineering degree on graduate work.

**Summary.** In 1915 there were 3488 students in attendance on the schools of engineering and technology of the State; 1681 in the schools of art; 2322 in the schools of music; 2102 in the schools of agriculture.

### Civil Engineering

**National association.** The forty-seventh annual convention of the American Society of Civil Engineers was held in San Francisco, September 16, 17 and 18, 1915, immediately preceding the International Engineering Congress reported above.

The subject of the president's annual address was "Idealism and Art in Engineering."

We are supposed to be materialists, but I have always felt that if there is any profession which tends to develop the ideal in men it is the profession of engineering. . . . The brook of scientific and industrial development, so tiny at the beginning of the last century, has steadily grown deeper and stronger; new tributaries—the developments of scientific and industrial specialties—have added new volumes until at the beginning of this new century we find it a mighty stream, deep with thought, broad with liberality, and symbolic of modern scientific and industrial development flowing in the direction of human progress . . . Engineering destructive of idealism! Little study has he made, who advances this claim, of the close association between religion and engineering in the past—between religion and engineering in the present. The monks of the twelfth century, who toiled patiently placing stone on stone in the bridges which they erected, saw more clearly than many of the present century the relation between paths of communication and the spread of religion. . . .

In this work of preventive medicine the sanitary engineer has borne his full share. . . . Our thoughts turn at once to that monumental work in sanitation carried out on the Panama canal. . . . Under disheartening difficulties and with sacrifice of personal comfort, yes, at the risk of their lives, the men labored who made the isthmus a place fit for the white man to live, and thereby made the construction of the canal possible. . . . Is it reasonable to suppose that the engineers who did this work, who made these sacrifices, were not the highest type of man, that is, practical idealists?

Take irrigation engineering, the possibilities of which are only beginning to be realized in this country. The true engineer realizes that with every water or drain pipe well laid, he is bringing prosperity and happiness, health and vigor, where before existed poverty and misery, sickness and langor. . . . Our own reclamation service has made a record of which we may well feel proud. Here, too, the men with a devotion to the cause of mankind, with loyalty and steadfastness, have given a service the value of which is not yet fully recognized. . . .

In railroad engineering, think you that the men who through virgin forests and sandy deserts, through miasmatic swamps and rocky cañon, across rivers and over mountains, carried the steel bands that now tie mankind so closely together—think you that these men were engaged in an occupation likely to kill their ideals? . . .

Turn to bridge engineering. To some a bridge is merely a means of safely transferring men and goods from one side of a valley or one bank of a river to the other. It may stand for much more to others. What engineer has not been thrilled by Kipling's story of the bridge builders? . . .

In still another branch of engineering, the one of river and harbor improvement, there is nothing destructive of idealism. What James B. Eads has done for the people living in the Mississippi valley, in opening up the mouth of the "Father of Waters," stamps him as one of the benefactors of mankind. . . .

Science and its applied form, engineering, therefore have not been destructive of idealism—when the period of history that we now call modern will be rounded to completeness, all of the highest and most sacred human ideals will not be lost or dimmed, but will become nearer and more real, and science has not been destructive of art or beauty.

The house of this society is open from 9 a. m. to 10 p. m. every day except Sundays, the Fourth of July, Thanksgiving day and Christmas day. It is located at 220 West 57th street, New York City.

Its Proceedings is published monthly, and volume 41 includes January–December, 1915. Its Transactions is published annually; volumes 78–79 appeared in print in 1915.

**Summaries.** In 1915 there were 1213 students in attendance on the schools of civil engineering in the State distributed among the several higher institutions, as follows:

Columbia, 113; Cornell, 480; N. Y. University, 170; Polytechnic Institute of Brooklyn, 68; Rensselaer Polytechnic Institute, 276; Syracuse University, 106.

### Electrical Engineering

Among the four national engineering societies composed of civil engineers, mining engineers, mechanical engineers and electrical engineers, the society of the electricals is the youngest. Of the societies mentioned, it may be said that the art which they represent existed before they were formed, but of the electricals it can be said with pardonable pride, that these members created the art of electrical engineering. . . . The centennial exposition at Philadelphia in 1876 marked the beginning of a new era in electrical development. Prior to that year the use of electricity had been limited practically to such purposes as electroplating and to different forms of signaling, of which the telegraph was the most important.

**National association.** The thirty-second annual convention of the American Institute of Electrical Engineers was held at Deer-park, Md., June 29–July 2, 1915. The proceedings are reported in the August number of the American Institute of Electrical Engineers.

As the constitution of the institute required the meeting of the convention prior to August, it was determined to unite with the other engineering societies in the International Engineering Congress, and to hold a convention of the electrical engineers at San Francisco as a special convention called the Panama-Pacific. This convention was held at San Francisco, September 16–18, 1915. The total registration was 355.

The proceedings of the institute are published monthly, and the 34th volume includes the months of January to December, 1915, in two sections: (1) Institute affairs; (2) Papers, discussions and reports.

A noteworthy incident in the profession of engineering was the inauguration and organization of the engineering foundation, which is the name given to a fund to be administered for the advancement

of the arts and sciences connected with engineering and the benefit of mankind, the basis of which is the initial gift of Ambrose Swasey of Cleveland, Ohio, as the nucleus of the fund. Mr Swasey's gift was made through the United Engineering Society for the benefit of the entire engineering profession. The fund is entrusted to the Engineering Foundation Board, composed of eleven members, including two representatives, each, from the American Society of Civil Engineers, the American Institute of Mining Engineers, the American Society of Mechanical Engineers, and the American Institute of Electrical Engineers, two members chosen at large, and the president of the United Engineering Society ex officio.

This foundation is unique "because it was not donated as such gifts usually are, to an institution of learning, but to working engineers, and because it is the first of its kind given by an engineer, to be managed by engineers, for engineers." The list of members of the board of administration is published in the June proceedings of the American Institute of Electrical Engineers.

**Summaries.** In 1915 the students in attendance on the schools of electrical engineering in the State were not reported, but 46 degrees were conferred.

### Mechanical and Mining Engineering

The grouping of these two branches of engineering is alphabetical with a view to the development of the record later.

**National association.** The thirty-sixth annual meeting of the American Society of Mechanical Engineers was held in the Engineering Societies Building, New York, December 7-10, 1915. The importance of this gathering is indicated somewhat by the record attendance of 1437, of which 819 were members. The proceedings of this meeting and of the earlier meetings at San Francisco and Buffalo appear in the Transactions of the society, volume 37, published by the society in 1916.

The president, in his address at the annual meeting, discussed "Science in Its Relation to Engineering."

I have always had the conviction that we give too little thought to the pioneers in any line of research, and I have often bowed my head in reverence to those who, with the most limited means and equipment, by patient, persistent plodding, wrested the secrets of nature from their entanglement. . . .

It is a long way from the sun dial of Ahaz to the Riefler clock; a long way from the Pyramid of Cheops to the stately steel structure of our great cities; a long way from the cubit span and hand-breadth to the standard meter whose value is determined in light waves; a long way from the ox

cart with its wheels cut from the end of a log to the steam and electric locomotive; a long way from the log bridge across the narrow streams to the magnificent steel and concrete spans that now cross our widest rivers; a long way from the tiny Egyptian cedar boat, built without iron, steel or copper, to the majestic steel steamships that daily cross the ocean; a long way from the smoke balloon of Montgolfier to the dirigible, or the biplane that soars like a bird through our skies; yes, and all along the pathway of the evolution of these and other inventions of man are unwritten histories which, if told, would be filled with romance and oftentimes with tragedies,—aye, with the sacrifice of the lives of many of the world's noblest pioneers who have contributed to the treasures of our vast storehouse of knowledge.

Of interest to this association and to all the technical professions is the report of the power test committee, no. 1526, on rules for conducting performance tests of power plant apparatus. It was presented at the December meeting, received by the council December 7, 1915, and ordered printed. This committee was appointed under the council's resolution of April 13, 1909 to revise the present testing codes of the society relating to boilers, etc., and to extend these codes, bringing them into harmony with each other and with the best practice of the day.

The council at its December 7, 1915 meeting voted that a permanent committee be appointed to interpret the rules when called upon to do so, to make such revisions as may be found desirable, and to modify the rules to meet new conditions as they may arise. There seems to be an improvement in the organization of this committee and its relation to the codes, over the older organization in pharmacy that is responsible for the United States Pharmacopoeia.

**American Institute of Mining Engineers.** The annual New York meeting of this institute was held in the Engineering Society Building, February 15–17, 1915. A metrical paraphrase from Job xxviii, 4, 5, 6, and an illustration of a mining operation beneath the "peaceful field," well illustrates the work of this branch of engineering:

Above, the peaceful field and **fold**;  
Beneath, the flame reaps harvest old,  
Whose grain is gems, whose soil is gold.  
He drives his shaft; men come and go  
Above his head, and do not know  
Who swings suspended far below.

**Summaries.** In 1915 there were 1316 students in attendance on the schools of mechanical engineering in the State distributed among the several higher institutions, as follows: Columbia, 81; Cornell, 915; New York University, 76; Polytechnic Institute, Brooklyn, 36; Rensselaer Polytechnic, 127; Syracuse, 81.

### Stationary Engineering

**National association.** The thirty-third annual convention of the National Association of Stationary Engineers was held in Columbus, Ohio, September 13-17, 1915. Two items of importance showing the relation of this body to the others mentioned above were: first, the report of a committee instructed to cooperate in every way possible with the American Society of Mechanical Engineers for the advancement of the work they have in hand, of adopting a uniform code governing the manufacture of steam boilers; second, the invitation of the Secretary of State to appoint a delegate and an alternative to attend the Second Pan-American Scientific Congress to meet in Washington in December-January, 1915-16.

**New York State Association N.A.S.E.** The twentieth annual convention of the New York State Association N.A.S.E. was held at Auburn, N. Y., June 11-12, 1915. The report is interesting in its reference to the possibility of license legislation. "Conditions at Albany did not warrant the expenditure of funds in any attempt to secure a state license law. . . . It was useless for the engineers to seek legislation until they had composed their own differences. . . . No effort had been made to secure a state license law because of lack of harmony among the various engineering organizations."

Legislation affecting licensing stationary engineers was reported in the August 1915 number of the "National Engineer."

**Summaries.** In 1915 the students in attendance on the schools of stationary engineering in the State were not reported.

### Schools of Art and Journalism

The grouping of these institutions this year under this central title is for convenience only. In addition to the recognized schools of art, journalism and music in the State, there are other institutions of science, literature, art, history, and other institutions incorporated by the Regents. An attempt will be made another year to report in greater detail the work of all these institutions and to determine what institutions are in active existence, through the reports of the institutions or through personal inspection by the Department. Our files destroyed in the Capitol fire are incomplete in the records of national and state associations, and an earnest effort will be made in the next report to complete them. Meanwhile, condensed reports from the institutions of the State are given in the form of summaries, with a view to their development in future reports.

**Schools of art.** There are three institutions of higher education classed under this caption, and a number of others that hold charters from the Regents, classed under the Education Law, under the caption "Other Institutions and Associations."

**Summaries.** In 1915 there were 1562 students in attendance on the schools of art in the State distributed among the several higher institutions, as follows: Cooper Union Art School for Woman, 340; New York School of Applied Design, 410; Syracuse University, 812.

**Schools of journalism.** Representatives of nearly every section of the country attended the annual conference of the Association of American Teachers of Journalism, in New York, in December 1914. The meeting was held at the Pulitzer School of Journalism, Columbia University. Regent Chester S. Lord said:

Just now, we are living in a commercial, not a literary age, and the people are not a-hunger for literary food. They care not so much for the niceties of literary expression, for the well-rounded, ornamental sentences of Washington Irving and his contemporaries who were under the inspiration of the Victorian literary era. They prefer plain-spoken words, expressed with businesslike direction. . . .

The narration of highly important events is perhaps on a higher plane of efficiency and brilliancy than ever before and at higher compensation. The really good reporter is in greater demand. The man who combines expert writing with expert knowledge of politics, or finance, or mechanics, or any one of a dozen other specialties, is sought in every newspaper office.

According to the statistics gathered by the secretary, James Melvin Lee, there were 2107 students in journalism at the various universities and colleges offering technical instruction in that subject. The date of the annual meeting was changed from December to April, and statistics for the year 1915 were not available until the meeting at the University of Kansas in April 1916.

During the summer of 1915 the National Editorial Association met at San Francisco, and it was reported "that there were 49 institutions of higher education offering technical instruction in journalism, and since that time two more universities at least have added journalism courses to the curriculum." "It is thirty-seven years since the first course in journalism was offered at Cornell University and 45 since one was first offered at Washington and Lee, but it is only 20 years since systematic teaching began, and the larger growth in our field is in the past decade."

**Summaries.** In 1915 there were 141 students in attendance on the School of Journalism in Columbia University.

### Schools of Music

That educational purpose in music is not a new idea is abundantly indicated by the fact that the national association has been in existence for almost forty years, the first meeting having been held in the midsummer of 1876.

This association sets forth clearly the distinction between the functions of the national association and the State, in these words:

Therefore, we believe that the national association should devote its energies to the study of professional questions of a national character in a broad, national manner, leaving to the states the work of determining the best ways and means of improving conditions within the state bounds. That is, New York State is better qualified to work out a plan of regulation of teaching within its borders than is a national association to shape one which shall be effective in all states.

**National association.** The thirty-seventh annual meeting of the Music Teachers National Association was held in Buffalo, N. Y., December 28-30, 1915. This was the tenth meeting since the reorganization in 1906. There were six regular sessions and two evening recitals, the second of which was blended with a cordial and altogether delightful reception tendered by Buffalo musicians. The papers and proceedings of the association were published by the association in 1916.

**State association.** The twenty-seventh annual convention of the New York State Music Teachers Association was held in New York City, June 15-17, 1915. The official report was published by the association in the hope that its pages would be read and reread for the purpose of gaining a better view of the ultimate objects of all true artistic endeavor. "Music values are not measured by musical expression alone, of which so much is of an inferior order, but by the experiences it produces."

**Summaries.** In 1915 there were 2322 students in attendance on the schools of music in the State distributed among the several higher institutions, as follows: Cortland Conservatory of Music, 240; Grand Conservatory of Music, 88; Institute of Musical Art, 607; Ithaca Conservatory of Music, 451; Metropolitan College of Music, 427; New York College of Music, 509.

### Agriculture

We have already called attention to the fact that in connection with agriculture, forestry necessarily takes its place as essential to the proper utilization of the soil, so in this report forestry will

become a subtopic for discussion. It has also been noted these two professions must eventually become more or less state-supported, that as professional advisers acquire the confidence of the public and administer beyond question their qualifications to solve all problems relating to the soil, they will take a very large part in our governmental system. Especial emphasis, then, of the educational side of agriculture, should be placed on the training of farm advisers and the development of farm bureaus.

**State association.** The seventy-fifth annual convention of the New York State Agricultural Society gathered in annual meeting January 20-21, 1915, in the Assembly Chamber at Albany. One of the speakers set forth the theme announced in this report, in the following words:

I think we ought to keep in our minds very clearly that the farm bureaus are preeminently educational institutions — almost exclusively educational institutions. But I think we should also recognize very clearly that this applies not only to the matter of the production of crops but to the marketing of crops, and to any other important phase of agriculture that has a bearing upon the profitableness of farming. Nowhere is education and assistance more sorely needed than along the lines of cooperation in the purchasing of farm supplies and in the marketing of farm products, not to mention the distribution of these products. No feature of farm bureau work is more important than this. . . . Recognizing the work of the county agent as educational in its nature, he should not take any active part in the transaction of commercial operations, either in purchasing or selling. He may secure information as to markets and marketing facilities and as to sources of supply, and may be the medium in the community through which this information reaches the farmers of his county. In this work the agent should deal with groups, and the actual transactions should be done by the farmers themselves through their own organization by representatives appointed for this purpose.

The functions of farm bureaus were set forth in their relation to cooperative associations, by two charts giving the work of a county farm bureau in its preliminary program, through the farm bureau manager; and in a permanent program, through the manager of farm bureaus.

The proceedings of the meeting were published by the Department of Agriculture in its bulletin of May 1915.

**Summaries.** In 1915 there were 2102 students in attendance on the schools of agriculture in the State distributed among the several higher institutions, as follows: New York School of Agriculture, Alfred University, 168; New York State College of Agriculture, Cornell University, 1670; New York State School of Agriculture, St Lawrence University, 160; College of Agriculture, Syracuse University, 104.

**Forestry.** The thirty-fourth annual meeting of the American Forestry Association was held in New York City, January 11, 1915. The service the American Forestry Association can render in educational work was presented by Dean Baker of the New York State College of Forestry at Syracuse University. The meeting was essentially practical, its chief addresses and discussions having for their purposes the best service during 1915 of the several phases of forest conservation, national forestry, state forestry, private forestry, forestry for lumbermen, forestry for paper and pulp men, and the use of forests for recreation.

A meeting of the association was held at San Francisco on October 20th, which day was officially known on the program of the Exposition as "American Forestry Association Day."

**State association.** The annual meeting of this association was held at Rochester, January 13 and 14, 1915. The question of educational work to be done by the association among the Boy Scouts was thoroughly discussed and a committee appointed to consider all phases of the question and report to the executive committee. Necessary authority was given the committee on Boy Scout work to give boys who show special interest on achievement in fire protection or reforestation, a suitable medal or other gift.

The report of the meeting appears in the bulletin of the New York State Forestry Association for April 1915.

**Summaries.** In 1915 there were 273 students in attendance on the New York State College of Forestry, Syracuse University.

## Summary

### Statement a

Number of school districts in state, not including cities. . . .	10 370
Number of districts that maintained schools and had libraries. . . . .	10 146
Number of districts that neither maintained schools nor had libraries. . . . .	2 10
Number of districts that maintained schools and had no libraries. . . . .	14
Total. . . . .	10 370

Of the 14 districts that maintained schools and had no libraries, 1 had no children, 1 was newly organized, 4 were very poor, and 8 lost their libraries by fire.

### Statement b

509 districts had fewer than 50 volumes each	
2 113 districts had as many as 50 volumes each, and fewer than	100
4 923 " " " " 100 " " " " "	200
1 894 " " " " 200 " " " " "	500
344 " " " " 500 " " " " "	1 000
363 districts had more than 1000 volumes each.	

### Statement c

Number of districts that had school libraries each containing	
1 volume or more. . . . .	10 146
50 volumes or more. . . . .	9 637
100 " " " . . . . .	7 524
200 " " " . . . . .	2 601
500 " " " . . . . .	707
1 000 " " " . . . . .	363

During the year, 458 districts added to the number of books in their libraries sufficiently to pass them to the grade above that in which they had been.

The number of completed applications for state money to apply toward library books for public schools of all grades, and toward maps and globes for rural schools that did not maintain academic departments, that were accepted in whole or in part during the year ending July 31, 1915, was 3688.

## EXHIBIT K

### LICENSES

Tables showing physicians, chiropodists, dentists, veterinarians, pharmacists, druggists, optometrists, accountants, certified shorthand reporters and nurses licensed

## LICENSES

Under the heading "Professional education" the number of years of the licentiate's professional course required by statute at the date of his matriculation is given, with the date of his degree from the professional school. The method of licensing the candidate is given under the heading "Examinations," figures indicating the number of trials; (Ex) the full examination; (Px) partial; (Fx) final. The column headed "Month" gives the month in which the candidate was examined: Ja, January; F, February; Mr, March; Ap, April; M, May; Je, June; Jl, July; Ag, August; S, September; O, October; N, November; D, December. The result attained is given under the letters F, failed; P, passed, and H, honors. No applicant passes the examination whose standing falls below 75 per cent in any topic except nurses, pharmacists and druggists. In dentistry and accountancy, honors are given to students having 90 per cent or above in all of the required subjects; in nursing and veterinary medicine, honors are given to students having 90 per cent in three-fourths of the required subjects.

September 1, 1891, the medical statute required all physicians to be licensed by the Regents unless previously registered and legally authorized, and subsequent statutes exacted the same of dentists and veterinarians. There are six methods of admission to medical practice in the State, arising from the advancing requirements of the medical practice act: (1) license on examination, Ex; (2) by indorsement of license, IL, followed by the abbreviation of the state registered (applicants examined and licensed by other state boards registered by the Regents as maintaining standards not lower than those provided by the statute); (3) by indorsement for eminence and authority, EA (the Commissioner, on approval of the Regents, may indorse a license or diploma of a physician who has reached a position of conceded eminence and authority in his profession); (4) by indorsement of diploma, ID (applicants who matriculated in a New York State medical school before June 5, 1890 and who received the degree from a registered medical school before August 1, 1895); (5) on recommendation of the State Board of Medical Examiners, Rec (to make valid imperfect registrations); (6) indorsement of a certificate, Ct (for registry in another county if such certificate clearly shows that the original registration was of an authority issued under seal by the Regents, or if such certificate itself was indorsed by the Regents).

There are five methods of admission to dental practice in the State, arising from the advancing requirements of the dental practice act: (1) license on examination, Ex; (2) by indorsement of license, IL, followed by the abbreviation of the state registered (applicants examined and licensed by other state boards registered by the Regents as maintaining standards not lower than those provided by the statute. In October 1909 the Regents rescinded the only agreements to indorse licenses under this provision of the statute, viz, Pennsylvania and New Jersey); (3) by indorsement on the recommendation of the board after an oral examination, RP (the Regents indorse the diploma of a graduate from a registered school if the graduate has been in lawful practice for six years next preceding his application, provided his preliminary and professional education met the New York statutory requirements); (4) on certificate of study, CS (the

Regents may issue a license to an applicant who has passed the written examination before the board). No new cases can arise under this provision, which expired by limitation January 1, 1904, and the record is preserved for reference to former reports; (5) indorsement of a certificate, Ct (for registry in another county if such certificate clearly shows that the original registration was of an authority issued under seal by the Regents or if the certificate is indorsed by the Regents as entitled to registration).

There are five methods of admission to practise veterinary medicine in the State, arising from the advancing requirements of the statute affecting the practice of veterinary medicine and surgery: (1) license on examination, Ex; (2) by indorsement of license, IL, followed by the abbreviation of the state registered (applicants examined and licensed by other state boards registered by the Regents as maintaining standards not lower than those provided by the statute); (3) by indorsement of diploma, ID (applicants that matriculated in a New York State veterinary medical school before July 1, 1896, and that received the veterinary degree from a registered veterinary medical school before July 1, 1897); (4) on recommendation of the State Board of Veterinary Medical Examiners, Rec (to make valid imperfect registration); (5) indorsement of a certificate, Ct (for registry in another county if such certificate clearly shows that the original registration was of an authority issued under seal by the Regents or if such certificate itself is indorsed by the Regents as entitled to registration).

Tabular information regarding the certificates to practise optometry has been rearranged to conform, so far as practicable, with the facts given in the other tables. These tables have been brought forward into the order required by the organization of professional schools. The tabular matter regarding certified public accountants has also been recast and placed before the statistics regarding registered nurses, for the same reason.
